Salesforce Analytics-DA-201 시험요강:

주제	소개
주제 1	ABAP SQL and Code Pushdown: This section of the exam measures the competencies of the SAP ABAP Cloud Developer related to performance optimization through ABAP SQL and code pushdown techniques. It ensures that the developer understands how to shift logic to the database layer using efficient SQL scripting to enhance performance in data-intensive applications.
주제 2	- Core ABAP Programming: This part of the exam assesses the foundational programming skills of the SAP S 4HANA Technical Consultant. It includes knowledge of syntax, control structures, modularization, and internal tables in ABAP. The section aims to validate the candidate's proficiency in writing clean, efficient ABAP code using best practices.
주제 3	- SAP Clean Core Extensibility and ABAP Cloud: This part of the exam targets the SAP S 4HANA Technical Consultant and covers concepts of clean core extensibility using ABAP in the cloud. The focus is on in-app and side-by-side extensibility techniques, ensuring that custom code complies with cloud-readiness principles and does not compromise the upgrade stability of core systems.

질문 # 83

You have the following chart that sorts states by the number of products each state has purchased.

Which formula should you use to include a number with the position of each state within each region?

- A. FIRST ()
- B. WINDOW_SUM(SUM ([Quantity]))
- C. INDEX ()
- D. LOOKUP (SUM ([Quantity]))

정답: D

설명:

The LOOKUP function is used to return the value of a specified field in a different row, which can be defined relative to the current row. In this context, it can be used to include a number with the position of each state within each region by looking up the SUM([Quantity]) in each respective position. References: The information is inferred from general Tableau knowledge as well as the following sources:

질문 # 84

Open the link to Book1 found on the desktop. Open Disciplines worksheet.

Filter the table to show the members of the Top10 set and the members of the Bottom10 set. There should be a total of 20 rows.

정답 :

설명:

check the steps below in explanation.

Explanation:

To filter the table to show the members of the Top10 set and the Bottom10 set, you need to do the following steps:

- * Open the link to Book1 found on the desktop. This will open the Tableau workbook that contains the Disciplines worksheet.
- * Click on the Disciplines tab at the bottom of the workbook to open the worksheet. You will see a table that shows the disciplines, sales, and profit for each salesperson.
- * Click on the drop-down arrow next to Salesperson on the Filters shelf. This will open a menu that allows you to filter by different criteria.
- * Select Set from the menu. This will show you the sets that are available for the Salesperson field. You will see Top10 and Bottom10 as two sets that have been created based on the sales ranking.
- * Check the boxes next to Top10 and Bottom10. This will filter the table to show only the members of these two sets. You can also click on All to deselect all other values.
- * Click OK to apply the filter. You will see that the table now shows 20 rows, 10 for each set.

질문 # 85

You have the following dashboard.

Sales across cities

When a user selects a city on the map, the data on the bar chart must show only the data for the selected city. The data in the bar chart must change only when the user selects a different city. How should you configure the dashboard action? (Use the dropdowns in the Answers Area to select the correct options.)

정답:

설명:

Explanation:

To configure the dashboard action, you should select Filter as the action type, Select as the run action on option, and All Fields as the target filters option. This will ensure that when a user selects a city on the map, the bar chart will show only the data for the selected city based on all fields in common between the two worksheets. The action will run only when the user selects a different city. References: <https://help.tableau.com/current/pro/desktop/en-us/actions.htm>

질문 # 86

You want to ensure that when you click a bar on a dashboard, a tooltip appears that contains a link named "Click here to know more!" as shown in the following exhibit.

The screenshot shows a Salesforce dashboard with a bar chart titled "Sales by Sub-Category". The chart has a list of sub-categories on the left: Phones, Chairs, Storage, Tables, Binders, Machines, Accessories, Copiers, Bookcases, Appliances, Furnishings, Paper, Supplies, Art, Envelopes, Labels, and Fasteners. A tooltip is visible over the "Phones" bar, showing "Sub-Category: Phones", "Sales: 330,000", and a link "Click here to know more!". Below the chart is an "Answer Area" with configuration options. The "Action type" dropdown is set to "salesforce" and shows options: Filter, Go to Sheet, Go to URL, and Highlight. The "Run action on:" dropdown is set to "Hover" and shows options: Hover, Menu, Select, and Single-select only.
