あなたはNCP-AI試験資料がいいと思っっていますが、NCP-AI試験資料の合格率を心配しています。ここで言いたいのは心配する必要がないということです。弊社には、NCP-AI試験資料の合格率について、記載があります。合格率が高くて、多くの方はNCP-AI試験に合格しました。また、NCP-AI試験資料について、何か質問がありましたら、弊社とご連絡いただきます。

Nutanix NCP-AI 認定試験の出題範囲：

トピック	出題範囲
トピック 1	<ul style="list-style-type: none">• Troubleshoot a Nutanix Enterprise AI Environment: This domain covers diagnosing and resolving performance issues, resource utilization problems, cluster health check failures, and model import or endpoint creation errors.
トピック 2	<ul style="list-style-type: none">• Configure a Nutanix Enterprise AI Environment: This domain focuses on operational setup including onboarding users, importing large language models, creating and securing API endpoints with keys, and delivering these endpoints to consumers.
トピック 3	<ul style="list-style-type: none">• Connect Applications to a Nutanix Enterprise AI Environment: This domain focuses on configuring and validating application connections to endpoints and monitoring endpoint metrics to track application usage and integration performance.
トピック 4	<ul style="list-style-type: none">• Perform Day 2 Operations: This domain addresses ongoing management including preparing application integration requirements, interpreting and optimizing performance metrics, monitoring access for anomalies, and selecting appropriate LLMs for optimal output.

- Deploy a Nutanix Enterprise AI Environment: This domain covers initial deployment tasks including validating prerequisites, installing Enterprise AI components, and configuring DNS, URLs, and certificates for secure platform operation.

Nutanix NCP-AI受験対策解説集、NCP-AI模擬モード

この世界は毎日変わっています。世界の激しい変化によって、NCP-AI試験の内容も変わっています。でも、弊社のNCP-AI試験参考書は古くなることを心配する必要がないです。NCP-AI試験参考書は定期的に更新されますからです。そして、弊社は定期的にNCP-AI試験参考書を検査し、問題の答えの正確率を確保しています。

Nutanix Certified Professional - Artificial Intelligence v6.10 認定 NCP-AI 試験問題 (Q32-Q37):

質問 # 32

A development team is building a new AI-powered customer service chatbot. They have successfully integrated an LLM from Hugging Face into their application via a Nutanix Enterprise AI (NAI) endpoint. The NAI administrator has confirmed the endpoint is in the 'Active' state, and internal sample requests run from the NAI Endpoint section return an 'accurate' response and 'Succeeded' status.

However, the developers report that the chatbot frequently provides vague or irrelevant answers to user queries, leading to low customer satisfaction scores. They describe the LLM's performance for this specific chatbot task as "suboptimal." What should the administrator advise the developers to do next to improve the quality of the LLM's responses for the customer service chatbot task?

- A. Increase the number of instances for the NAI endpoint to enhance performance and reduce latency.
- B. Reseed the initial dataset and reimport the existing LLM within Nutanix Enterprise AI without implementing a RAG platform.
- C. Instruct the administrator to check the Kubernetes pod logs for the endpoint to identify any CRASHLOOPBACKOFF or OOMKilled errors that might be affecting model inference.
- **D. Consult the Hugging Face documentation for the specific LLM to review its training data, intended use cases, and capabilities.**

正解: D

質問 # 33

An administrator needs to spot the busiest credentials at a glance.

Which Dashboard widget provides insight into the most frequently used credentials?

- A. API Requests Trends
- B. Infrastructure Summary
- **C. API Keys (Top 5)**
- D. Endpoints Summary

正解: C

質問 # 34

An administrator is setting up Nutanix Enterprise AI with a custom domain (ai.company.com) and must comply with security policies requiring a valid TLS certificate from the corporate certificate authority (CA).

Which two steps are necessary to complete this configuration successfully? (Choose two.)

- **A. A CA signed TLS certificate for the configured NAI FQDN.**
- **B. Add a DNS A record pointing ai.company.com to the NAI IP address in a DNS server.**
- C. Use the Nutanix Prism interface to directly assign the FQDN ai.company.com to the NAI IP address.
- D. Create a DNS PTR record for ai.company.com to match the DNS A record.

正解: A、B

質問 #35

An administrator is deploying a customer support chatbot that needs to integrate with a large language model hosted in the Nutanix Enterprise AI platform. The goal is to enable real-time inference while following best practices for security and scalability. Which action should the administrator perform to meet these requirements?

- A. Create an API endpoint in the NAI Dashboard and generate an API key to assign to the endpoint for secure access.
- B. Register the chatbot application in Prism Central and map it to the deployed model through application profiles.
- C. Enable access to the model through SSH and use raw socket communication between the chatbot and model service.
- D. Configure a firewall exception using Nutanix Flow and force restricted access from the chatbot subnet to the AI model.

正解: A

質問 #36

An administrator has been asked to install Nutanix Enterprise AI and is defining the NFS storage class for storing models. What type of access mode needs to be defined?

- A. ReadOnlyMany (ROX)
- B. ReadWriteMany (RWX)
- C. ReadWriteOnce (RWO)
- D. ReadWriteOncePod (RWOP)

正解: B

質問 #37
