

EAPA_2025최신버전시험자료 & EAPA_2025최신인증 시험대비자료

참고: DumpTOP에서 Google Drive로 공유하는 무료 2025 Esri EAPA_2025 시험 문제집이 있습니다:
<https://drive.google.com/open?id=1rqdy0av0z8xHWOq7jjJlglphAabsbuCm>

여러분이 다른 사이트에서도 Esri인증 EAPA_2025 시험 관련덤프자료를 보셨을 것입니다 하지만 우리 DumpTOP의 자료만의 최고의 전문가들이 만들어낸 제일 전면적이고 또 최신 업데이트일 것입니다. 우리덤프의 문제와 답으로 여러분은 꼭 한번에 Esri인증 EAPA_2025 시험을 패스하실 수 있습니다.

Esri EAPA_2025 시험요강:

주제	소개
주제 1	<ul style="list-style-type: none"> Core Payroll Concepts: This section of the exam measures skills of Payroll Specialists and covers the fundamental principles of payroll operations. It focuses on worker classification, compliance with the Fair Labor Standards Act, employment tax handling, and management of employee benefits. Candidates must understand employee and employer forms, professional responsibility in payroll management, and methods and timing of employee compensation to ensure accurate and lawful payment practices.
주제 2	<ul style="list-style-type: none"> Compliance, Research, and Resources: This section of the exam measures the skills of Payroll Compliance Officers and covers the legal and regulatory framework governing payroll processes. It includes escheatment, legislative updates, and regulatory reporting requirements, along with proper record retention and penalty management. Candidates are also expected to understand multi-state taxation, reciprocity rules, and global payroll considerations while efficiently researching and applying compliance resources.
주제 3	<ul style="list-style-type: none"> Payroll Process and Supporting Systems and Administration: This section of the exam measures skills of Payroll Systems Administrators and covers the operational and technical aspects of payroll management. It focuses on maintaining employee master files, understanding payroll system functionalities, and ensuring business continuity through effective technology use. Candidates must also demonstrate knowledge of system upgrades, maintenance, and project implementation within payroll environments.

EAPA_2025최신 인증시험 대비자료 & EAPA_2025최신버전 공부자료

IT업계의 치열한 경쟁속에 살아 남으려면 자신의 능력을 증명하여야 합니다. 국제승인을 받는 IT인증자격증을 많이 취득하시면 취직이든 승진이든 이직이든 모든 면에서 이득을 볼수 있습니다. 최근 Esri인증 EAPA_2025 시험에 도전하는 분이 많은데 DumpTOP에서 Esri인증 EAPA_2025 시험에 대비한 가장 최신버전 덤프공부 가이드를 제공해 드립니다.

최신 Associate Level EAPA_2025 무료 샘플문제 (Q62-Q67):

질문 # 62

A GIS intern is digitizing water body features within a state park using Esri's Imagery basemap for reference. While creating a lake feature, the intern realizes that they mistook a large portion of the lakefront as part of the lake. Which editing tool should the intern use to modify the lake feature?

- A. Align Features
- B. Merge
- C. Reshape

정답: C

설명:

The Reshape tool allows you to modify an existing polygon's shape by drawing a new boundary for part of the feature. This is ideal for correcting over-digitized areas by trimming or extending specific portions of the lake.

* Merge (Option B) combines multiple features but doesn't reshape geometry.

* Align Features (Option C) is used for snapping and aligning edges between features but not for altering individual shapes.

Therefore, the correct answer is A.

-

질문 # 63

A GIS specialist has a street feature class and wants to add curves to show rounded curbs. The specialist wants to specify a fixed radius to make sure that all curbs are similar for the dataset. Which Modify Features tool should the specialist use?

- A. Reshape
- B. Continue Feature
- C. Fillet

정답: C

설명:

The Fillet tool creates a rounded arc (curved corner) between two line segments using a specified radius. This ensures consistency in curb radius across all intersections or turns.

* Reshape (Option A) modifies segments but does not create consistent curves.

* Continue Feature (Option C) adds new segments to existing features but does not round or smooth curves.

Therefore, the correct answer is B.

질문 # 64

A GIS analyst is working with a dataset that contains state information for the entire country of the United States. The analyst needs to run analysis and create maps for only the State of Idaho. The analyst does not want to manage multiple datasets. Which method should the analyst use?

- A. Change symbology to Unique Values > Add only Idaho to Classes
- B. Select Idaho in the map and use Export Features
- C. Create a Definition Query on the layer Where 'State' = "Idaho"

정답: C

설명:

Definition Queries filter the data at the layer level based on SQL expressions without creating new datasets.

This allows the analyst to limit the data being displayed and analyzed to Idaho while continuing to use the full dataset behind the scenes.

* Changing symbology (Option A) changes display but does not filter the data for analysis.

* Export Features (Option C) creates a separate dataset, which the analyst wants to avoid.

Therefore, the correct answer is B.

질문 # 65

A GIS technician wants to share one layer from their map as a feature service to a portal. Which workflow should the technician use to accomplish this task?

- A. Right-click the layer > Sharing > Share As Web Layer
- B. Right-click the layer > Sharing > Share As Layer Package
- C. Click the Share tab > Web Layer > Publish Web Layer

정답: A

설명:

Right-clicking the specific layer and selecting "Share As Web Layer" allows the technician to directly publish that individual layer as a feature service to a portal. This avoids sharing the entire map or unrelated layers.

* Share tab > Web Layer (Option A) is used for sharing multiple layers but is less direct for single-layer publishing.

* Layer Package (Option B) creates a package for sharing offline, not a web feature service.

Therefore, the correct answer is C.

질문 # 66

A GIS analyst has an electrical line feature class that contains attributes such as wire gauge and amperage. The analyst wants to limit acceptable values during the editing process for amperage based on the choice of wire gauge. Which type of attribute rule should be used?

- A. Calculation rule
- B. Validation rule
- C. Constraint rule

정답: C

설명:

Constraint rules prevent invalid data entry during editing. In this case, a constraint rule ensures that only valid amperage values are allowed based on the chosen wire gauge. If an invalid amperage is entered, the rule will block the edit and display an error message.

* Calculation rule (Option A) automatically calculates values but doesn't prevent invalid inputs.

* Validation rule (Option B) flags invalid data but doesn't prevent edits from being saved.

Therefore, the correct answer is B.

-

질문 # 67

.....

DumpTOP 는 전문적으로 Esri전문인사들에게 도움을 드리는 사이트입니다. 많은 분들의 반응과 리뷰를 보면 우리 DumpTOP의 EAPA_2025제품이 제일 안전하고 최신이라고 합니다. DumpTOP의 학습가이드는 아주 믿음이 가는 문제집들만 있으니까요. DumpTOP 덤프의 문제와 답은 모두 제일 정확합니다. 왜냐면 우리의 전문가들은 매일 최신 버전을 갱신하고 있기 때문입니다.
