Salesforce Certified Platform App Builder Sample Questions (Q35-Q40):

NEW QUESTION # 35

A Cloud Kicks employee submitted an opportunity for approval by their manager. What will happen if the employee attempts to edit the description field after submission?

- **A. User will be presented with a 'Record Lock' notification.**
- B. User will be able to edit the name, but unable to edit the description.
- C. User will see the record is now owned by their manager.
- D. User will be able to edit the description field only.

Answer: A

Explanation:

When a record is submitted for approval, Salesforce automatically locks it, preventing further edits until it is approved, rejected, or recalled.

* Why A (Record Lock) is correct:Exact Extract:"When a record is submitted for approval, Salesforce automatically locks the record to prevent users from editing it unless they have 'Modify All Data' permission or are designated as an approver." - Salesforce Help | Approval Processes OverviewThus, the user will receive a message indicating that the record is locked and cannot be edited. Why A (Record Lock) is correct:Exact Extract:"When a record is submitted for approval, Salesforce automatically locks the record

to prevent users from editing it unless they have 'Modify All Data' permission or are designated as an approver." - Salesforce Help | Approval Processes Overview
Thus, the user will receive a message indicating that the record is locked and cannot be edited.

* Why not B or C: Once locked, no field (including Description) is editable by the submitter.

* Why not D: Ownership does not change upon approval submission.

NEW QUESTION # 37

Universal Containers wants to display the real-time stock price for each Account on the Account record page.

How should an app builder implement this request?

- A. Use a scheduled Apex job.
- B. Build a Flow that uses API calls.
- C. Create a Lightning Web Component.
- D. Install a solution from the AppExchange.

Answer: D

NEW QUESTION # 38

What are two capabilities of Schema Builder? Choose 2 answers

- A. Editing custom settings
- B. Viewing page layouts in a new window
- C. Showing selected objects on a page
- D. Creating a new record type

Answer: A,C

Explanation:

Schema Builder is a tool that allows app builders to view and modify the data model of their Salesforce org.

Some of the capabilities of Schema Builder are:

- * Creating and editing custom objects and fields
- * Creating and editing relationships between objects
- * Showing selected objects on a page
- * Editing custom settings

Schema Builder cannot be used to create a new record type or view page layouts in a new window.

NEW QUESTION # 39

At UVC, the Account object has a MD relationship with an Invoice custom object. The app builder would like to change this to a
