Google Cloud Certified - Professional Google Workspace Administrator Sample Questions (Q46-Q51):

NEW QUESTION # 46

Your company uses a whitelisting approach to manage third-party apps and add-ons. The Senior VP of Sales & Marketing has urgently requested access to a new Marketplace app that has not previously been vetted. The company's Information Security policy empowers you, as a Google Workspace admin, to grant provisional access immediately if all of the following conditions are met:

- Access to the app is restricted to specific individuals by request only.
 - The app does not have the ability to read or manage emails.
 - Immediate notice is given to the Infosec team, followed by the submission of a security risk analysis report within 14 days.
- Which actions should you take first to ensure that you are compliant with Infosec policy?

- A. Add the Marketplace app, then review the authorized scopes in Security > Manage API client access.
- B. Confirm that the Senior VP's OU has the following Gmail setting disabled before whitelisting the app: "Let users delegate access to their mailbox."
- C. Move the Senior VP to a sub-OU before enabling Marketplace Settings > "Allow Users to Install Any App from Google Workspace Marketplace."
- D. Search the Google Workspace support forum for feedback about the app to include in the risk analysis report.

Answer: A

NEW QUESTION # 47

Your organization needs an approval application for purchases where a user can enter information on the purchase required and then submit it for management approval. You need to suggest a solution to create the application that must be available on both the web and mobile devices. Your organization does not have software developers or the budget to hire a third party. What should you do?

- A. Suggest the organization use AppSheet to create the application.
- B. Suggest that the organization develop an application internally with a database, a backend service for data retrieval, and a frontend service for the application's user interface.
- C. Suggest that the organization use AppScript to create forms linked to a Google Sheet to store the purchase data.
- D. Suggest that the organization continue to approve requests manually until budget is available to use a third-party application provider.

Answer: A

Explanation:

AppSheet is a no-code platform that allows users to create custom applications without the need for software development skills. It is capable of building applications that can be used both on the web and mobile devices.

AppSheet would allow the organization to create the approval application efficiently, meeting the requirements of the purchase process, and would be a cost-effective solution that does not require hiring developers or using a third-party application provider.

NEW QUESTION # 48

You work for a midsize organization. Your compliance and audit team sees that users are frequently resetting their passwords. You must provide accurate information and ensure that the compliance team is informed every time a user changes their password. What should you do?

- A. Check the User's password changed alert in the alert center and include the compliance team in the email notifications.
- B. Enable user account recovery and forward any alert to the compliance team through the alert center.
- C. Create a new alert by using user log events and check that event Login type is Google password and include the compliance team in the email notifications.
- D. Disable user account recovery so users must contact you before a reset.

Answer: A

Explanation:

Step by Step Comprehensive Detailed Explanation:

- * Access the Admin Console: Sign in to your Google Admin console.
- * Navigate to the Alert Center: Click on "Security" and then "Alert Center."
- * Create New Alert: In the Alert Center, click on "Manage alerts" and then "Add alert rule."
- * Configure Alert Rule: Select "User's password changed" as the event type.
- * Include Compliance Team: In the alert configuration, add the compliance team's email addresses to the notification recipients.
- * Save the Alert: Save the configuration to ensure the compliance team is informed every time a user changes their password.

NEW QUESTION # 49

You received this email from the head of marketing:

Hello Workspace Admin:

Next week, a new consultant will be starting on the "massive marketing mailing" project. We want to ensure that they can view contact details of the rest of the marketing team, but they should not have access to view contact details of anyone else here at our company. Is this something that you can help with?

What are two of the steps you need to perform to fulfill this request?

Choose 2 answers

- A. Create a group that includes the contacts that the consultant is allowed to view.
- B. Apply the role of owner to the consultant in the group settings.
- C. Create an isolated OU for the consultants who need the restricted contacts access.
- D. Create the consultant inside under the marketing OU.
- E. Ensure that you are assigned the Administrator Privilege of Services > Services settings, and ensure that Services > Contacts > Contacts Settings Message is set.

Answer: A,C

NEW QUESTION # 50

Employees at your organization frequently and mistakenly delete important emails that they receive from your payroll department. The employees have to file support tickets for the IT team to find and restore these emails. You must provide an automated solution that minimizes IT overhead and prevents these emails from being permanently deleted from their inboxes. What should you do?

- A. Create a content compliance rule that targets all internal messages that are sent from the payroll department. Modify the message by prepending a custom subject line to all payroll emails so that employees know not to delete them.
- B. Create a content compliance rule that targets internal messages. Use an advanced content match for the sender header to match the payroll department's email. Quarantine the message so that administrators can review the email before they release it to the user.
- C. Create an Apps Script project that uses the Gmail API to find any recently deleted emails and automatically restore them to the inboxes. Set the script trigger to be time-driven and run every hour.
- D. Create an activity rule by using Gmail log events with two conditions: one for the event of an email deletion and another that matches the header address to the payroll department's email. Create an action that restores messages. Set the rule to run every hour.

Answer: D

NEW QUESTION # 51

.....

The Google Google-Workspace-Administrator exam questions formats are PDF dumps files, desktop practice test software, and web-based practice test software. All these Google-Workspace-Administrator exam questions format hold some common and unique features.
