- A. Both A and B
- B. Have a desire to leverage Big Data to transform their business but do not know where and how to start
- C. All of the above
- D. Have a wealth of data that they do not know how to monetize
- E. Have a desire to leverage the Big Data Vision Workshop to identify where and how to leverage data and analytics to power their business models

Answer: C

Explanation:

The Big Data Vision Workshop is an early-phase framework designed to help organizations shape their data-driven transformation journey. It is particularly beneficial when:

Option A: Organizations want to leverage big data but lack clarity on where to start.

Option B: Organizations already have large volumes of data but struggle to derive monetization strategies from it.

NEW QUESTION # 59

Which of the following is FALSE for Social Network Analysis (SNA)?

- A. None of the above
- B. Social Network Analysis (SNA) is an example of trend analysis
- C. SNA is used to investigate social structures and relationships across social networks
- D. Social Network Analysis (SNA) is an example of graph analysis
- E. SNA characterizes networked structures in terms of nodes and the ties or edges that connect them

Answer: B

Explanation:

Social Network Analysis (SNA) is a powerful analytical method that applies graph theory to study relationships among entities (people, organizations, computers, etc.).

Option A: Correct. SNA is indeed an example of graph analysis because it models entities as nodes and their relationships as edges/ties.

Option B: FALSE. SNA is not an example of trend analysis. Trend analysis focuses on temporal patterns (time series), while SNA is structural and relational.

Option C: Correct. SNA investigates structures such as communities, influencers, and information diffusion in networks.

Option D: Correct. The characterization of nodes and edges is central to SNA.

Option E: Incorrect, since we've identified Option B as false.

Thus, the false statement is Option B.
