

H12-891_V1.0 Valid Test Tutorial & Download H12-891_V1.0 Pdf

P.S. Free 2025 Huawei H12-891_V1.0 dumps are available on Google Drive shared by SureTorrent:
<https://drive.google.com/open?id=1ZqG9zNizqOqyJmuf5xlNUiKpEvdb04I>

In this Desktop-based Huawei H12-891_V1.0 practice exam software, you will enjoy the opportunity to self-exam your preparation. The chance to customize the Huawei H12-891_V1.0 practice exams according to the time and types of HCIE-Datacom V1.0 (H12-891_V1.0) practice test questions will contribute to your ease. This format operates only on Windows-based devices. But what is helpful is that it functions without an active internet connection. It copies the exact pattern and style of the real HCIE-Datacom V1.0 (H12-891_V1.0) exam to make your preparation productive and relevant.

To become HCIE-Datacom V1.0 certified, candidates must have a minimum of five years of experience in network design and implementation, as well as hands-on experience with Huawei data communication products. HCIE-Datacom V1.0 certification exam consists of a written exam and a lab exam, both of which must be passed to earn the certification.

Download H12-891_V1.0 Pdf & H12-891_V1.0 Latest Test Bootcamp

Our H12-891_V1.0 study question is compiled and verified by the first-rate experts in the industry domestically and they are linked closely with the real exam. Our test bank provides all the questions which may appear in the real exam and all the important information about the exam. You can use the practice test software to test whether you have mastered the H12-891_V1.0 Test Practice materials and the function of stimulating the exam to be familiar with the real exam's pace. So our H12-891_V1.0 exam questions are real-exam-based and convenient for the clients to prepare for the H12-891_V1.0 exam.

Huawei HCIE-Datacom V1.0 Sample Questions (Q108-Q113):

NEW QUESTION # 108

Which of the following types of LSAs does OSPF use to support SR-MPLS?

- A. Type 1 Router LSA
- B. Type 2 Network LSA
- C. Type 10 Opaque LSA
- D. Type 7 NSSA External LSA

Answer: C

Explanation:

Comprehensive and Detailed In-Depth Explanation:

To support SR-MPLS (Segment Routing over MPLS), OSPF uses Type 10 Opaque LSA to advertise Segment Routing (SR) capabilities and information.

Type 10 Opaque LSA (B): Used for distributing application-specific information within an OSPF area. In SR-MPLS, it carries the SID/Label mappings and other SR-related information.

Type 7 NSSA External LSA (A): Used to advertise external routes within an NSSA, not related to SR-MPLS.

Type 1 Router LSA (C): Advertises the router's interfaces and links but does not carry SR-specific information.

Type 2 Network LSA (D): Advertises the links of a broadcast or NBMA network, not used for SR-MPLS.

Therefore, the correct answer is B (Type 10 Opaque LSA), as it enables the advertisement of SR information.

NEW QUESTION # 109

The telemetry network model is broadly and narrowly defined. Which of the following modules are involved in telemetry in a narrow sense (device-side telemetry)?

- A. Data push
- B. Data generation
- C. Data source
- D. Data subscription

Answer: A,B,C

Explanation:

Comprehensive and Detailed In-Depth Explanation:

Telemetry in a narrow sense refers specifically to the device-side telemetry process, which includes the following key modules:

Data generation (A): The device collects and generates telemetry data, such as performance metrics or operational statistics.

Data push (B): The device actively pushes the collected data to the configured destination (such as a collector or management system) using a data streaming protocol.

Data source (C): The entity on the device that generates or provides the monitored data.

Data subscription (D) is not part of the device-side telemetry; it is related to the management system side, where users subscribe to specific telemetry data streams.

Therefore, the correct answers are A, B, C.

NEW QUESTION # 110

As shown in the figure, an engineer uses four routers to test the interoperability of branch networks, where R1, R2, and R3 in branch 1 deploy OSPF Network interoperability is implemented, and R, R3, R4 in Branch 2 is deployed is-IS to achieve network interoperability. Now that the engineer wants to implement R1 access to R4's loopback address, which of the following actions will meet this requirement?

- A. Publish the default route only in the IS-IS process of R2
- B. No configuration is required
- C. In the OSPF process of R2 and the IS-IS process, the default routes are published separately
- D. Publish default routes only in the OSPF process for R2

Answer: C,D

NEW QUESTION # 111

If we have a VPN instance configured on a router, if we need to view the VPN route on a Huawei router, which of the following commands should we use?

- A. display ip routing-table vpn-instance vpn-instance-name
- B. display ip vpn-instance
- C. display ip routing-table
- D. display vpn routing-table

Answer: A

NEW QUESTION # 112

About multi-instance CE (Multi-VPN-Instance CE, MCE). What is the error described below?

- A. On the MCE device, you need to create their own routing tables for different VPNs and bind to the corresponding interface
- B. The MCE vs. PE direction must have multiple physical links to achieve isolation between different VPN instances
- C. Users who connect to the same MCE but are not part of a VPN instance cannot access each other
- D. MCE-enabled devices can access multiple VPI instances in BGP/RPLS IPVPN applications, reducing user network equipment investment

Answer: B

NEW QUESTION # 113

.....

Selecting SureTorrent can 100% help you pass the exam. According to Huawei H12-891_V1.0 test subjects' changing, we will continue to update our training materials and will provide the latest exam content. SureTorrent can provide a free 24-hour online customer service for you. If you do not pass Huawei Certification H12-891_V1.0 Exam, we will full refund to you.
