

Free PDF Updated C_ADBTP_2601 - Valid Administrating SAP Business Technology Platform(C_ADBTP_2601) Exam Cram

A full SAP C_ADBTP_2601 package is required to take each Success in Life. If you want to be successful, you need to prepare well for the Administrating SAP Business Technology Platform(C_ADBTP_2601) C_ADBTP_2601 exam. Buying the right SAP C_ADBTP_2601 Exam Preparation Materials is one way to prepare for it. With the right study tools, you can easily prepare for the Administrating SAP Business Technology Platform(C_ADBTP_2601). Whether you want to study SAP C_ADBTP_2601 Exam or pass other Administrating SAP Business Technology Platform(C_ADBTP_2601) exam, if you want to prepare for SAP C_ADBTP_2601 exam, you can choose SAP C_ADBTP_2601 Valid Exam Questions exam.

Continuous improvement is a good thing. If you keep making progress and transcending yourself, you will harvest happiness and growth. The goal of our C_ADBTP_2601 latest exam guide is prompting you to challenge your limitations. People always complain that they do nothing perfectly. As long as you submit your email address and apply for our free trials, we will soon send the free demo of the C_ADBTP_2601 training practice to your mailbox. If you are uncertain which one suit you best, you can ask for different kinds free trials of C_ADBTP_2601 latest exam guide in the meantime. After deliberate consideration, you can pick one kind of study materials from our websites and prepare the exam.

>> Valid C_ADBTP_2601 Exam Cram <<

Get Certified on the First Attempt with SAP C_ADBTP_2601 Exam Dumps

As a famous brand in this field, we have engaged for over ten years to offer you actual C_ADBTP_2601 exam questions as your exams preparation. Our company highly recommends you to try the free demo of our C_ADBTP_2601 study material and test its quality feature before purchase. You can find the three demos easily on our website. And you may find out that they are accordingly corresponding to our three versions of the C_ADBTP_2601 learning braindumps. Once you click on them, then you can experience them at once.

SAP Administrating SAP Business Technology Platform(C_ADBTP_2601) Sample Questions (Q10-Q15):

NEW QUESTION # 10

SIMULATION

Enable a Cloud Foundry Environment

Add a service plan for Cloud Foundry environment and enable it in a subaccount.

Task 1: Add a Service Plan for Cloud Foundry Environment

In your SAP BTP cockpit, in your EU HCM Dev subaccount, entitle one MEMORY service plan for the Cloud Foundry Runtime.

Answer:

Explanation:

See the Explanation below for complete solution.

Explanation:

Before you start

Log in to SAP BTP Cockpit.

Open your correct Global Account.

Go to the Human Resources directory.

Open the EU HCM Dev subaccount.

This matters because the runtime memory quota must be assigned to the EU HCM Dev subaccount specifically. SAP documents that the MEMORY plan is the quota-bearing plan for Cloud Foundry Runtime.

Step 1 - Open the EU HCM Dev subaccount

In the cockpit, choose Directories.

Open Human Resources.

Select EU HCM Dev.

You should now be on the EU HCM Dev subaccount page.

Step 2 - Open Entitlements

In EU HCM Dev, choose Entitlements.

SAP Help confirms that service plans and quota assignments for a subaccount are configured in the Entitlements area.

Step 3 - Configure entitlements

Click Configure Entitlements or Add Service Plans.

Search for:

Cloud Foundry Runtime

In SAP Help, this appears as Cloud Foundry Runtime (APPLICATION_RUNTIME), and the relevant plan for assigning runtime memory is MEMORY.

