300-430 Free Pdf Guide | 300-430 Interactive Questions

Our passing rate is very high to reach 99% and our 300-430 exam torrent also boost high hit rate. Our 300-430 study questions are compiled by authorized experts and approved by professionals with years of experiences. They are compiled according to the latest development conditions in the theory and practice and the questions and answers are based on real exam. Our study materials can improve your confidence for real exam and will help you remember the exam questions and answers that you will take part in. You can choose the version which suits you mostly. Our Implementing Cisco Enterprise Wireless Networks exam torrents simplify the important information and seize the focus to make you master the 300-430 Test Torrent in a short time.

Cisco Implementing Cisco Enterprise Wireless Networks Sample Questions (Q325-Q330):

NEW QUESTION # 325

What is an important consideration when implementing a dual SSID design for BYOD?

- A. One SSID is for provisioning and the other SSID is for gaining access to the network. The use of an ACL should not be enforced to make the client connect to the REAL SSID after provisioning.
- B. After using the provisioning SSID, an ACL that used to make the client switch SSIDs forces the user to associate and traverse the network by MAC filtering.
- C. If multiple WLCs are used, the WLAN IDs must be exact for the clients to be provisioned and traverse the network correctly.
- D. SSIDs for this setup must be configured with NAC State-RADIUS NAC for the clients to authenticate with Cisco ISE, or with NAC State-ISE NAC for Cisco ISE to associate the client.

Answer: A

Explanation:

NEW QUESTION # 326

An engineer configures a Cisco Aironet 600 Series OfficeExtend AP for a user who works remotely. What is configured on the Cisco WLC to allow the user to print a printer on his home network?

- A. FlexConnect
- B. SE-connect
- C. AP failover priority
- **D. split tunneling**

Answer: D

Explanation:

Split tunneling on a Cisco Aironet 600 Series OfficeExtend AP allows for traffic to be divided between two different networks. In this case, it enables the user to access the corporate network for work-related tasks while simultaneously allowing them to print to a printer on their home network. This is achieved by routing the traffic meant for the corporate network to the WLC, while local traffic such as the connection to a home printer is kept on the local network. NEW QUESTION # 327

An enterprise has recently deployed a voice and video solution available to all employees using AireOS controllers. The employees must use this service over their laptops, but users report poor service when connected to the wireless network. The programs that consume bandwidth must be identified and restricted.

Which configuration on the WLAN aids in recognizing the traffic?

- A. Application Visibility
- **B. AVC Profile**
- C. NetFlow Monitor
- D. QoS Profile

Answer: B

NEW QUESTION # 328

Drag and Drop Question

A network engineer must get an autonomous AP to authenticate to the upstream switch via IEEE 802.1 X. Drag and drop the commands from the left onto the right to complete the configuration.

Answer:

Explanation:

NEW QUESTION # 329

Which component must be integrated with Cisco DNA Center to display the location of a client that is experiencing connectivity issues?

- A. Cisco Connected Mobile Experiences
- B. Cisco Mobility Services Engine
- C. Wireless Intrusion Prevention System
- **D. Cisco Hyperlocation Module**

Answer: D
