

# 100% Pass Quiz Fortinet - NSE6\_OT\_AR-7.6 - Fortinet NSE 6 - OT Security 7.6 Architect–Efficient Reliable Braindumps Sheet

To some extent, to pass the NSE6\_OT\_AR-7.6 exam means that you can get a good job. The NSE6\_OT\_AR-7.6 exam materials you master will be applied to your job. The possibility to enter in big and famous companies is also raised because they need outstanding talents to serve for them. Our NSE6\_OT\_AR-7.6 Test Prep is compiled elaborately and will help the client a lot. To get a better and full understanding of our NSE6\_OT\_AR-7.6 quiz torrent, please read the introduction of the features and the advantages of our product as follow.

Fortinet NSE6\_OT\_AR-7.6 dumps PDF version is printable and embedded with valid Fortinet NSE6\_OT\_AR-7.6 questions to help you get ready for the NSE6\_OT\_AR-7.6 exam quickly. Fortinet NSE 6 - OT Security 7.6 Architect (NSE6\_OT\_AR-7.6) exam dumps pdf are also usable on several smart devices. You can use it anywhere at any time on your smartphones and tablets. We update our Fortinet NSE6\_OT\_AR-7.6 Exam Questions bank regularly to match the changes and improve the quality of NSE6\_OT\_AR-7.6 questions so you can get a better experience.

## High Pass-Rate Fortinet - NSE6\_OT\_AR-7.6 - Fortinet NSE 6 - OT Security 7.6 Architect Reliable Braindumps Sheet

With ActualTestsQuiz, you can trust that you're accessing authentic and error-free NSE6\_OT\_AR-7.6 exam practice questions. These questions are available in three different formats: PDF questions files, desktop practice test software, and web-based practice test software. All three formats contain genuine NSE6\_OT\_AR-7.6 Practice Questions that will effectively prepare you for the final exam.

### Fortinet NSE6\_OT\_AR-7.6 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Asset management: Covers understanding OT standards and how Fortinet aligns with compliance requirements in industrial environments. It also includes using the Fortinet Security Fabric to manage assets and implementing device detection using FortiGate and FortiNAC.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Network access control: Focuses on OT Ethernet fundamentals and designing secure network segmentation strategies. It also includes configuring authentication methods to control and verify access to the OT network.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Network security: Explains how to apply security inspections specifically for industrial protocols and implement virtual patching to protect vulnerable systems. It also includes configuring automation to enhance threat response and operational efficiency.</li> </ul>

Topic 4	<ul style="list-style-type: none"><li>• <b>Monitoring and risk assessment:</b> Covers creating event handlers in FortiAnalyzer to monitor network activity and detect threats. It also includes performing risk assessments and analyzing security reports to support ongoing risk management.</li></ul>
---------	--

## Fortinet NSE 6 - OT Security 7.6 Architect Sample Questions (Q117-Q122):

### NEW QUESTION # 117

You want to protect OT devices that are not updated against known vulnerabilities so you apply virtual patching to the firewall policies. What must you check to confirm that the OT devices are virtually patched?

(Choose one answer)