Step 4 - Select the MEMORY plan

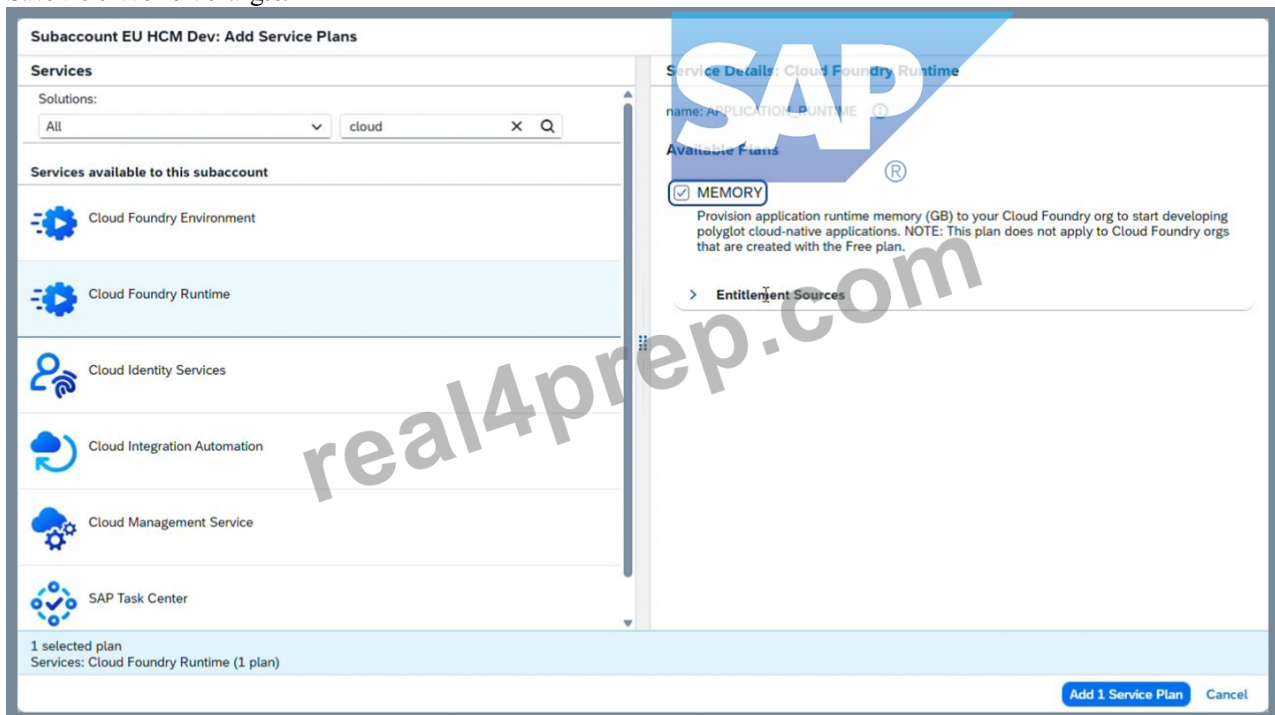

Under Cloud Foundry Runtime, select:

MEMORY

Set the quantity to 1 if the cockpit shows an amount/quota field.

Add the plan to the subaccount.

Save the entitlement changes.

SAP documents that the MEMORY plan is specifically used to assign runtime memory quota to the subaccount, and that 1 unit corresponds to 1 GB of runtime memory when quota is adjusted or assigned.

Step 5 - Verify the result

After saving, check the Entitlements page of EU HCM Dev.

You should see:

Cloud Foundry Runtime

plan: MEMORY

quantity: 1 if shown

Final expected result

Inside EU HCM Dev:

Cloud Foundry Runtime is entitled

the service plan is MEMORY

the assigned amount is 1 if the cockpit displays quantity/quota units

Common mistakes to avoid

Doing this in the wrong subaccount; it must be EU HCM Dev

Choosing the wrong Cloud Foundry plan; the task asks for MEMORY

Forgetting to save the entitlement change after adding the plan

Confusing the runtime memory entitlement with the later step of actually enabling the Cloud Foundry environment; SAP distinguishes the MEMORY runtime quota from enabling the Cloud Foundry org itself.

NEW QUESTION # 11

SIMULATION

Task 2: Create Subaccounts in a Directory

In the Partner directory, create the subaccount AM PA Dev Test (Description: Partner Development and Testing) with subdomain btpops#####-am-pa-dev-test in the region Microsoft Azure → US West (WA) cf-us20.

In the Partner directory, create the subaccount AM PA Prod (Description: Partner Production) with subdomain btpops#####-am-pa-prod using AM PA Dev Test as source subaccount. Set the subaccount as used in production.

Answer:

Explanation:

See the Explanation below for complete solution.

