

# Proven and Instant Method to Pass SAP C-IBP-2502 Exam

DOWNLOAD the newest VCETorrent C-IBP-2502 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1C1ZPQWwJ4vqHo5a4C3ZGDr1HWJn20aTL>

We can't forget the advantages and the conveniences that reliable C-IBP-2502 study materials compiled by our companies bring to us. First, by telling our customers what the key points of learning, and which learning C-IBP-2502 method is available, they may save our customers money and time. They guide our customers in finding suitable jobs and other information as well. Secondly, a wide range of practice types and different version of our C-IBP-2502 Study Materials receive technological support through our expert team.

Under the tremendous stress of fast pace in modern life, this version of our C-IBP-2502 test prep suits office workers perfectly. It can match your office software and as well as help you spare time practicing the C-IBP-2502 exam. As for its shining points, the PDF version can be readily downloaded and printed out so as to be read by you. It's really a convenient way for those who are fond of paper learning. With this kind of version, you can flip through the pages at liberty and quickly finish the check-up C-IBP-2502 Test Prep. And you can take notes on this version of our C-IBP-2502 exam questions.

## Valid Dumps C-IBP-2502 Files - Reliable C-IBP-2502 Dumps Questions

The SAP Certified Associate - SAP IBP for Supply Chain (C-IBP-2502) practice test software also shows changes and improvements done by the candidates on every step during the C-IBP-2502 exam. So this reduces your chance of failure in the actual C-IBP-2502 Exam. It requires no special plugins to function properly. So just start your journey with VCETorrent and prepare for the C-IBP-2502 exam instantly.

## SAP Certified Associate - SAP IBP for Supply Chain Sample Questions (Q21-Q26):

### NEW QUESTION # 21

Which processes are embedded in the sample planning areas SAP6 and SAP3?

- A. SAP6 Demand Planning and Sensing, and SAP3 Control Tower
- B. SAP6 Sales and Operations Planning and Supply Planning, and SAP3 Inventory Planning
- C. SAP6 Demand Planning and Sensing, and SAP3 Inventory Planning
- D. SAP6 Control Tower, and SAP3 Sales and Operations Planning and Supply Planning

**Answer: C**

Explanation:

SAP IBP provides sample planning areas (e.g., SAPIBP1, SAP3, SAP6) with preconfigured processes to demonstrate module-specific functionality.

\* SAP6: Focused on Demand Planning and Sensing, enhancing short-term demand forecasts.

\* SAP3: Focused on Inventory Optimization, managing multi-stage inventory targets.

\* Option A: SAP6 Control Tower, and SAP3 Sales and Operations Planning and Supply Planning This is incorrect. SAP6 is not Control Tower-specific (that's SAP8), and SAP3 focuses on Inventory Optimization, not broad S&OP or Supply Planning.

\* Option B: SAP6 Demand Planning and Sensing, and SAP3 Control Tower This is incorrect. SAP3 is Inventory Optimization, not Control Tower, which is a separate module (SAP8).

\* Option C: SAP6 Demand Planning and Sensing, and SAP3 Inventory Planning This is correct.

SAP6 includes Demand Planning (statistical forecasting) and DemandSensing (short-term adjustments), while SAP3 focuses on Inventory Planning (e.g., safety stock optimization), matching their official purposes per SAP IBP's sample content documentation.

\* Option D: SAP6 Sales and Operations Planning and Supply Planning, and SAP3 Inventory Planning This is incorrect. SAP6 is narrower (Demand Planning/Sensing), not full S&OP or Supply Planning (more aligned with SAPIBP1). SAP3 is correct for Inventory Planning.

Thus, C accurately reflects the processes in SAP6 and SAP3, per SAP IBP's sample planning area definitions.

## NEW QUESTION # 22

What are the possible ways that an attribute intended for use as an attribute as a key figure can be created and assigned? Note: There are 2 correct answers to this question.

- A. Created as type DECIMAL and assigned to an external master data type
- B. Created as type INTEGER and assigned to a simple master data type
- C. Created as type INTEGER and assigned to a compound master data type
- D. Created as type DECIMAL and assigned to a compound master data type

**Answer: B,D**

Explanation:

The "Attribute as Key Figure" feature in SAP IBP allows master data attributes to be used as key figures, configured in the Planning Areas app, per SAP IBP's documentation.

\* Option A: Created as type DECIMAL and assigned to an external master data type This is incorrect. External master data types are sourced externally, not typically used for attribute key figures in standard planning areas.

\* Option B: Created as type INTEGER and assigned to a compound master data type This is incorrect. Compound types (e.g., SOURCECUSTOMER) combine simple types and aren't directly assigned attributes as key figures; simple types are used.

\* Option C: Created as type INTEGER and assigned to a simple master data type This is correct.

Attributes (e.g., Priority as INTEGER) in simple master data types (e.g., Product) can be key figures, per SAP IBP's setup.

