

Test HQT-4160 Voucher, HQT-4160 Free Brain Dumps

Exam Type
Qualification

Format
Proctored, closed book exam

Credential
Hitachi Vantara Qualified Professional - VSP 5000 Series Installation

Validity 3 years

Delivery
Korston Webassessor System*

Questions 35

Passing Score 65%

Duration 60 minutes

Cost
US \$100 or equivalent in local currency (plus local tax, depending on location)

Supporting Material
• 1090PI - Installing and Configuring the Hitachi VSP 5000 Series (5 day-ILT)

This test is designed for Hitachi Vantara employees and partners who install Hitachi Virtual Storage Platform (VSP) 5000 series systems. The test will validate that the successful candidate has knowledge and skills in installing, configuring and supporting VSP 5000 series systems at customer sites. This includes strong knowledge of the systems' hardware and associated program products, thorough understanding of installation and configuration procedures, and associated support activities. This test covers Hitachi Virtual Storage Platform models VSP 5100(H), VSP 5500(H), VSP 5200(H) and VSP 5600(H).

Audience: Hitachi Vantara Employee and Partner Installation Professionals

Hitachi VSP 5000 series installation professionals should have strong knowledge and skills in installing and supporting storage systems deployed as part of VSP 5000 series solutions implementation. They perform pre-installation checks and install, configure and test the systems so they can be handed over in an operational state to customers. They also provide post-installation services, including support, maintenance, updates and upgrades, and have knowledge of problem-determination and incident-resolution procedures, tools and techniques.

Test Objectives	
Section 1 System Architecture	
1.1	Describe the different VSP 5000 models and their specifications.
1.2	Describe the VSP 5000 systems architecture, their components and their functions.
1.3	Describe the front-end design and layout of VSP 5000 systems and the supported Channel Boards (CHBs).
1.4	Describe the back-end design and layout of VSP 5000 systems and the supported Disk Adapters (DKAs).
Section 2 System Pre-Installation and Installation	
2.1	Describe the VSP 5000 storage systems pre-installation procedures and documentation.
2.2	Describe the VSP 5000 disk controllers (DKCs) interconnections.
2.3	Describe the "New Installation" procedure for VSP 5000 storage systems and when it is appropriate to use.
2.4	Describe the VSP 5000 storage systems network settings.
2.5	Describe the VSP 5000 storage microcode upgrade procedures.
Section 3 System Configuration	
3.1	Describe the key steps involved in the installation of VSP 5000 storage systems.
3.2	Describe how to create Parity Groups on VSP 5000 storage systems.

* Depending on the location and course delivery format, this closed-book, proctored qualification test may also be offered and administered by the instructor at the conclusion of the supporting course.

P.S. Free & New HQT-4160 dumps are available on Google Drive shared by BraindumpsIT: <https://drive.google.com/open?id=1EjHPjufm-vjBfnwRIM-z4IyM8n-4M1O>

The majority of people encounter the issue of finding extraordinary Hitachi HQT-4160 exam dumps that can help them prepare for the actual Hitachi Vantara Qualified Professional - VSP 5000 Series Installation exam. They strive to locate authentic and up-to-date Hitachi HQT-4160 Practice Questions for the Hitachi HQT-4160 exam, which is a tough ask.

Hitachi HQT-4160 certification exam is a comprehensive exam that covers all aspects of the Hitachi Vantara VSP 5000 series installation process. HQT-4160 exam tests the candidate's knowledge of the VSP 5000 storage system architecture, the installation and configuration process, and troubleshooting techniques. By passing HQT-4160 Exam, IT professionals can demonstrate their expertise in Hitachi Vantara storage systems and can help their organizations deploy and manage the VSP 5000 series storage system more effectively.

Pass Guaranteed Quiz 2026 HQT-4160: Perfect Test Hitachi Vantara Qualified Professional - VSP 5000 Series Installation Voucher

You must be attracted by the APP online version of our HQT-4160 exam questions, which is unlike other exam materials that are available on the market, study torrent specially proposed different version to allow you to learn not on paper, but to use on all kinds of electronic devices such as IPAD, mobile phones or laptop to learn. This greatly improves the students' availability of fragmented time. You can also have a quite enjoyable experience with APP online version of our HQT-4160 Study Materials. Just have a try on

this version of our HQT-4160 learning guide!