Explanation:

Task 2 - Create Subaccounts in a Directory

You must create these two subaccounts inside the Partner directory:

AM PA Dev Test

AM PA Prod

Important:

Replace ##### with your global account number

Enter all names and subdomains exactly

Be careful with hyphens and spaces

AM PA Prod must be marked as used in production

Before You Start

Log in to SAP BTP Cockpit.

Open your correct Global Account.

Go to Directories.

Open the Partner directory.

Why this matters:

Both subaccounts in this task must be created inside the Partner directory. If you create them under the global account or another directory, the task will be wrong.

Step 1 - Open the Partner Directory

What to do

In the left menu, click Directories.

In the directory list, select Partner.

Explanation:

The Partner directory is the container where both required subaccounts must be created.

What to verify

You should now be inside the Partner directory page.

Step 2 - Start Creating the First Subaccount

What to do

Inside the Partner directory, go to Subaccounts.

Click Create → Subaccount.

Explanation:

This opens the subaccount creation screen.

What to verify

You should now see the form for creating a new subaccount.

Step 3 - Enter Data for AM PA Dev Test

What to do

Enter the following values:

Display Name / Name: AM PA Dev Test

Description: Partner Development and Testing

Subdomain: btpops####-am-pa-dev-test
 Then choose the region:
 Cloud Provider: Microsoft Azure
 Region: US West (WA)
 Environment / Technical Region: cf-us20
 After checking all values, click Create.

Create Subaccount

Display Name* Description

Region*

Subdomain* Parent*

> **Advanced**

Cockpit supports multi-level directories in your account structure. You can add your new subaccount directly to the root global account or to an existing directory by choosing the location under Parent.

Explanation:
 This creates the development and testing subaccount for the Partner directory.
 The important points are:
 the subaccount name must match exactly
 the subdomain must include your account number in place of #####
 the region must be Microsoft Azure → US West (WA) cf-us20

What to verify
 After creation, you should see the new subaccount:
 AM PA Dev Test
 inside the Partner directory.

Step 4 - Confirm the First Subaccount Exists
 What to do
 Check the subaccounts list under Partner.

Explanation:
 Before creating the production subaccount, confirm that AM PA Dev Test was created successfully, because it will be used as the source subaccount for the next step.

What to verify
 You should see:
 AM PA Dev Test
 If it is not there, do not continue until it is created correctly.

Name	Type	Environment	Provider	Region	Changed On
BT Admin Certification - xxxx	Global Account				March 25, 2024, 5:11:2...
Americas	Directory				March 26, 2024, 3:27:5...
AM PA Dev Test	Subaccount	Multi-Environment	Microsoft Azure	US West (WA)	March 26, 2024, 3:30:3...

Step 5 - Start Creating the Second Subaccount

What to do
 Still inside the Partner directory, click Create → Subaccount again.

Explanation:
 This opens a new subaccount creation form for the production subaccount.

Step 6 - Enter Data for AM PA Prod

What to do

Enter the following values:

Display Name / Name: AM PA Prod

Description: Partner Production

Subdomain: btpops#####-am-pa-prod

Then set:

Source Subaccount: AM PA Dev Test

Enable the production setting:

Used in Production: Yes

Then click Create.

Create Subaccount

Display Name *
AM PA Prod

Description
Partner Production

Region *
US West (WA)

Subdomain *
btpops#####-am-pa-prod

Parent *
Partner

Advanced

Used for production

Enable beta features

Add labels to this subaccount

Name: Enter label name

Values:

Buttons: Create, Cancel

Explanation:

This creates the production subaccount by using AM PA Dev Test as the source subaccount.

Using a source subaccount means SAP BTP copies base settings from the selected source, which helps keep configuration aligned.

The production indicator is mandatory here because this is the production subaccount.

What to verify

After creation, you should see:

AM PA Prod

inside the Partner directory, and it should be marked as a production subaccount.

