## The Open Group TOGAF Business Architecture Foundation Exam Sample Questions (Q67-Q72):

### NEW QUESTION # 67

In what TOGAF ADM phase is the information map linked to other business blueprints?

- A. Phase A
- B. Phase B
- C. Phase E
- D. Preliminary Phase

### Answer: C

Explanation:

Phase E Explanation of Correct answer: In Phase E (Opportunities and Solutions) of the TOGAF Explanation:ADM, the information map is linked to other business blueprints such as the Business Capability Map, the Value Stream Map, and the Business Process Model Phase E Explanation of Correct answer: In Phase E (Opportunities and Solutions) of the TOGAF Explanation:ADM, the information map is linked to other business blueprints such as the Business Capability Map, the Value Stream Map, and the Business Process Model2. This helps to identify and prioritize opportunities for business improvement and transformation2.

### NEW QUESTION # 68

Exhibit.

Consider the diagram of an architecture development cycle.

Select the correct phase names corresponding to the labels 1, 2 and 3?

- A. 1 Requirements Management - 2 Implementation Governance - 3 Preliminary
- B. 1 Architecture Governance - 2 Implementation Governance - 3 Preliminary
- C. 1 Continuous Improvement - 2 Migration Planning - 3 Architecture Vision
- D. 1 Requirements Management - 2 Change Management - 3 Strategy

### Answer: A

Explanation:

The diagram of an architecture development cycle shows three phases of the TOGAF ADM. The correct phase names corresponding to the labels 1, 2 and 3 are Requirements Management, Implementation Governance, and Preliminary respectively3. These phases are described as follows:

Requirements Management (label 1): This phase provides a process for managing architecture requirements throughout the ADM

cycle3. It ensures that requirements are captured, stored, prioritized, and addressed by relevant ADM phases3. It also ensures that requirements are validated and updated as necessary3.

Implementation Governance (label 2): This phase provides a process for ensuring that the implementation projects conform to the defined architecture3. It involves establishing an implementation governance model, defining architecture contracts and compliance reviews, and monitoring and supporting the implementation projects3.

Preliminary (label 3): This phase provides a process for preparing and planning the architecture project3. It involves defining the scope and vision of the project, customizing the ADM process and content framework, defining principles and governance structures, and evaluating the enterprise architecture maturity and readiness3.

## NEW QUESTION # 69

Which of the following best describes the relationship between business models and business architecture?

- A. Business models are useful for impact analysis, however Business Architecture is needed for scenario analysis.
- B. **Business Architecture breaks a business model down into the core functional elements that describe how the business works.**
- C. Business Architecture provides a conceptual summary view, whereas business models support in-depth analysis.
- D. Business model development is a prerequisite for a Business Architecture development.

### Answer: B

Explanation:

A business model describes how an organization creates, delivers, and captures value for its stakeholders3. A business architecture breaks a business model down into the core functional elements that describe how the business works, such as the value proposition, the customer segments, the channels, the revenue streams, the cost structure, the key resources, the key activities, and the key partnerships3.

The relationship between business models and business architecture is that while business models provide a high-level description of business elements such as customers, markets, and the economic rationale of the business, the business architecture takes this model and breaks it down into more detailed descriptions. It identifies the core functional components and their relationships, which describe how the business operates, the roles involved, the information flowing through the business, and the technology supporting business activities.

## NEW QUESTION # 70

Which of the following best describes this diagram?

- A. **Business Capability Map**
- B. Business Capability/Value Stream Mapping
- C. Business Relationships diagram
- D. Business Capabilities Layer diagram

### Answer: A

Explanation:

The diagram presented is best described as a Business Capability Map. Here's a detailed explanation:

\* Business Capability Map:

\* Definition: A Business Capability Map represents the various capabilities an organization requires to deliver its products and services and achieve its strategic objectives. It typically categorizes capabilities into different levels or tiers, such as strategic, core, and supporting capabilities.

\* Diagram Analysis:

\* Layers and Groupings: The diagram shows capabilities grouped into three categories: Strategic, Core, and Supporting. Each group lists specific business capabilities necessary for the organization's functioning.

\* Color Coding: The use of different colors (green, red, yellow, purple) may indicate various aspects such as priority, status, or different business units. However, the primary purpose is to visually represent and categorize capabilities.

\* TOGAF References:

\* Phase B: Business Architecture: In this phase, creating a Business Capability Map is a crucial activity. It helps in understanding the business functions and aligning them with strategic goals.

\* Capability-Based Planning: TOGAF promotes capability-based planning, which involves identifying, mapping, and analyzing business capabilities to ensure they support the overall strategy and objectives.

\* Purpose and Benefits:

\* Strategic Alignment: The Business Capability Map helps in aligning business capabilities with the strategic objectives of the

organization. It provides a clear view of what the organization needs to do to achieve its goals.

\* Gap Analysis: It is useful for conducting gap analysis by comparing current capabilities with the desired state, helping to identify areas for improvement.

\* Resource Allocation: By understanding the different capabilities, organizations can allocate resources more effectively to areas that need development or enhancement.

In summary, the diagram is best described as a Business Capability Map because it visually represents and categorizes the various capabilities needed by the organization into strategic, core, and supporting layers, aligning them with the business strategy and objectives.

## NEW QUESTION # 71

What component of the Architecture Repository is an architectural representation of SBBs supporting the Architecture Landscape?

- A. Solutions Continuum
- B. **Solutions Landscape**
- C. Solutions Library
- D. Solutions Repository

**Answer: B**

Explanation:

The TOGAF Architecture Repository is a key resource for managing architectural artifacts and information. It's structured to hold different types of architectural assets, and the Solutions Landscape plays a specific role within it.

Here's why option C is correct:

**Solutions Landscape Definition:** This component of the repository specifically houses the Solution Building Blocks (SBBs). SBBs are reusable components that represent a specific function or capability. They can be combined and configured to deliver solutions that meet business needs.

**Supporting the Architecture Landscape:** The Architecture Landscape provides a broad view of the organization's architecture at specific points in time. The Solutions Landscape supports this by showing how SBBs are deployed or planned to realize the architectures defined in the Architecture Landscape.

**Visual Representation:** The Solutions Landscape offers a visual representation of the relationships between SBBs and how they contribute to the overall architecture. This helps stakeholders understand the implementation of the architecture.

## NEW QUESTION # 72

.....
