SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q40-Q45):

NEW QUESTION # 40

Where is the initial list of known integrations documented?

- A. In the Fit-to-Standard Workshops
- B. In the Digital Discovery Assessment
- C. In the Business Driven Configuration Questionnaire
- D. In SAP Cloud ALM

Answer: C

Explanation:

The initial list of known integrations is documented in the Business Driven Configuration Questionnaire (BDCQ). The BDCQ is a tool that helps you to capture the business requirements and scope of your SAP S/4HANA Cloud Public Edition project. It contains a series of questions that cover different aspects of your business processes, such as organizational structure, master data, configuration settings, and integration scenarios. The BDCQ also provides guidance on the best practices and recommendations for your project¹².

One of the sections in the BDCQ is the Integration section, where you can document the initial list of known integrations that are relevant for your project. The Integration section contains questions about the integration scenarios that you want to enable, such as cross-system process integration, data replication, data migration, and third-party integration. The Integration section also provides information on the available integration options, such as SAP Cloud Platform Integration, SAP API Business Hub, and SAP Cloud ALM¹³.

The initial list of known integrations is important for your project, as it helps you to identify the integration requirements, dependencies, and risks that need to be considered in the project planning and execution. The initial list of known integrations also helps you to select the appropriate integration tools and methods, and to align the integration scope with the SAP S/4HANA Cloud Public Edition roadmap and release cycles¹³.

Therefore, the correct answer is A, as the initial list of known integrations is documented in the BDCQ. ISA-M supports different integration scenarios, such as cloud-to-cloud, cloud-to-on-premise, and hybrid integration. ISA-M also provides tools and templates to facilitate the integration process, such as the Integration Assessment Questionnaire, the Integration Architecture Document, and the Integration Test Plan.