Final Expected Result for Task 2

Inside the Partner directory, you must have these two subaccounts:

1. AM PA Dev Test

Description: Partner Development and Testing

Subdomain: btpops#####-am-pa-dev-test

Region: Microsoft Azure → US West (WA) cf-us20

2. AM PA Prod

Description: Partner Production

Subdomain: btpops#####-am-pa-prod

Source Subaccount: AM PA Dev Test

Used in Production: Yes

Name	Type	Environment	Provider	Region	Changed On
BTP Admin Certifications	Global Account				March 25, 2026, 5:11:2...
Americas	Directory				March 26, 2026, 3:27:5...
Partner	Directory				March 26, 2026, 3:30:3...
AM PA Dev Test	Multi-Environment	Microsoft Azure		US West (WA)	March 26, 2026, 3:35:3...
AM PA Prod	Multi-Environment	Microsoft Azure		US West (WA)	March 26, 2026, 3:39:3...

Common Mistakes to Avoid

1. Creating the subaccounts in the wrong place

Both subaccounts must be created in:

Partner directory

Not in:

Global Account
Americas
Eurasia
Human Resources

2. Wrong subdomain format

Use exactly:

btpops#####-am-pa-dev-test

btpops#####-am-pa-prod

Replace only ##### with your global account number.

Do not:

remove hyphens

add spaces

misspell dev-test or pa-prod

3. Wrong region for AM PA Dev Test

It must be:

Microsoft Azure

US West (WA)

cf-us20

4. Forgetting the source subaccount for AM PA Prod

You must select:

AM PA Dev Test

as the source subaccount.

5. Forgetting the production flag

For AM PA Prod, make sure:

Used in Production is enabled

NEW QUESTION # 12

SIMULATION

Create a Service Instance in Cloud Foundry

Enable a service instance of the HTML5 Application Repository Service for Cloud Foundry.

Create a Service Instance in a Cloud Foundry Environment

In your SAP BTP cockpit, in the EU HCM Dev subaccount, create the service instance html5-eu-hcm-dev for the HTML5 Application Repository Service with the service plan app-host in the Cloud Foundry space activity-recording

Answer:

Explanation:

See the Explanation below for complete solution.

Explanation:

Before you start

Log in to SAP BTP Cockpit.

Open the correct Global Account.

Go to Directories.

Open Human Resources.

Open the EU HCM Dev subaccount.

This matters because the task must be completed in EU HCM Dev, and the service instance must be created in the specific Cloud Foundry space activity-recording. SAP Help also confirms that the HTML5 Application Repository is used in the Cloud Foundry environment and that the app-host plan is the host service used to store HTML5 application content.

Step 1 - Open the Cloud Foundry space

In EU HCM Dev, go to:

Cloud Foundry

Spaces

Select the space:

activity-recording

SAP Help describes creating Cloud Foundry service instances by first navigating to the subaccount, opening Cloud Foundry Spaces, selecting the target space, and then using that space's Services > Service Instances area.

Step 2 - Open Service Instances in the space

Inside the activity-recording space, go to:

