NCP-DB-6.10 Sample Questions Answers - NCP-DB-6.10 Valid Exam Preparation

We have always taken care to provide our customers with the very best. So we provide numerous benefits along with our Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 exam study material. We provide our customers with the demo version of the Nutanix NCP-DB-6.10 Exam Questions to eradicate any doubts that may be in your mind regarding the validity and accuracy. You can test the product before you buy it.

Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 Sample Questions (Q170-Q175):

NEW QUESTION # 170
Which two processes should an administrator take to create a software profile version for a newly- released Oracle ISc patch? (Choose two.)

- A. 1. Download the required patch from Microsoft Support.
  2. Apply the patch to the Oracle Home/Grid Home on e cloned VM of the gold image using OPatchAuto utiliv.
  3. Ensure success of patch application.
- B. 1. Create new software profile version from the original software profile using the cloned VM where OPatchAuto was run successfully using Era Gul.
  2. Mark the original patch profile as hidden.

- C. 1. Create new software profile version from the original software profile using the cloned VM where OPatchAuto was run successfully using Era Gul.
  2. Mark the original patch profile as deprecated.
- D. 1. Download the required patch from MyOracle Support
  2. Apply the patch to the Oracle HomGrid Home on a cloned VM of the gold image using O PatchAuto
  3. Ensure success of patch application

Answer: B,D

Explanation:
To create a software profile version for a newly-released Oracle ISc patch, an administrator should follow these steps:
Download the required patch from MyOracle Support. This is because Oracle patches are typically available from MyOracle Support, not Microsoft Support. Apply the patch to the Oracle Home/Grid Home on a cloned VM of the gold image using OPatchAuto. OPatchAuto is a utility provided by Oracle that automates the process of applying patches to a database.
Ensure success of patch application. It's important to verify that the patch has been applied successfully to avoid any issues down the line.
Create a new software profile version from the original software profile using the cloned VM where OPatchAuto was run successfully using Era GUI. This step is necessary to ensure that the new patch is included in the software profile.
Mark the original patch profile as hidden. This step is optional but can be useful for keeping the software profile clean and organized.
Please note that these answers are based on the information available as of my last update in
2021 and may need to be verified with the most recent Nutanix Database Automation (NCP-DB) documentation or resources.

NEW QUESTION # 171
An administrator is initially setting up Time Machine for a newly-provisioned database. What is the maximum number of snapshots per day that can be configured in the GUI?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

Explanation:
When setting up a Time Machine for a newly-provisioned database in NDB, the GUI allows the administrator to configure the frequency of snapshots for data protection. The maximum number of snapshots per day that can be configured in the NDB GUI is 6. This limit ensures a balance between data granularity (for point-in-time recovery) and storage overhead, preventing excessive resource consumption. The administrator can schedule these snapshots at regular intervals (e.g., every 4 hours) within the Time Machine configuration wizard.

NEW QUESTION # 172
Why are ports 3205 and 3260 important when working with Era?

- A. These ports facilitate NFS connections
- B. These ports facilitate SMB connections
- C. These ports facilitate iSCSI connections
- D. These ports facilitate CIFS connections

Answer: C

Explanation:
Ports 3205 and 3260 are important when working with Era because they must be open on the Era server and all Controller VMs (CVMs) to facilitate iSCSI connections. Specifically, port 3205 is used for iSCSI redirection. Please be careful of routing iSCSI traffic, as it could impact performance.

NEW QUESTION # 173
An administrator created a database clone that is scheduled for removal on the last day of the month.
A request has been received to keep the clone for an additional 14 days. After selecting the desired clone, how should the

administrator satisfy this task?

- A. Select Update and modify the Removal schedule.
- B. Update the Removal schedule to the end of the month.
- C. Remove the Removal schedule, then add the desired removal schedule.
- D. Update the Removal schedule to the desired date.

Answer: A

Explanation:
The Removal schedule is a feature of Nutanix Era that allows you to specify when a database clone will be automatically deleted. You can modify the Removal schedule of an existing clone by selecting the clone from the Clones page, clicking on the Update button, and changing the Removal schedule option to the desired date. This way, you can extend or shorten the lifespan of a clone as per your requirements. You do not need to remove the existing Removal schedule and add a new one, as this would be an unnecessary step. You also do not need to update the Removal schedule to the end of the month, as this would not meet the request of keeping the clone for an additional 14 days.

NEW QUESTION # 174
What is the purpose of Data Access Management policies in NDB Multi-Cluster?

- A. To perform snapshot operations on a single Nutanix cluster
- B. To manage time machine data availability across all registered Nutanix clusters in NDB
- C. To remove data accessibility of a time machine across all registered Nutanix clusters in NDB
- D. To register multiple Nutanix clusters in NDB

Answer: B

Explanation:
Data Access Management (DAM) policies are a feature of NDB Multi-Cluster that allows you to control the access and availability of time machine data across different Nutanix clusters. You can use DAM policies to specify which clusters can access the time machine data of a source database, and which clusters can replicate the time machine data for backup or disaster recovery purposes. DAM policies help you to optimize the storage and network resources, as well as ensure the security and compliance of your database workloads. The purpose of DAM policies is not to register multiple Nutanix clusters in NDB, as this is done by using the Add Cluster option in the NDB settings page. The purpose of DAM policies is also not to perform snapshot operations on a single Nutanix cluster, as this is done by using the Time Machine feature in the NDB dashboard. The purpose of DAM policies is also not to remove data accessibility of a time machine across all registered Nutanix clusters in NDB, as this is done by using the Delete option in the Time Machine page.

NEW QUESTION # 175
.....

If you buy our NCP-DB-6.10 training quiz, you will find three different versions are available on our test platform. According to your need, you can choose the suitable version for you. The three different versions of our NCP-DB-6.10 study materials include the PDF version, the software version and the online version. We can promise that the three different versions are equipment with the high quality. If you purchase our NCP-DB-6.10 Preparation questions, it will be very easy for you to easily and efficiently find the exam focus and pass the NCP-DB-6.10 exam.

NCP-DB-6.10 Sample Questions Answers: https://www.pass4training.com/NCP-DB-6.10-pass-exam-training.html

Nutanix Reliable NCP-DB-6.10 Exam Cost The exam is an necessary test for candidates who want to further their position in their career your choices about materials will of great importance when you dealing with every kind of exam so as the exam, Nutanix Reliable NCP-DB-6.10 Exam Cost We are legal authorized company which was built more than 7 years, While if you choose valid NCP-DB-6.10 practice questions, you should not only pay attention on NCP-DB-6.10 exam preparation quality but also service term such as pass guaranteed & money back guaranteed.

Set Startup Disk allows you to change the startup NCP-DB-6.10 Test Guide Online disk for the computer to a NetInstall set, These null sessions were created to allow unauthenticated hosts to obtain browse NCP-DB-6.10 Sample Questions Answers lists from Windows NT servers and to use network file and print sharing services.

Nutanix NCP-DB-6.10 Exam Questions - Best Study Tips And Information

The exam is an necessary test for candidates who want to further their NCP-DB-6.10 position in their career your choices about materials will of great importance when you dealing with every kind of exam so as the exam.

We are legal authorized company which was built more than 7 years, While if you choose valid NCP-DB-6.10 practice questions, you should not only pay attention on NCP-DB-6.10 exam preparation quality but also service term such as pass guaranteed & money back guaranteed.

Of course, when you are seeking for exam materials, it is certain that you will find many different materials, All operating systems such as Mac, iOS, Windows, Linux, and Android support the web-based Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 NCP-DB-6.10 practice exam.
