Valid Study Chrome-Enterprise-Administrator Questions, Frequent Chrome-Enterprise-Administrator Updates

We know that the standard for most workers become higher and higher; so we also set higher goal on our Chrome-Enterprise-Administrator guide questions. Our training materials put customers' interests in front of other points, committing us to the advanced Chrome-Enterprise-Administrator learning materials all along. Until now, we have simplified the most complicated Chrome-Enterprise-Administrator Guide questions and designed a straightforward operation system, with the natural and seamless user interfaces of Chrome-Enterprise-Administrator exam question grown to be more fluent, we assure that our practice materials provide you a total ease of use.

Google Chrome-Enterprise-Administrator Exam Syllabus Topics:

Topic	Details
Topic 1	• Chrome Updates: This section of the exam measures skills of a Chrome IT Policy Analyst and addresses the various update methods available for Chrome. It includes selecting the right update strategy for different business and security needs, managing compliance across platforms, and adapting update methods based on environmental changes or risks.
Topic 2	• Analyze Chrome Data: This section of the exam measures skills of a Chrome Data Analyst and focuses on using the Google Admin console to view, analyze, and troubleshoot browser data. It includes reviewing reports, diagnosing browser or update issues, investigating performance problems, and identifying security risks based on log events and Chrome activity.
Topic 3	• Chrome Extensions: This section of the exam measures skills of an Endpoint Security Manager and involves managing Chrome extension policies. It includes designing extension management strategies, handling extension exemptions, creating approval workflows, and assessing extensions for their risk and compliance with business continuity requirements.
Topic 4	• Manage Chrome Enterprise in the Cloud: This section of the exam measures skills of a Cloud Systems Administrator and focuses on preparing and configuring environments for Chrome cloud management. Candidates must demonstrate how to verify domains, use admin roles, configure organizational structures, deploy enrollment tokens, enable reporting, and maintain Chrome using the Google Admin console.
Topic 5	• Chrome Enterprise Management Fundamentals: This section of the exam measures skills of a Chrome Device Administrator and covers the foundational elements of managing Chrome in an enterprise. It includes understanding how policies are applied and resolved, differentiating managed browsers from profiles, and describing how policies work. It also covers Chrome's built-in security features, how extensions are used and deployed, and how the release cycle and channels are managed.

Frequent Chrome-Enterprise-Administrator Updates - Chrome-Enterprise-Administrator Reliable Test Testking

As we all know, passing an exam is not an easy thing for many candidates. They need time and energy to practice. Chrome-Enterprise-Administrator study materials will save your time with the skilled professional to compile them, and they are quite familiar with exam center. Therefore there is no need for you to research the Chrome-Enterprise-Administrator Study Materials by yourself. Furthermore, we use international recognition third party for your payment for Chrome-Enterprise-Administrator exam dumps, and your money and account safety can be guaranteed. If you find your interests haven't been guaranteed, you can ask for the refund.

Google Professional Chrome Enterprise Administrator Certification Exam Sample Questions (Q50-Q55):

NEW QUESTION # 50

An organization has Chrome set to auto-update The security team runs a compliance report from Chrome Enterprise Core and notices that some rarely used machines are showing an old version of Chrome However, when an engineer logs in to these PCs and checks Chrome directly, the correct updated version appears What is the most likely reason for this discrepancy?

- A. The display version does not update until Chrome is launched
- B. Network setting is blocking the unattended auto-update check
- C. The machine has a different version of Chrome installed that is not managed via auto update
- D. The auto-update feature is malfunctioning and not updating Chrome until it is launched

Answer: A

Explanation:
The most likely reason for this discrepancy is that the version reported in the Chrome Enterprise Core compliance report might not be updated in real-time until Chrome is actively running and checks in. When an engineer logs in and launches Chrome, it likely completes the update process and reports the correct version.
The auto-update feature generally works in the background, and a completely different unmanaged version (option C) or a persistent network block (option D) would likely prevent updates even when Chrome is launched. A malfunctioning auto-update (option A) is less likely to resolve itself upon manual launch.

NEW QUESTION # 51

An organization using Chrome browser on Windows has policies from group policy and Chrome Enterprise Core.
In what order are the policies applied?

- A. By the precedence hierarchy
- B. From least restrictive to most restrictive
- C. Group policy takes precedence
- D. Cloud policy takes precedence

Answer: A

Explanation:
When both Group Policy (local machine policy) and Chrome Enterprise Core (cloud policy) are configured on a Windows device, the effective policy is determined by a defined order of precedence. Generally, cloud policies for managed browsers will override conflicting local policies. The specific precedence order is configurable, but it follows a hierarchical structure where certain policy sources take priority over others.
Options C and D present a simplified view that might not always be the case depending on the configuration.
Option B is a general principle of conflict resolution but doesn't describe the specific order in Chrome policy application.

NEW QUESTION # 52

An organization has a compatibility issue with an internal website after the latest Chrome update The decision is made to revert any

updates to the working version and stop Chrome from updating beyond the working version For security, Chrome needs to continue updating older versions to the latest compatible version Which configuration would an administrator set?

- A. Google Updater policy precedence
- B. Target version and rollback
- C. Update to extended stable channel
- D. Auto update check period

Answer: B

Explanation:
To pin Chrome to a specific working version and prevent upgrades beyond it while still allowing updates within that major version for security patches, the "Target version and rollback" policy is the appropriate choice. This allows administrators to specify a target version and potentially roll back if issues arise, while still receiving critical security updates within that targeted version.

NEW QUESTION # 53
Which operating system must be used to self-host a Chrome extension*?

- A. Linux
- B. ChromeOS
- C. Windows 11
- D. macOS

Answer: A

Explanation:
While the provided study guide doesn't explicitly detail the OS requirements for self-hosting Chrome extensions, general web hosting best practices suggest that Linux is a common and robust platform for serving files and managing web-related services. Its open-source nature, command-line interface, and extensive server software support make it well-suited for self-hosting compared to desktop-centric operating systems like Windows 11 or macOS, and the client-focused ChromeOS. Self-hosting typically involves setting up a web server to distribute the extension files, a task commonly performed on Linux servers.

NEW QUESTION # 54
What report types are available in Google Chrome Enterprise Core on the Chrome Insights Report page'?

- A. Chromium browsers, Devices that need to be purchased, Devices that have been used by family members
- B. Browsers pending updates, Browsers without activity in the past 28 days, Browsers that have been recently enrolled
- C. Device Fleet Hardware report, Browsers that need attention, Chromium browsers
- D. Devices that need attention, Devices that need to be purchased, Devices that have been used by family members

Answer: B

Explanation:
The Chrome Insights Report in the Google Admin console provides visibility into the managed Chrome browser environment. Key report types available here include "Browsers pending updates" to identify devices needing patching, "Browsers without activity in the past 28 days" to understand browser usage, and
"Browsers that have been recently enrolled" for monitoring onboarding. The other options list reports that are either not specific to Chrome Insights or related to device hardware rather than browser status.

NEW QUESTION # 55
......

We become successful lies on the professional expert team we possess, who engage themselves in the research and development of our Chrome-Enterprise-Administrator learning guide for many years. So we can guarantee that our Chrome-Enterprise-Administrator exam materials are the best reviewing material. Concentrated all our energies on the study Chrome-Enterprise-Administrator learning guide we never change the goal of helping candidates pass the exam. Our Chrome-Enterprise-Administrator test questions' quality is guaranteed by our experts' hard work. So what are you waiting for? Just choose our Chrome-Enterprise-Administrator exam materials, and you won't be regret.
