Based on the credibility in this industry, our CCDAK study braindumps have occupied a relatively larger market share and stable sources of customers. Such a startling figure --99% pass rate is not common in this field, but we have made it with our endless efforts. As this new frontier of personalizing the online experience advances, our CCDAK exam guide is equipped with comprehensive after-sale online services. It's a convenient way to contact our staff, for we have customer service people 24 hours online to deal with your difficulties. If you have any question or request for further assistance about the CCDAK study braindumps, you can leave us a message on the web page or email us.

Confluent CCDAK certification exam is a comprehensive exam that covers all aspects of Kafka development, including Kafka architecture, Kafka producers and consumers, Kafka Streams, Kafka Connect, Confluent Platform, and Kafka Security. CCDAK exam is designed to test the candidate's ability to build Kafka-based applications using Confluent Platform, and their ability to troubleshoot and optimize Kafka applications.

The CCDAK certification exam is an online, proctored exam that consists of multiple-choice questions and hands-on exercises. CCDAK Exam is designed to be challenging, but fair, and is intended to test the knowledge and skills of developers who have experience working with Kafka. CCDAK exam is available to anyone who meets the prerequisites, which include experience working with Kafka and a solid understanding of distributed systems and programming concepts. The CCDAK certification exam is an excellent way for developers to demonstrate their expertise in Kafka and differentiate themselves in a competitive job market.

Our company according to the situation reform on conception, question types, designers training and so on. Our latest CCDAK exam torrent was designed by many experts and professors. You will have the chance to learn about the demo for if you decide to use our CCDAK quiz prep. We can sure that it is very significant for you to be aware of the different text types and how best to approach them by demo. At the same time, our CCDAK Quiz torrent has summarized some features and rules of the cloze test to help customers successfully pass their exams. More importantly, you have the opportunity to get the demo of our latest CCDAK exam torrent for free, yes, you read that right, and our demo is free. So why still hesitate?

Apache Kafka has emerged as the leading distributed streaming platform in the IT industry, enabling businesses to handle real-time data feeds, messaging, and stream processing. The Confluent Certified Developer for Apache Kafka (CCDAK) certification examination is an industry-recognized validation of one's knowledge and experience with the Kafka platform. It is intended for developers who work with Kafka and have a thorough understanding of its architecture, design, configuration, and management.

Confluent Certified Developer for Apache Kafka Certification Examination Sample Questions (Q21-Q26):

NEW QUESTION # 21

You are using JDBC source connector to copy data from 2 tables to two Kafka topics. There is one connector created with `max.tasks` equal to 2 deployed on a cluster of 3 workers. How many tasks are launched?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: A

Explanation:

we have two tables, so the max number of tasks is 2

NEW QUESTION # 22

You are working on a Kafka cluster with three nodes. You create a topic named `orders` with:

`replication.factor = 3`

`min.insync.replicas = 2`

`acks = all` What exception will be generated if two brokers are down due to network delay?

- A. `NotEnoughReplicasException`
- B. `NotCoordinatorException`
- C. `NotLeaderForPartitionException`
- D. `NetworkException`

Answer: A

Explanation:

With `acks=all` and `min.insync.replicas=2`, Kafka requires at least two in-sync replicas to acknowledge a write.

If only one broker is alive, the condition fails, and `NotEnoughReplicasException` is thrown by the producer.

From Kafka Producer Exception Docs:

"`NotEnoughReplicasException` is thrown when the number of in-sync replicas is insufficient to satisfy `acks=all` with `min.insync.replicas`." `NetworkException` is generic and not raised here.

`NotCoordinatorException` is related to consumer group coordination.

`NotLeaderForPartitionException` is unrelated unless accessing an unassigned leader.

Reference: Kafka Producer Error Handling

NEW QUESTION # 23

Which configuration is used to determine which directory the connectors are stored in?

- A. group.id
- **B. plugin.path**
- C. status.storage.topic
- D. offset.storage.topic

Answer: B

NEW QUESTION # 24

A topic has three replicas and you set min.insync.replicas to 2. If two out of three replicas are not available, what happens when a produce request with acks=all is sent to broker?

- A. Produce request is honored with single in-sync replica
- **B. NotEnoughReplicasException will be returned**
- C. Produce request will block till one of the two unavailable partition is available again.

Answer: B

Explanation:

With this configuration, a single in-sync replica becomes read-only. Produce request will receive NotEnoughReplicasException.

NEW QUESTION # 25

What Java library is KSQL based on?

- A. REST Proxy
- B. Kafka Connect
- C. Schema Registry
- **D. Kafka Streams**

Answer: D

Explanation:

KSQL is based on Kafka Streams and allows you to express transformations in the SQL language that get automatically converted to a Kafka Streams program in the backend