The Hitachi Vantara Qualified Professional - VSP 5000 Series Installation certification exam comprises a combination of theoretical and practical knowledge assessments. HQT-4160 exam is computer-based and proctored. The candidates have 90 minutes to complete the exam and answer 60 questions. HQT-4160 exam is available in English and Japanese languages. Hitachi Vantara Qualified Professional - VSP 5000 Series Installation certification remains valid for two years after the date of issuance, and candidates must renew their certification to retain their Hitachi Vantara Qualified Professional status. Candidates can take HQT-4160 exam at any authorized Hitachi Vantara testing center. In summary, the Hitachi HQT-4160 Certification Exam is globally recognized and designed to validate the candidates' ability to install and configure the Hitachi Vantara VSP 5000 series products.

Hitachi HQT-4160: Hitachi Vantara Qualified Professional - VSP 5000 Series Installation exam is a great way for professionals to demonstrate their skills and knowledge in the storage and data management industry. HQT-4160 exam is designed to be challenging and requires candidates to have a good understanding of the subject matter. Passing HQT-4160 exam is a great way for professionals to enhance their career prospects and to demonstrate their commitment to their profession.

Hitachi Vantara Qualified Professional - VSP 5000 Series Installation Sample Questions (Q47-Q52):

NEW QUESTION # 47

What are the components involved in setting up a VSP 5000 system configuration? (Choose Two)

- A. User interfaces
- **B. Parity Groups**
- **C. Management software**
- D. Power units

Answer: B,C

Explanation:

When configuring a Hitachi VSP 5000 storage system, two key components are critical:

Parity Groups (A)

These are RAID-based groups of disks that store data and parity information.

They define how data is distributed and protected across physical drives.

Essential for creating storage pools and volumes for hosts.

Management Software (D)

Provides the interface to configure, monitor, and manage storage resources.

Tasks include:

Creating volumes/LUNs

Assigning storage to hosts

Monitoring health and performance

Managing replication and backups

NEW QUESTION # 48

What distinguishes the back-end design of VSP 5000 systems from traditional storage systems?

- **A. The use of Disk Adapters (DKAs) for enhanced data management**
- B. The use of solid-state drives only
- C. The direct connection to cloud storage
- D. The absence of any physical drives

Answer: A

Explanation:

In the Hitachi VSP 5000 storage system:

Disk Adapters (DKAs) are specialized components that manage communication between the storage controllers and physical disks.

DKAs provide:

Efficient I/O routing

Support for multiple disk types (SSD, SAS, etc.)

RAID management and data distribution

High performance and reliability compared to traditional storage systems that rely on simpler disk controllers.

This back-end architecture allows the VSP 5000 to handle large-scale, high-speed enterprise workloads while maintaining data protection and flexibility.

NEW QUESTION # 49

Which two part replacements in a VSP 5000 system require blocking the controller? (Choose two.)

- A. Hitachi Interconnect Edge (HIE)
- B. Cache DIMM
- C. Controller PCB
- D. Cache Flash Module (CFM)

Answer: B,C

Explanation:

Controller PCB

Replacing the Controller PCB requires blocking the controller to ensure system integrity and prevent data loss during the hardware change.

Cache DIMM

Cache DIMMs are part of the controller's critical memory subsystem, so the controller must be blocked before replacing any cache DIMMs to avoid corruption and ensure a safe replacement process.

NEW QUESTION # 50

How many IP addresses should you configure to integrate a VSP 5000 series storage system on the customer public network?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

Explanation:

To integrate a VSP 5000 series storage system into the customer public network, you should configure two IP addresses - one for each Service Processor (SVP) to provide redundancy and ensure high availability for management access.

NEW QUESTION # 51

During the parts-replacement process on a VSP 5000 storage system, what is the recommended action before removing any component?

- A. Ensuring the system is in maintenance mode
- B. Notifying all connected users about the impending downtime
- C. Isolating the power supply to the specific component
- D. Documenting the serial number of the component

Answer: A

Explanation:

Before replacing any component in a Hitachi VSP 5000 storage system, it is critical to put the system or the affected controller/module into maintenance mode.

This ensures:

No active I/O is directed to the component being replaced.

Data integrity is preserved during the removal and replacement process.

The system prevents accidental disruptions to other parts of the storage array.

Automatic failover or rebuild processes do not interfere with the replacement.

NEW QUESTION # 52