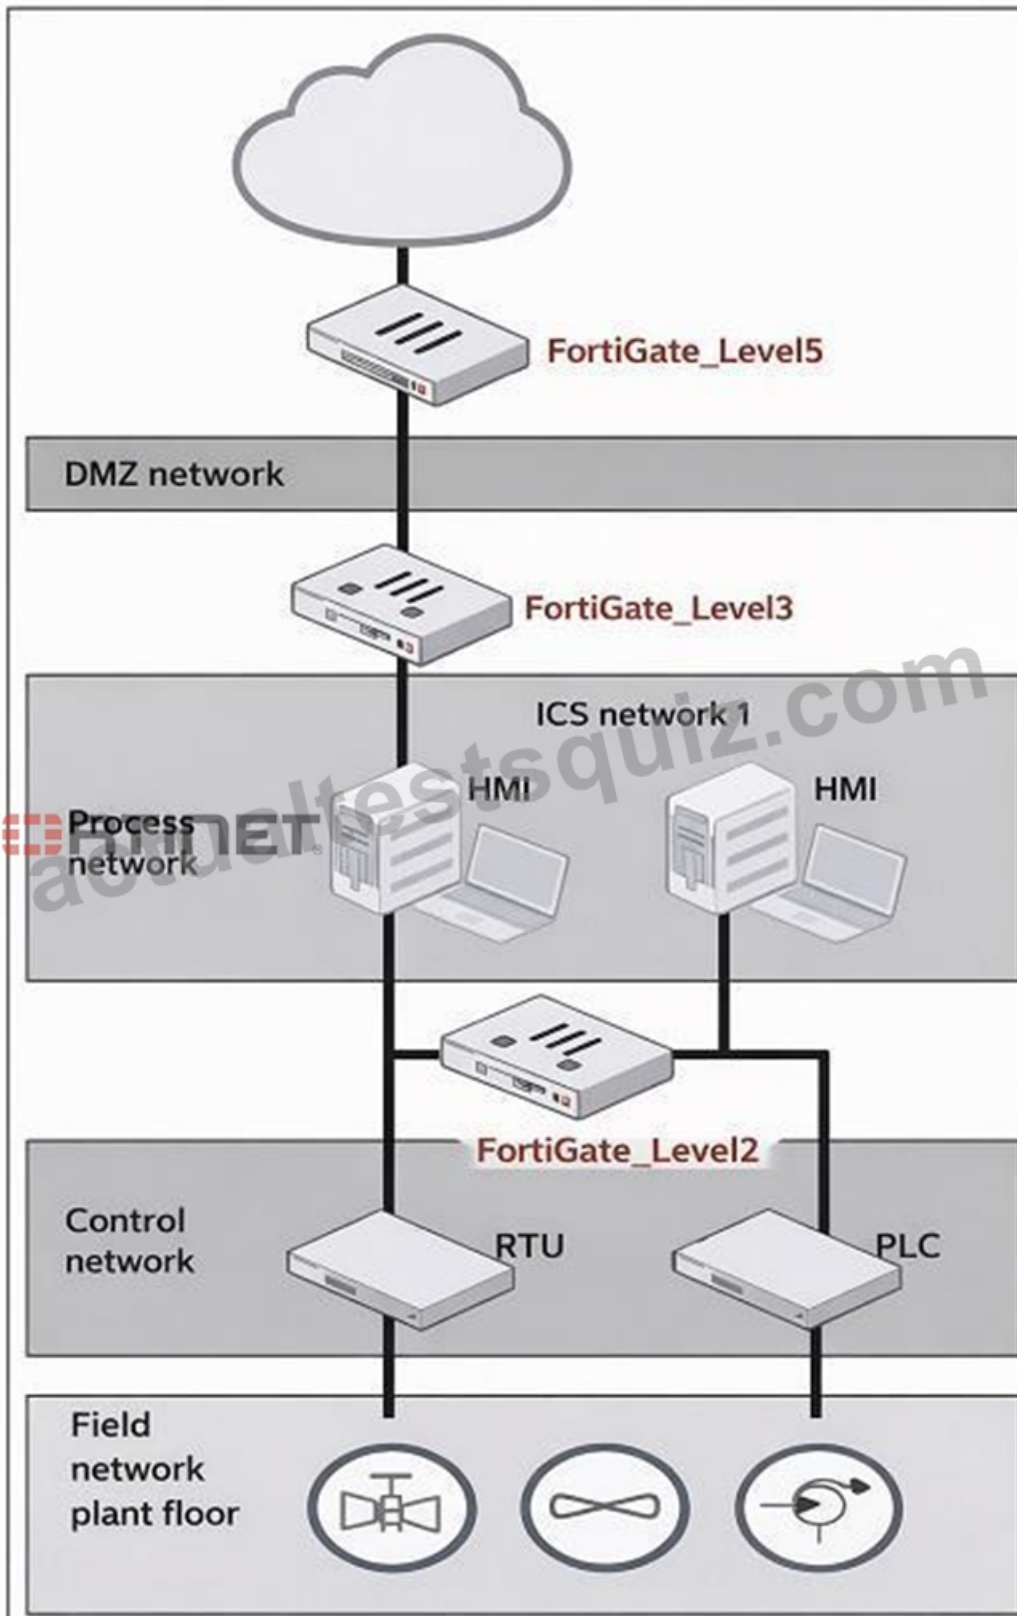

- **A. The output of the CLI command `get rule otvp status`**
- B. The output of the CLI command `get virtual-patch profile`
- C. The Asset Identity List page
- D. The OT View page

**Answer: A**

### NEW QUESTION # 118

Refer to the exhibit. A partial OT network is shown.

## Partial OT network

In this OT network, you must add additional security measures to detect OT protocols and, therefore, increase the traffic visibility. Which security sensor must you implement to detect the OT protocols in this network? (Choose one answer)

- A. IPS sensor on FortiGate Level5
- B. Inline IDS on FortiGate\_Level3
- C. Device detection on all the FortiGate interfaces