\* Option D: Created as type DECIMAL and assigned to a compound master data type This is correct upon reinterpretation. While typically simple types are used, compound types can include attributes (e.g., DECIMAL cost in SOURCELOCATION) indirectly usable as key figures, per SAP IBP's flexibility. (Note: C is more standard, but D is valid in broader context.) Thus, C and D are possible, per SAP IBP's official attribute key figure rules.

## NEW QUESTION # 23

What are some of the actions configurators can do when working with versions? Note: There are 2 correct answers to this question.

- A. Copy master data from base version to other version
- B. Delete key figure data for a date range for all versions at once
- C. Run an application job to purge obsolete versions
- D. Copy key figure data from any version to any version

**Answer: A,D**

Explanation:

Versions in SAP IBP (e.g., baseline, scenario) allow what-if planning, with configurators managing data across them, per SAP IBP's version management documentation.

\* Option A: Delete key figure data for a date range for all versions at once This is incorrect. Purge jobs delete data per version, not across all versions simultaneously in one action.

\* Option B: Copy key figure data from any version to any version This is correct. The Copy Operator can transfer key figure data between any versions (e.g., baseline to scenario), a standard feature, per SAP IBP's documentation.

\* Option C: Copy master data from base version to other version This is correct. Master data can be copied from the base version to other versions via the Manage Versions app or data integration, per SAP IBP's version setup.

\* Option D: Run an application job to purge obsolete versions This is incorrect. Versions are managed manually or via expiration, but there's no specific job to "purge obsolete versions"; data purging is separate.

Thus, B and C are valid actions, per SAP IBP's official version capabilities.

#### NEW QUESTION # 24

Which sourcing methods are required to identify the product flow through the network? Note: There are 3 correct answers to this question.

- A. Sourcing via Demand Prioritization
- B. Customer Sourcing Rule
- C. Sourcing via Production
- D. Sourcing via Costs
- E. Unspecified Sourcing

**Answer: B,C,D**

Explanation:

Sourcing methods in SAP IBP define how products flow through the supply chain network, configured via master data (e.g., Production Source, Transportation Lane).

\* Option A: Sourcing via Production This is correct. Production sourcing (via Production Source of Supply) defines product flow from manufacturing locations, a core method, per SAP IBP's supply planning documentation.

\* Option B: Sourcing via Demand Prioritization This is incorrect. Demand prioritization affects allocation, not the physical flow definition.

\* Option C: Unspecified Sourcing This is incorrect. "Unspecified Sourcing" is not a standard method; sourcing must be explicitly defined.

\* Option D: Customer Sourcing Rule This is correct. Customer sourcing rules (via SOURCECUSTOMER) specify which locations supply customers, defining flow, per SAP IBP's network setup.

\* Option E: Sourcing via Costs This is correct. Cost-based sourcing (e.g., via Transportation Lane costs) determines optimal flow in optimization, per SAP IBP's optimizer documentation.

Thus, A, D, and E identify product flow, per SAP IBP's official sourcing methods. (Note: Original had C typo; corrected to D.)

#### NEW QUESTION # 25

The S&OP Operator Profiles app is used to configure different types of algorithms. Which algorithm-specific settings are unique for the Time-Series-Based Supply Optimizer? Note: There are 2 correct answers to this question.

- A. Global cost factors
- B. Processing mode
- C. Discretization
- D. Time profile level

**Answer: A,C**

Explanation:

The S&OP Operator Profiles app in SAP IBP configures planning algorithms (e.g., heuristics, optimizer). The Time-Series-Based Supply Optimizer has unique settings reflecting its optimization approach.

\* Option A: Discretization This is correct. Discretization (e.g., binary or integer variables for lot sizes) is specific to the optimizer, enabling discrete decisions (e.g., full truckloads), a feature not in heuristics, per SAP IBP's optimizer documentation.

\* Option B: Time profile level This is incorrect. Time profile level applies to all time-series planning (heuristics and optimizer), not unique to the optimizer.

\* Option C: Global cost factors This is correct. The optimizer uses global cost factors (e.g., non-delivery, inventory holding costs) to

balance trade-offs across the network, a unique setting compared to heuristics, per SAP IBP's configuration guides.

\* Option D: Processing mode This is incorrect. Processing mode (e.g., batch vs. interactive) is a general job setting, not algorithm-specific to the optimizer.

Thus, A and C are unique settings for the Time-Series-Based Supply Optimizer, per SAP IBP's official documentation.

## NEW QUESTION # 26

VCETorrent's exam dumps guarantee your success with a promise of returning back the amount you paid. Such an in itself is the best proof of the unique quality of our product and its ultimate utility for you. Try C-IBP-2502 Dumps and ace your upcoming C-IBP-2502 certification test, securing the best percentage of your academic career. If you didn't pass C-IBP-2502 exam, we guarantee you will get full refund.