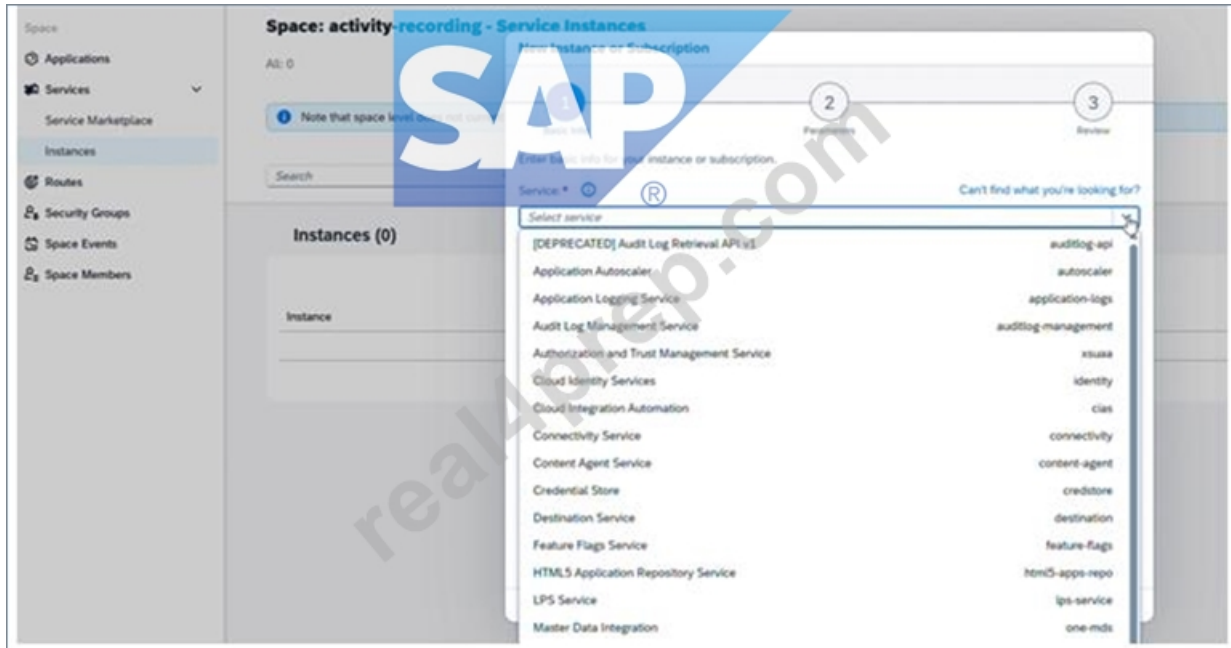

Services

Service Instances

This is the Cloud Foundry-space-level location used for creating service instances in that space.

Step 3 - Start creating the new instance

Click Create.

A wizard opens for the new service instance. SAP Help describes this as the standard cockpit flow for creating service instances in Cloud Foundry spaces.

Step 4 - Choose the required service

In the service selection, choose:

HTML5 Application Repository Service

SAP Help documents the HTML5 Application Repository as the service used for centrally storing HTML5 applications' static content on SAP BTP in the Cloud Foundry environment.

New Instance or Subscription

1 Basic Info
 2 Parameters
 3 Review

Enter basic info for your instance or subscription.

Service: * ⓘ Can't find what you're looking for?

HTML5 Application Repository Service

Plan: *

app-host

Instance Name: * ⓘ

html5-eu-hcm-dev

Next >
Create
Cancel

Step 5 - Choose the required service plan

Select the service plan:

app-host

SAP Help states that the app-host service plan is used to deploy applications to the HTML5 Application Repository.

Step 6 - Enter the instance name

Set the service instance name to:

html5-eu-hcm-dev

Then continue and confirm creation.

SAP Help recommends using a CLI-friendly name for service instances, and the task gives the exact required name.

Space: activity-recording - Service Instances Create | v ☆

All: 1

Note that space level does not currently support label management, instance sharing, or the display of "created by" and "modified by" information.

Search
Service: All
Plan: All
Status: All

Instances (1)

Instance	Service	Plan	Credentials	Status	
html5-eu-hcm-dev	HTML5 Application Repository Service	app-host		Created	⋮ >

Step 7 - Verify the space is correct

Before final confirmation, verify the target Cloud Foundry space is:

activity-recording

This is important because Cloud Foundry service instances are created within a specific space, not only at the subaccount level.

Step 8 - Create and confirm

Click Create or Finish.

Wait for the status to change from in-progress to created.

SAP Help notes that after creation, the instance appears in the service instances table and its status can be checked there.

Final expected result

Inside EU HCM Dev, in Cloud Foundry space activity-recording, you should have a service instance with:

Service: HTML5 Application Repository Service

Plan: app-host

Instance Name: html5-eu-hcm-dev

Common mistakes to avoid

Creating the instance in the wrong subaccount; it must be EU HCM Dev.

Creating it in the wrong Cloud Foundry space; it must be activity-recording.

Choosing the wrong service; use HTML5 Application Repository Service.

Choosing the wrong plan; use app-host. SAP Help specifically links app-host with hosting deployed HTML5 app content.

Typing the wrong instance name; use exactly html5-eu-hcm-dev.

NEW QUESTION # 13

SIMULATION

Enable Service Subscriptions

In the entitlements of a directory, add a service plan for a service subscription. Assign and create this subscription to/in a subaccount of the directory.

Task 1: Entitle a Service in a Directory

In your SAP BTP cockpit, enable entitlement management for your Partner directory.

