Over this long time period countless Adobe AD0-E724 Exam candidates have passed their dream Adobe AD0-E724 certification and doing jobs in the world's top brands.

Adobe Commerce Developer Professional Sample Questions (Q140-Q145):

NEW QUESTION # 140

A product has been added to the Adobe Commerce Store, and it contains a value for the custom product attribute. A merchant reports that the attribute value is not displayed in the Additional Information tab on the product detail page. Which action will correct this problem?

- A. The attribute property "Use in Product Tab" must be set to "yes"
- B. The attribute must be moved to the specific group in the attribute set
- **C. The attribute property "Visible on Catalog Pages on Storefront" must be set to "yes".**

Answer: C

Explanation:

The "Visible on Catalog Pages on Storefront" attribute property determines whether or not the attribute value is displayed in the Additional Information tab on the product detail page. If this property is set to "no", the attribute value will not be displayed. For a custom product attribute to be displayed in the Additional Information tab on the product detail page in Magento, it needs to be visible on the catalog pages on the storefront. This visibility is controlled by the attribute property "Visible on Catalog Pages on Storefront". When this property is set to "yes", Magento includes the attribute in the Additional Information tab, making it visible to

customers browsing the product.

This setting ensures that only relevant and intended attributes are shown on the storefront, allowing for better product information management and customer experience.

NEW QUESTION # 141

Which two actions will the developer need to take to translate strings added in JS files? (Choose two.)

- A. `define ([
 'jquery',
 'mage/translate'
], function ($, $t) {."`
- B. `$.mage.__('<string>');`
- C. `$ trans(,<string>')`
- D. `translate('<string>');`

Answer: A,D

Explanation:

To translate strings added in JavaScript files in Adobe Commerce, developers need to use the `mage/translate` RequireJS module along with the `$.mage.__('<string>')` function to mark strings for translation. This approach ensures that any text strings embedded within JavaScript code can be localized according to the store's current locale, providing a consistent and accessible user experience across different languages and regions. The `mage/translate` module and the `$.mage.__()` function work together to retrieve the corresponding translated strings from Magento's translation dictionaries, dynamically replacing the original text in the JavaScript code with the appropriate translations.

NEW QUESTION # 142

Which two recommended practices would a developer use on an Adobe Commerce Cloud Enhanced Integration Environment to get the best performance? (Choose two.)

- A. Restrict catalog size
- B. Remove all of the integration's inactive branches.
- C. Disable cron and manually run as needed
- D. Enable fastly CDN

Answer: B,D

Explanation:

On an Adobe Commerce Cloud Enhanced Integration Environment, enabling Fastly CDN (Content Delivery Network) can significantly improve performance by caching content closer to the user's location, reducing load times. Additionally, removing all of the integration's inactive branches helps to optimize the environment by decluttering and focusing resources on active development. Restricting catalog size may not be feasible or desirable, and disabling cron jobs can disrupt necessary background operations unless specifically needed for performance testing or troubleshooting.

NEW QUESTION # 143

A developer has informed the Adobe Support team about a planned traffic surge on an Adobe Commerce Cloud project that will take place in a little over 48 hours.

What is an advantage of this prior notice?

- A. The Support team will monitor the website during that time
- B. The project will temporarily use an upgraded Fastly plan
- C. When the traffic arrives, extra server resources will be available.

Answer: A

Explanation:

Informing the Adobe Support team about a planned traffic surge allows them to monitor the website during that time. With prior notice, the support team can ensure that they are prepared to quickly respond to any issues that arise due to the surge. While extra server resources or an upgraded Fastly plan may be possible outcomes, the primary advantage of advance notice is proactive

monitoring and support during expected high traffic events.

NEW QUESTION # 144

A developer would like to initialize a theme in Adobe Commerce. Which two files are required to complete this task? (Choose two.)

- A. theme.less
- B. themexml
- C. composerjson
- D. registration.php

Answer: C,D

Explanation:

To initialize a theme in Adobe Commerce, at least two files are required: registration.php and theme.xml. The registration.php file is used to register the theme within the system, and theme.xml defines the theme's name, parent (if any), and other metadata. The theme.less file is not required for theme initialization but may be used for custom styling. The correct option for theme.xml is represented as "theme.xml" (D), not "themexml" as mentioned in the options.

NEW QUESTION # 145

.....

Our AD0-E724 real dumps has received popular acceptance worldwide with tens of thousands of regular exam candidates who trust our proficiency. Up to now, the passing rate is 98 to 100 percent. What made our AD0-E724 study guide so amazing? The answer that we only supply the latest and valid AD0-E724 Exam Braindumps for our customers and first-class after-sales services come after the first-class AD0-E724 learning engine. We're also widely praised by our perfect services.
