

Topic 1	<ul style="list-style-type: none"> Install and Configure the Wired Network Solution: This domain evaluates the abilities of Network Engineers to provision and configure HPE Aruba Networking switches both via Aruba Networking Central and command-line interface. It covers physical switch setup, Layer 2 and Layer 3 configuration and validation, multicast features, security implementations, quality of service (QoS) settings, and integration of Aruba Networking solutions into existing environments.
Topic 2	<ul style="list-style-type: none"> Create the Implementation Plan for the Wired Network Solution: This section measures the skills of Network Designers who focus on understanding the HPE switching portfolio and selecting the right products to match various customer requirements. Candidates must also demonstrate the ability to create detailed and effective implementation plans based on given designs or customer scenarios to ensure successful wired network deployments.
Topic 3	<ul style="list-style-type: none"> Manage, Maintain, Optimize, and Monitor the Wired Network Solution: This part measures the skills of Network Operations Engineers in managing and maintaining wired network infrastructures. It includes developing configuration management strategies, interpreting network operational data to make informed decisions, and programmatically auditing or configuring Aruba Networking switches to optimize performance and reliability.
Topic 4	<ul style="list-style-type: none"> Troubleshoot the Wired Network Solution: Candidates in this section, typically Network Support Specialists, are tested on identifying common wired network failures such as IP or VLAN mismatches, hardware issues, or port misconfigurations. It also involves analyzing performance problems caused by QoS or configuration errors and formulating effective remediation plans to restore correct network operations.

HPE7-A08 Lead2pass, HPE7-A08 Examcollection Free Dumps

We provide well-curated question answers for HPE7-A08 at ActualVCE. We take 100% responsibility for validity of HPE7-A08 questions dumps. If you are using our HPE7-A08 Exam Dumps for HPE7-A08, you will be able to pass the any HPE7-A08 exam with high marks.

HPE Aruba Networking Switching Professional Exam Sample Questions (Q52-Q57):

NEW QUESTION # 52

Your network monitoring system has issued a critical alert indicating that the ISL between two VSX core switches is down. What can you determine from the log output below?

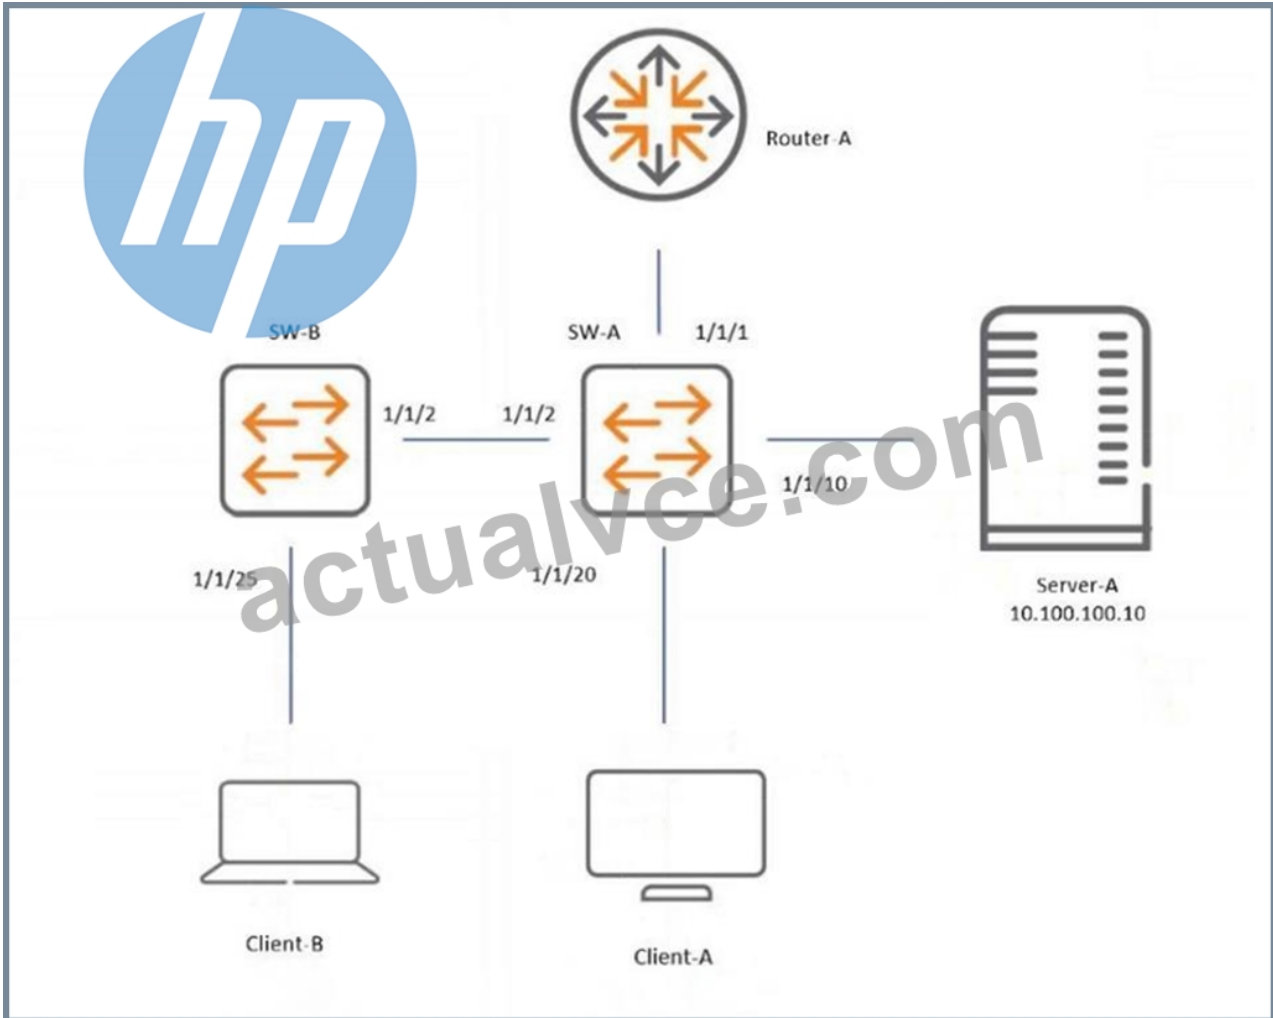

```
Core-2# show logging -r 30 -include vsx
2024-04-04T08:35:36.312754+00:00 Core-2 hpe-vsxd[2167]: Event[7014]LOG_INFO|AMM|1/1|VSX 2 state local down, remote down
2024-04-04T08:35:36.300706+00:00 Core-2 hpe-vsxd[2167]: Event[7014]LOG_INFO|AMM|1/1|VSX 5 state local down, remote down
2024-04-04T08:35:36.257432+00:00 Core-2 hpe-vsxd[2167]: Event[7020]LOG_INFO|AMM|1/1|ISL out-of-sync and keepalive is in established
2024-04-04T08:35:36.254765+00:00 Core-2 hpe-vsxd[2167]: Event[7006]LOG_INFO|AMM|1/1|VSX Keepalive succeeded
2024-04-04T08:35:35.594193+00:00 Core-2 vsx-syncd[8800]: Event[7802]LOG_INFO|AMM|-|Configuration sync update : VSX Inter-Switch-Link is down.
2024-04-04T08:35:35.575153+00:00 Core-2 hpe-vsxd[2167]: Event[7011]LOG_INFO|AMM|1/1|VSX 5 state local up, remote down
2024-04-04T08:35:35.570479+00:00 Core-2 hpe-vsxd[2167]: Event[7011]LOG_INFO|AMM|1/1|VSX 2 state local up, remote down
2024-04-04T08:35:35.566540+00:00 Core-2 hpe-vsxd[2167]: Event[7014]LOG_INFO|AMM|1/1|VSX 1 state local down, remote down
2024-04-04T08:35:35.559596+00:00 Core-2 hpe-vsxd[2167]: Event[7004]LOG_ERR|AMM|1/1|VSX ISL port lag256 is Out-Of-Sync with the peer; link is down
2024-04-04T08:35:35.559336+00:00 Core-2 hpe-vsxd[2167]: Event[7015]LOG_INFO|AMM|1/1|VSX ISL: sliding window parameters are reset
```