In your Partner directory, entitle the standard (Application) service plan for the SAP Build Work Zone, standard edition.

Answer:

Explanation:

See the Explanation below for complete solution.

Explanation:

Before You Start

Log in to the SAP BTP Cockpit.

Open the correct Global Account.

Go to Directories.

Open the Partner directory.

Why this matters:

Both actions in this task must be done at the Partner directory level, not directly in a subaccount.

Step 1 - Open the Partner Directory

What to do

In the left navigation, click Directories.

Select Partner.

Explanation:

This opens the directory where you must manage entitlements for this task.

What to verify

You should now be inside the Partner directory page.

Step 2 - Open Entitlements

What to do

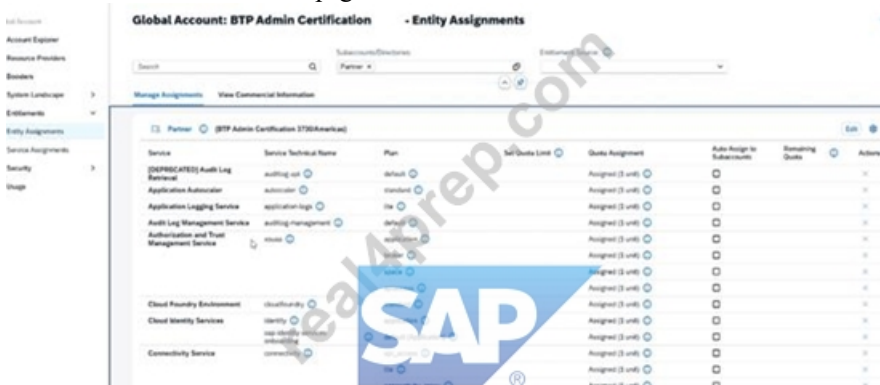

Inside the Partner directory, go to Entitlements.

Explanation:

This is the area where you manage quota and service plan assignments for the directory and its subaccounts.

What to verify

You should see the entitlements page for Partner.

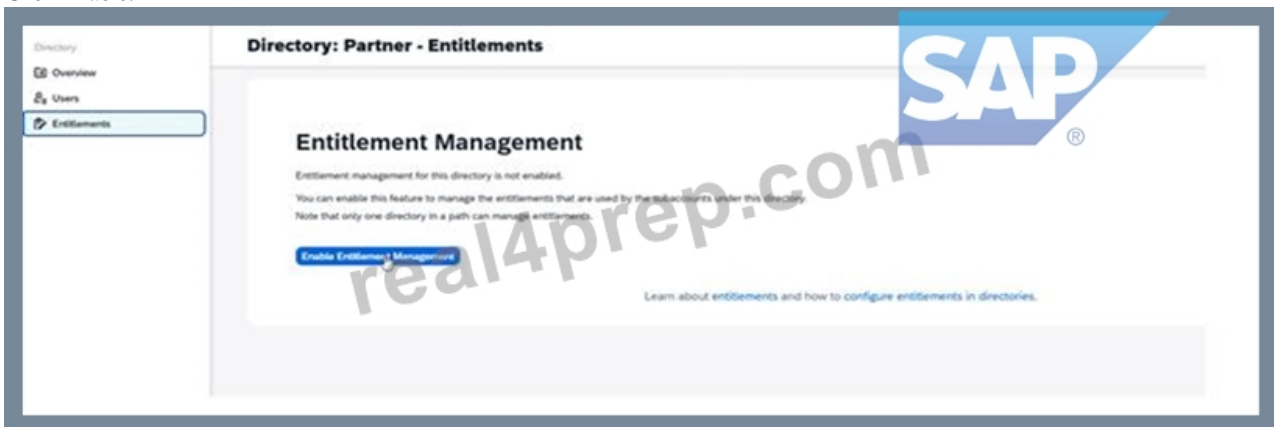

Step 3 - Enable Entitlement Management for the Partner Directory

What to do

In the Entitlements area, look for the option to Enable Entitlement Management.

Click Enable.

Explanation:

A directory must have entitlement management enabled before you can add and manage service plans there.

What to verify

After enabling, the Partner directory should allow entitlement assignment and management.

