Download Real 350-701 questions today and start your journey to success.

Cisco Implementing and Operating Cisco Security Core Technologies Sample Questions (Q572-Q577):

NEW QUESTION # 572

An organization uses Cisco FMC to centrally manage multiple Cisco FTD devices. The default management port conflicts with other communications on the network and must be changed. What must be done to ensure that all devices can communicate together?

- A. Set the sftunnel to go through the Cisco FTD
- **B. Manually change the management port on Cisco FMC and all managed Cisco FTD devices**
- C. Set the sftunnel port to 8305.
- D. Change the management port on Cisco FMC so that it pushes the change to all managed Cisco FTD devices

Answer: B

Explanation:

The management port on Cisco FMC is used to establish a secure connection with the managed Cisco FTD devices. If the default management port (8305) conflicts with other communications on the network, it must be changed on both the Cisco FMC and the Cisco FTD devices. This cannot be done automatically by the Cisco FMC, as it would lose connectivity with the devices. Therefore, the administrator must manually change the management port on the Cisco FMC and all the managed Cisco FTD devices using the command line interface (CLI). The steps to change the management port are as follows:

* Log into the CLI of the Cisco FMC and the Cisco FTD devices using a console connection or SSH.

* Enter the configure network {ipv4 | ipv6} manual ip_address netmask data-interfaces command to change the management port on the Cisco FMC. For example, configure network ipv4 manual 10.10.10.10 255.255.255.0 data-interfaces changes the management port to 10.10.10.10/24.

* Enter the configure network {ipv4 | ipv6} manual ip_address netmask gateway management-only command to change the management port on the Cisco FTD devices. For example, configure network ipv4 manual 10.10.10.11 255.255.255.0 10.10.10.10 management-only changes the management port to 10.10.10.11/24 and sets the gateway to the Cisco FMC's management port.

* Save the configuration and restart the Cisco FMC and the Cisco FTD devices.

* Verify the connectivity between the Cisco FMC and the Cisco FTD devices using the show managers command on the Cisco FTD devices and the show devices command on the Cisco FMC.

NEW QUESTION # 574

What is a prerequisite when integrating a Cisco ISE server and an AD domain?

- A. Place the Cisco ISE server and the AD server in the same subnet
- **B. Synchronize the clocks of the Cisco ISE server and the AD server**
- C. Configure a common administrator account
- D. Configure a common DNS server

Answer: B

Explanation:

The following are the prerequisites to integrate Active Directory with Cisco ISE. + Use the Network Time Protocol (NTP) server settings to synchronize the time between the Cisco ISE server and Active Directory. You can configure NTP settings from Cisco ISE CLI. + If your Active Directory structure has multidomain forest or is divided into multiple forests, ensure that trust relationships exist between the domain to which Cisco ISE is connected and the other domains that have user and machine information to which you need access. For more information on establishing trust relationships, refer to Microsoft Active Directory documentation. + You must have at least one global catalog server operational and accessible by Cisco ISE, in the domain to which you are joining Cisco ISE. Reference: https://www.cisco.com/c/en/us/td/docs/security/ise/2-0/ise_active_directory_integration/b_ISE_AD_integration_2x.html#reference_8DC463597A644A5C9CF5D582B77BB24F

NEW QUESTION # 575

A network administrator is configuring a rule in an access control policy to block certain URLs and selects the "Chat and Instant Messaging" category. Which reputation score should be selected to accomplish this goal?

- A. 0
- B. 1
- **C. 2**
- D. 3

Answer: C

Explanation:

We choose "Chat and Instant Messaging" category in "URL Category":

Edit Action

Quarantine
Encrypt on Delivery
Strip Attachment by Content
Strip Attachment by File Info
URL Category
URL Reputation
Add Disclaimer Text
Bypass Outbreak Filter Scanning
Bypass DKIM Signing
Send Copy (Bcc):
Notify
Change Recipient to
Send to Alternate Destination Host
Deliver from IP Interface
Strip Header
Add/Edit Header
Add Message Tag
Add Log Entry
S/MIME Sign/Encrypt on Delivery
Encrypt and Deliver Now (Final Action)
S/MIME Sign/Encrypt (Final Action)
Bounce (Final Action)
Skip Remaining Content Filters (Final Action)
Drop (Final Action)

URL Category Help

Does any URL in the message body or subject belong to one of the selected categories?

Available Categories:

- Advertisements
- Alcohol
- Arts
- Astrology
- Auctions
- Business and Industry
- Chat and Instant Messaging**
- Cheating and Plagiarism
- Computer Security
- Computers and Internet

Selected Categories:

- Adult
- Child Abuse Content
- Illegal Activities
- Illegal Downloads
- Illegal Drugs

Use a URL whitelist: None

Action on URL:

- ☒ Defang URL
- ☐ Redirect to Cisco Security Proxy
- ☐ Replace URL with text message

Perform Action for:

- ☒ All messages
- ☐ Unsigned messages

To block certain URLs we need to choose URL Reputation from 6 to 10.

Edit Condition

Message Body or Attachment
Message Body