- A. Core-2 has disabled its VSX LAG interfaces.
- B. Downstream switches are not able to forward traffic.
- C. Both switches are forwarding traffic over VSX LAGs.
- D. Keepalive packets are being dropped.

Answer: A

NEW QUESTION # 53

Refer to the exhibit.

SW-A is the layer-3 gateway for:

Server-A in VLAN 100, subnet 10.100.100.0/24

Client-A in VLAN 20, subnet 10.100.20.0/24

Client-B VLAN 30, subnet 10.100.30.0/24

What can be done to trust DHCP server 10.100.100.10 responses on SW-A for clients in VLAN 20?

- A. Enable dhcpv4-snooping and authorized-server 10.100.100.10 globally
- **B. Enable dhcpv4-snooping authorized-server 10.100.100.10 on VLAN 20**
- C. Enable dhcpv4-snooping trust 10.100.100.10 on VLAN 100
- D. Enable dhcpv4-snooping authorized-server 10.100.100.10 on VLAN 100

Answer: B

Explanation:

DHCP snooping validates DHCP server replies per VLAN.

To allow VLAN 20 clients to accept DHCP offers from a DHCP server located in another VLAN, the DHCP server's IP address must be explicitly authorized under the VLAN where the clients reside.

Authorizing the server under VLAN 20 ensures that SW-A recognizes DHCP responses from 10.100.100.10 as trusted for that VLAN.

NEW QUESTION # 54

Which AOS-CX feature is used to prevent head-on-line (HOL) blocking?

- A. VSX
- B. VSF

- C. VOQ
- D. WFQ

Answer: C

NEW QUESTION # 55

A network engineer is examining NAE graphs from the Dashboard but notices that the time shown in the graph does not represent the current time. The engineer verifies that the AOS-CX switch is configured for NTP and is successfully synchronized. What should be done to fix this issue?

- A. Ensure the engineer's web browser is configured for the same timezone as the AOS-CX switch
- B. Ensure the engineer's PC is synchronized to the same NTP server as the AOS-CX switch
- C. Ensure NetEdit and the AOS-CX switch are synchronized to the same NTP server
- D. Enable trust settings for the AOS-CX switch's SSL certificate

Answer: B

Explanation:

Make sure your desktop time and the switch's time is synched from the same NTP server.

NEW QUESTION # 56

Which CLI command enables API access on an Aruba CX switch for automation?

- A. apply automation api
- B. https-server rest enable
- C. set rest-api enable
- D. enable api access

Answer: B

Explanation:

The https-server rest enable command activates the REST API, allowing integration with automation tools such as Ansible, Python scripts, and third-party management platforms.

NEW QUESTION # 57

.....

Although the HPE7-A08 exam prep is of great importance, you do not need to be over concerned about it. With scientific review and arrangement from professional experts as your backup, and the most accurate and high quality content of our HPE7-A08 Study Materials, you will cope with it like a piece of cake. So our HPE7-A08 learning questions will be your indispensable practice materials during your way to success.
