我々JPTestKingはお客様の立場でお客様に最高のサービスを提供します。全日でのオンライン係員、SAPのC-CPI-2506試験資料のデモ、豊富なバージョン、SAPのC-CPI-2506試験資料を購入した後の無料更新、試験に失敗した後の全額の返金...これら全部は我々JPTestKingが信頼される理由です。あなたは我々のソフトを通してSAPのC-CPI-2506試験に順調に合格したら、私たちの共同の努力を覚えられると希望します。

SAP C-CPI-2506 認定試験の出題範囲：

トピック	出題範囲
トピック 1	<ul style="list-style-type: none">Implementing Cloud Integration: This section of the exam measures the skills of Integration Consultants and examines how cloud integration flows are designed and deployed. It emphasizes creating integration scenarios, handling connectivity, and applying best practices to build efficient, secure, and reliable integration processes in SAP's cloud environment.
トピック 2	<ul style="list-style-type: none">Managing APIs: This section of the exam measures the skills of Solution Architects and focuses on managing APIs within the SAP ecosystem. It covers topics such as API provisioning, lifecycle management, security policies, and monitoring, ensuring candidates can handle APIs effectively for enterprise integration needs.
トピック 3	<ul style="list-style-type: none">SAP Integration Suite Overview: This section of the exam measures the skills of Integration Consultants and covers the foundational concepts of the SAP Integration Suite. It provides an understanding of the suite's capabilities, its role in connecting applications, and its relevance in modern cloud-based integration scenarios.
トピック 4	<ul style="list-style-type: none">SAP Event Mesh: This section of the exam measures the skills of Solution Architects and centers on using SAP Event Mesh to support event-driven integration. It highlights the importance of asynchronous communication, event publishing, and subscription models, allowing organizations to build scalable and decoupled systems.

信頼的なC-CPI-2506試験感想 & 合格スムーズC-CPI-2506認証試験 | 100%合格率のC-CPI-2506過去問題

C-CPI-2506テスト資料は、学習プラットフォームの科学的性質を強化するために、特に製品の高いIQチームで構成される多数の資格試験専門家を雇い、これらの専門家はC-CPI-2506クイズの長年の教育経験を組み合わせ

で試験の分野での成果を導き、研究するために、普及はSAP Certified Associate - Integration Developer試験ダンプの非常に複雑な内容でした。エキスパートチームは、C-CPI-2506試験に合格するためのC-CPI-2506クイズガイドコンサルティングに高品質を提供できます。

SAP Certified Associate - Integration Developer 認定 C-CPI-2506 試験問題 (Q61-Q66):

質問 # 61

Which SAP Integration Suite component delivers the Cloud Event to the "emis-s4hana-uc123" message queue?

- A. Open Connector
- **B. Event Mesh**
- C. API Management
- D. Process Integration

正解: B

解説:

In SAP Integration Suite, the component responsible for delivering Cloud Events to message queues is Event Mesh. Event Mesh handles event-driven communication and manages message queues like emis-s4hana-uc123. Process Integration (PI/PO) is on-premise middleware, not part of Integration Suite cloud services. API Management handles APIs, not messaging events. Open Connectors provides connectivity to third-party SaaS apps, not queue management. Thus, the Cloud Event is delivered to the message queue via Event Mesh.

質問 # 62

Which combination of event-driven architecture (EDA) patterns is supported by SAP Event Mesh?

- A. Request/Reply and Message Queuing event-driven architecture patterns
- B. Choreography and Orchestration event-driven architecture patterns
- **C. Publish/Subscribe and Point-to-Point event-driven architecture patterns**
- D. Publish/Subscribe and Event Sourcing event-driven architecture patterns

正解: C

解説:

SAP Event Mesh supports:
Publish/Subscribe # A single event published by a producer can be consumed by multiple subscribers.
Point-to-Point (Queue-based) # Messages sent directly from producer to consumer via queues.
Other options are incorrect:
Event Sourcing is not part of SAP Event Mesh capabilities.
Request/Reply is synchronous, not the main EDA pattern.
Choreography/Orchestration are higher-level process design concepts, not the eventing patterns.

質問 # 63

Why does the API Management capability of the SAP Integration Suite require API providers?

- **A. To incorporate APIs from source systems**
- B. To create APIs
- C. To create authenticated API instances

正解: A

解説:

The API Management capability of the SAP Integration Suite requires API providers to incorporate APIs from source systems. An API provider is a system or application that exposes the interface and functionality of an API. The API Management capability allows you to connect to different types of API providers, such as OData, SOAP, REST, or RFC, and manage their lifecycle, security, and consumption. Reference: Integration Software | SAP Integration Suite, Modernize Integration with SAP Integration Suite | openSAP

質問 # 64

You configure an Exception Subprocess. Which event starts the Exception Subprocess?

- A. Error Start Event
- B. Start Event
- C. Start Message Event
- D. Start Escalation

正解: A

解説:

In SAP Cloud Integration, an Exception Subprocess is used to catch and handle errors during message processing.

It is always triggered by an Error Start Event.

When an error occurs in the main process (e.g., mapping error, adapter error), control is handed to the Exception Subprocess.

Other start events (Message, Escalation, Normal Start) are not valid in an Exception Subprocess.

Hence, the correct event to start the Exception Subprocess is the Error Start Event.

質問 # 65

Which of the following are markup languages that you can use to describe APIs? Note: There are 2 correct answers to this question.

- A. OpenAPI
- B. HTML
- C. CXML
- D. RAML

正解: A、D

解説:

RAML and OpenAPI are markup languages that you can use to describe APIs. RAML stands for RESTful API Modeling Language and is based on YAML. OpenAPI is a specification for describing RESTful APIs and is based on JSON or YAML. Both languages allow you to define the structure, parameters, responses, and documentation of your APIs.