Step 4 - Start Adding a Service Plan

What to do

In the Entitlements page of the Partner directory, click Configure Entitlements or Add Service Plans.

Select Subaccounts and Directories

Search All ▼

> Entitlement Sources

[Add 1 Service Plan](#) [Cancel](#)

Step 5 - Find the Required Service

What to do

Search for or scroll to:

SAP Build Work Zone, standard edition

Select that service.

Explanation:

You must choose the exact service named in the task. Be careful not to select a different SAP Build service by mistake.

What to verify

The selected service should be:

SAP Build Work Zone, standard edition

Step 6 - Select the Correct Service Plan

What to do

Under the selected service, choose the service plan:

standard (Application)

Add the plan to the entitlement configuration.

Explanation:

This task requires the standard (Application) service plan specifically.

Do not choose another plan if more than one is listed.

What to verify

The selected plan should read exactly:

standard (Application)

Step 7 - Save the Entitlement Changes

What to do

Click Add, Save, or Confirm depending on the screen.

Then click Save for the entitlement configuration.

Explanation:

This commits the new service plan entitlement to the Partner directory.

What to verify

After saving, the entitlements list for Partner should include:

SAP Build Work Zone, standard edition

plan: standard (Application)

Service	Plan	Assigned (1 unit)		
Credential store	crestore	Assigned (1 unit)	<input type="checkbox"/>	<input type="checkbox"/>
Destination Service	destination	Assigned (1 unit)	<input type="checkbox"/>	<input type="checkbox"/>
Feature Flags Service	feature-flags-dashboard	Assigned (1 unit)	<input type="checkbox"/>	<input type="checkbox"/>
	feature-flags	Assigned (1 unit)	<input type="checkbox"/>	<input type="checkbox"/>
HTML5 Application Repository Service	lite	Assigned (1 unit)	<input type="checkbox"/>	<input type="checkbox"/>
	standard	Assigned (1 unit)	<input type="checkbox"/>	<input type="checkbox"/>
Print Service	app-host	Assigned (1 unit)	<input type="checkbox"/>	<input type="checkbox"/>
	app-runtime	Assigned (1 unit)	<input type="checkbox"/>	<input type="checkbox"/>
SaaS Provisioning Service	receiver	Assigned (1 unit)	<input type="checkbox"/>	<input type="checkbox"/>
	application	Assigned (1 unit)	<input type="checkbox"/>	<input type="checkbox"/>
SAP Build Work Zone, standard edition	standard (Application)	Assigned (1 unit)	<input checked="" type="checkbox"/>	<input type="checkbox"/>
	service-operator-access	Assigned (1 unit)	<input type="checkbox"/>	<input type="checkbox"/>
Service Manager	global-offerings-audit	Assigned (1 unit)	<input type="checkbox"/>	<input type="checkbox"/>
	subaccount-audit	Assigned (1 unit)	<input type="checkbox"/>	<input type="checkbox"/>
	subaccount-admin	Assigned (1 unit)	<input type="checkbox"/>	<input type="checkbox"/>
	container	Assigned (1 unit)	<input type="checkbox"/>	<input type="checkbox"/>

Final Expected Result for Task 1

Inside the Partner directory:

Entitlement management is enabled

The service SAP Build Work Zone, standard edition is entitled

The plan standard (Application) is added

Common Mistakes to Avoid

1. Working in the wrong level

Do this in:

Partner directory

Not in:

Global Account

Subaccount

Another directory

2. Forgetting to enable entitlement management first

If entitlement management is not enabled for the directory, you may not be able to add the service plan properly.

3. Choosing the wrong service

Be sure you select:

SAP Build Work Zone, standard edition

Not another SAP Build service.

4. Choosing the wrong plan

You must select:

standard (Application)

NEW QUESTION # 14

.....

In short, we live in an age full of challenges. So we must continually update our knowledge and ability. If you are an ambitious person, our C_ADBTP_2601 exam questions can be your best helper. There are many kinds of C_ADBTP_2601 study materials in the market. You must have no idea to choose which one. It does not matter. Our SAP Certified Associate guide braindumps are the most popular products in the market now. Just buy our C_ADBTP_2601 learning quiz, and you will get all you want.
