For most IT candidates, passing C-SIGDA-2403 actual test will make you stand out from the other people in the interview and offer you more opportunity. The matter now is how to prepare the C-SIGDA-2403 Questions and answers in a short time, our C-SIGDA-2403 study guide is the best effective way to get through the exam and obtain the

certification.

SAP Certified Associate - Process Data Analyst - SAP Signavio Sample Questions (Q24-Q29):

NEW QUESTION # 24
How can a process owner approve workflows?

- A. Shared Documents tab in Menu
- B. Tasks tab under Menu
- C. Recent tab
- D. Investigations tab under Menu

Answer: B

Explanation:
In the SAP Signavio Process Collaboration Hub, process owners manage workflow approvals through a dedicated interface for tasks. The SAP Signavio Process Collaboration Hub Documentation explains:
* Exact Extract:"Process owners can approve workflows in the SAP Signavio Process Collaboration Hub by accessing the Tasks tab under the Menu, where pending workflow tasks, such as approvals, are listed and can be actioned." (SAP Signavio Process Collaboration Hub User Guide, section on
"Workflow Management").
* Explanation:
* Option B (Tasks tab under Menu):This is correct as the Tasks tab in the Collaboration Hub displays all workflow-related tasks assigned to the user, including approval requests from SAP Signavio Process Governance workflows, allowing process owners to review and approve them.
* Option A (Investigations tab under Menu)is incorrect because the Investigations tab is related to SAP Signavio Process Intelligence for data analysis, not workflow approvals.
* Option C (Shared Documents tab in Menu)is incorrect as the Shared Documents tab is for accessing shared process documentation, not managing workflow tasks.
* Option D (Recent tab)is incorrect because the Recent tab shows recently accessed items, not tasks for workflow approvals.
Reference:SAP Signavio Process Collaboration Hub User Guide, section on "Workflow Management"; SAP Certified Associate - Process Data Analyst Study Guide, Chapter 3: Collaboration Hub Task Management.

NEW QUESTION # 25
How can KPI's from SAP Signavio Process Intelligence be visualized in the SAP Signavio Process Collaboration Hub?Note: There are 3correct answers to this question.

- A. By case exporting
- B. By workflow mining
- C. By adding live KPI's into the process
- D. By monitoring widgets
- E. By adding live KPI's into the Customer Journey Map

Answer: C,D,E

Explanation:
In SAP Signavio, Key Performance Indicators (KPIs) from Process Intelligence can be visualized within the Process Collaboration Hub in several ways. Adding live KPIs into both the Customer Journey Map and the process diagrams enables real-time monitoring and assessment of process performance, directly within the context of the process flows. This integration aids in pinpointing performance bottlenecks and opportunities for improvement. Additionally, monitoring widgets can be used to display KPIs on dashboards, providing an overview of process health and performance trends at a glance. Exporting by case and workflow mining are not direct methods for visualizing KPIs within the Process Collaboration Hub.References:SAP Signavio User Guide

NEW QUESTION # 26
What are some benefits of Process Mining? Note: There are 3 correct answers to this question.

- A. Automated process documentation

- B. Process standardization
- C. Ensured compliance
- D. Higher automation rate
- E. Reduced costs

Answer: B,C,E

Explanation:
Process Mining provides organizations with actionable insights to optimize their processes. The SAP Signavio documentation highlights:
* Option B (Process standardization):Process Mining identifies variations in process execution, enabling organizations to standardize processes by adopting best practices and reducing inefficiencies.
* Option D (Reduced costs):By uncovering bottlenecks, redundant steps, or inefficiencies, Process Mining helps organizations streamline operations, leading to cost reductions.
* Option E (Ensured compliance):Process Mining supports compliance by detecting deviations from regulatory or organizational standards, ensuring processes adhere to required guidelines.
* Option A (Automated process documentation)is incorrect because, while Process Mining generates process models (e.g., via Process Discovery), documentation is typically a manual or semi-automated task in SAP Signavio Process Manager.
Reference:SAP Signavio Process Intelligence Documentation, section on "Process Mining Benefits"; SAP Certified Associate - Process Data Analyst Study Guide, Chapter 5: Process Mining Outcomes.

NEW QUESTION # 27
Where do you configure access rights for your workflow?

- A. On the Trigger tab
- B. On the Versions tab
- C. On the Actions tab
- D. On the Details tab

Answer: C

NEW QUESTION # 28
Which components are included to configure ETL data pipelines in SAP Signavio Process Intelligence?Note:
There are 3 correct answ-ers to this que-stion.

- A. Data Integration Management
- B. Data Model Management
- C. Data Relation Management
- D. Data Source Management
- E. Data Object Management

Answer: A,B,D