- D. Application sensor set to monitor on all the FortiGate devices

Answer: D

### NEW QUESTION # 119

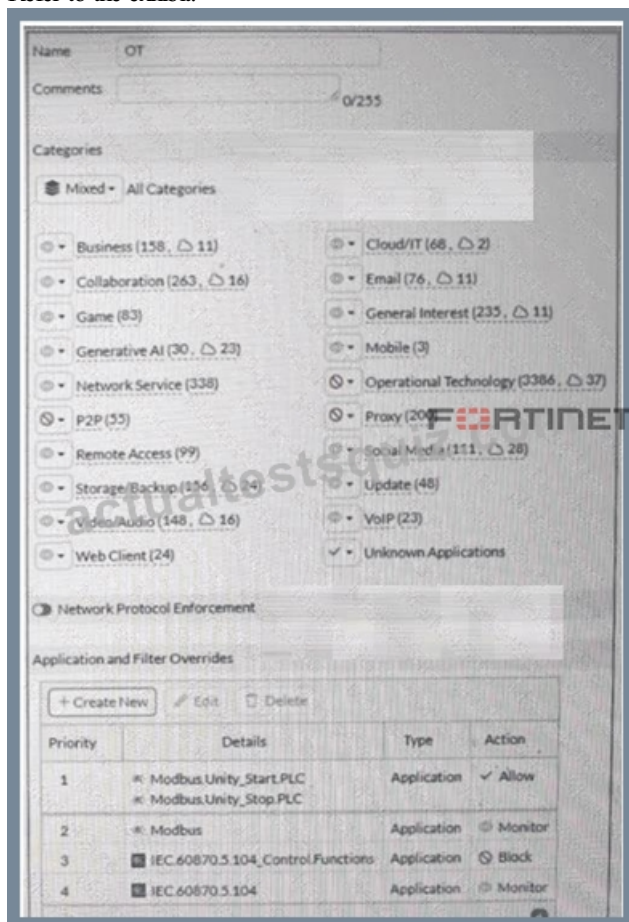

Which three criteria can a FortiGate device use to look for a matching firewall policy to process traffic? (Choose three.)

- A. Lowest to highest policy ID number
- B. Highest to lowest priority defined in the firewall policy
- C. Source defined as internet services in the firewall policy
- D. Services defined in the firewall policy.
- E. Destination defined as internet services in the firewall policy

Answer: C,D,E

### NEW QUESTION # 120

Refer to the exhibit.

A partial Application Sensor profile is shown. When you apply this profile in a firewall policy, which two statements are correct? (Choose two answers)

- A. All OT protocols are blocked.
- B. OT signatures are enabled.
- C. A log is provided for each Modbus command.
- D. A log is provided for each IEC command.

Answer: B,D

Explanation:

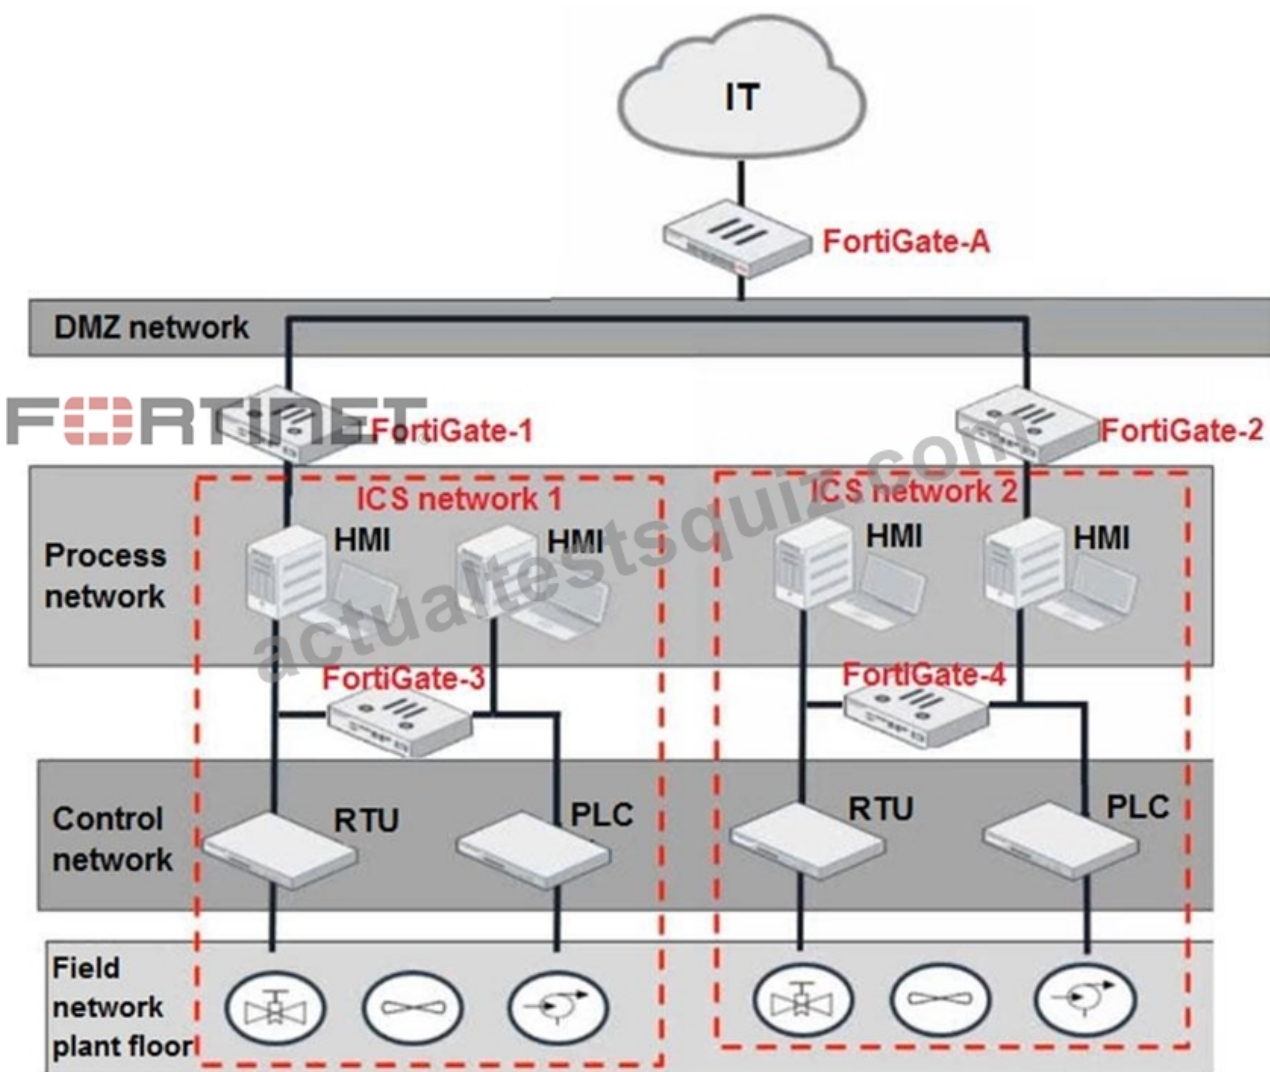

The correct answers are A and C .

Option C is correct because the profile clearly contains the Operational Technology category and specific OT application signatures

such as Modbus and IEC.60870.5.104 . The study guide says "You can use application control signatures to detect OT protocols" and "You can filter to a specific OT protocol." That means OT application signatures are active in this sensor profile. Option A is correct because the guide explains that application control works at different levels: "Detection of protocol (one detection per session)" and "Message level (one detection per protocol message)." It also says you can use application signatures for "granular message type identification." In the exhibit, IEC.60870.5.104.Control.Functions is explicitly configured, which is a granular IEC message/control-level signature rather than only a protocol-level match. That means logging and control can occur at the IEC command level. Option B is not correct because the profile shows Modbus configured at the parent protocol level as Monitor , while the guide states that the "parent signature takes precedence over the child signature." Since protocol-level detection is one detection per session , that does not mean FortiGate will necessarily log each Modbus command individually. Option D is incorrect because even though the broader Operational Technology category is set to block, the profile includes specific application and filter overrides for Modbus and IEC 104 behavior. So the resulting effect is not simply that all OT protocols are blocked .

**NEW QUESTION # 121**

Refer to the exhibit. Based on the topology designed by the OT architect, which two statements about implementing OT security are true? (Choose two.)

- A. IT and OT networks are separated by segmentation.
- B. Firewall policies should be configured on FortiGate-3 and FortiGate-4 with industrial protocol sensors.
- C. Micro-segmentation can be achieved only by replacing FortiGate-3 and FortiGate-4 with a pair of FortiSwitch devices.
- D. FortiGate-3 and FortiGate-4 devices must be in a transparent mode.

**Answer: A,B**

Explanation:

Segmentation separates the IT side from the OT zones in the diagram. FortiGate-3 and FortiGate-4 sit closest to PLC/RTU traffic, so their policies must use industrial protocol sensors to inspect and control those OT flows.

## NEW QUESTION # 122

.....

Don't let the Fortinet NSE 6 - OT Security 7.6 Architect exam stress you out! Prepare with our NSE6\_OT\_S\_AR-7.6 exam dumps and boost your confidence in the NSE6\_OT\_S\_AR-7.6 exam. We guarantee your road toward success by helping you prepare for the NSE6\_OT\_S\_AR-7.6 exam. Use the best Fortinet NSE6\_OT\_S\_AR-7.6 practice questions to pass your NSE6\_OT\_S\_AR-7.6 Exam with flying colors! In this way, the Fortinet NSE 6 - OT Security 7.6 Architect certified professionals can not only validate their skills and knowledge level but also put their careers on the right track. By doing this you can achieve your career objectives.
