Many experts and professors consist of our design team, you do not need to be worried about the high quality of our C-CPI-2506 Test Torrent. If you decide to buy our study materials, you will have the opportunity to enjoy the best service.

SAP C-CPI-2506 Exam Syllabus Topics:

Topic	Details
Topic 1	• Implementing Cloud Integration: This section of the exam measures the skills of Integration Consultants and examines how cloud integration flows are designed and deployed. It emphasizes creating integration scenarios, handling connectivity, and applying best practices to build efficient, secure, and reliable integration processes in SAP's cloud environment.
Topic 2	• Managing APIs: This section of the exam measures the skills of Solution Architects and focuses on managing APIs within the SAP ecosystem. It covers topics such as API provisioning, lifecycle management, security policies, and monitoring, ensuring candidates can handle APIs effectively for enterprise integration needs.

Topic 3	• SAP Integration Suite Overview: This section of the exam measures the skills of Integration Consultants and covers the foundational concepts of the SAP Integration Suite. It provides an understanding of the suite's capabilities, its role in connecting applications, and its relevance in modern cloud-based integration scenarios.
Topic 4	• SAP Event Mesh: This section of the exam measures the skills of Solution Architects and centers on using SAP Event Mesh to support event-driven integration. It highlights the importance of asynchronous communication, event publishing, and subscription models, allowing organizations to build scalable and decoupled systems.

SAP Certified Associate - Integration Developer Sample Questions (Q40-Q45):

NEW QUESTION # 40
Which functionalities are used by OData?

- A. TCP. AtomPub, and JSON
- B. SOAP, AtomPub, and JSON
- C. HTTP. AtomPub, and JSON

Answer: C

Explanation:
OData uses HTTP, AtomPub, and JSON as its core functionalities. OData is an open protocol that allows the creation and consumption of queryable and interoperable RESTful APIs in a simple and standard way. OData builds on HTTP as the application protocol for transferring data between clients and servers. OData uses AtomPub as one of the formats for representing data feeds and entries in XML. OData also uses JSON as another format for representing data feeds and entries in a lightweight and human-readable way. Reference: Introducing OData - SAP Learning, OData Overview | OData - The Best Way to REST

NEW QUESTION # 41
You configured a content modifier as follows: Action: Create | Name: ProductID | Source Type: XPath Source Value: //ProductID | Data Type: java.lang.string. After testing the content modifier, you receive an error message that contains the following fragment: "Java.lang.ClassNotFoundException: java.lang.string..." What caused the error message?

- A. Incorrect data type
- B. Incorrect name
- C. Incorrect source value
- D. Incorrect source type

Answer: A

Explanation:
In SAP Cloud Integration, when defining Content Modifier properties, the Java data type names are case-sensitive.
Correct type # java.lang.String
In the configuration, java.lang.string was used (lowercase "s"), which causes a ClassNotFoundException, since Java cannot find the class.
Other options are correct in form:
Source Type = XPath # Valid.
Source Value = //ProductID # Valid XPath.
Name = ProductID # Valid.
Thus, the error occurred because of incorrect data type specification.

NEW QUESTION # 42
What does an API consumer do?

- A. It provides the server-side implementation of an interface.

- B. It invokes an interface.
- C. It provides an interface.

Answer: B

Explanation:
An API consumer is an application or system that invokes an interface provided by an API provider. An API consumer uses the interface to access or manipulate data or functionality exposed by the API provider. An API consumer can be a web browser, a mobile app, a cloud service, or any other client that can send requests and receive responses from an API provider. Reference: Integration Software | SAP Integration Suite, Modernize Integration with SAP Integration Suite | openSAP

NEW QUESTION # 43
You are creating an API in the API management capability within SAP Integration Suite using Edit in API Designer. What is the next step to consolidate the resources?

- A. Generate the microservices.
- B. Generate the server stubs
- C. Generate the database tables.
- D. Generate the client stubs

Answer: B

Explanation:
After creating an API in the API management capability within SAP Integration Suite using Edit in API Designer, the next step to consolidate the resources is to generate the server stubs. Server stubs are code snippets that implement the API operations on a server-side application. They can be generated in different languages and frameworks, such as Java, Node.js, Python, or Spring Boot. Generating server stubs can help you to quickly prototype and test your API functionality without writing much code. Reference: Create an API Using the API Designer | SAP Help Portal, Generate Server Stubs | SAP Tutorials

NEW QUESTION # 44
What are some advantages of creating an OData interface through an API provider?Note: There are 2 correct answers to this question.

- A. Automatic creation of a RAML specification
- B. Automatic creation of a Swagger UI
- C. Automatic creation of an openAPI specification
- D. Automatic creation of a WSDL specification

Answer: B,C

Explanation:
When an OData service is created through an API Provider in SAP API Management:
The system can automatically generate an OpenAPI specification from the OData service.
A Swagger UI is automatically created to enable interactive testing and documentation.
Other options:
WSDL specification # Used for SOAP-based services, not OData.
RAML specification # Supported, but not auto-generated by SAP API Management for OData services.
Hence, the correct advantages are:
Swagger UI generation

NEW QUESTION # 45
......

If you master our C-CPI-2506 quiz torrent and pass the exam it proves that you have excellent working abilities and can be suitable for a good job. You will earn a high salary in a short time.
