Of course, when we review a qualifying exam, we can't be closed-door. We should pay attention to the new policies and information related to the test Microsoft certification. For the convenience of the users, the GH-300 study materials will be updated on the homepage and timely update the information related to the qualification examination. Annual qualification examination, although content broadly may be the same, but as the policy of each year, the corresponding examination pattern grading standards and hot spots will be changed, as a result, the GH-300 study materials can help users to spend the least time, you can know the test information directly what you care about on the learning platform that provided by us, let users save time and used their time in learning the new hot spot concerning about the knowledge content. It can be said that the GH-300 Study Materials greatly facilitates users, so that users cannot leave their homes to know the latest information. Trust us! I believe you will have a good experience when you use the GH-300 study materials, and you can get a good grade in the test Microsoft certification.

Microsoft GH-300 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Responsible :This section of the exam measures skills of AI Ethics Officers and Risk Managers and covers the responsible and ethical usage of AI technologies. It explains the risks and limitations associated with generative AI tools, including biases in training data and the need to validate AI outputs. Candidates learn how to operate AI responsibly by identifying potential harms such as bias, fairness, privacy concerns, and mitigating these harms by applying ethical AI principles.

Topic 2	<ul style="list-style-type: none"> Domain 6: Testing with GitHub Copilot: This section measures abilities of QA Engineers and Test Automation Specialists to use Copilot for test generation, including unit and integration tests. It explains how Copilot can identify edge cases and assist in writing assertions. The domain also covers different Copilot subscription SKUs, privacy considerations, organizational code suggestion settings, and configuration files related to Copilot.
Topic 3	<ul style="list-style-type: none"> Privacy Fundamentals and Context Exclusions: This domain focuses on Security Engineers and Compliance Officers and addresses improving code quality with Copilot's test suggestions and security optimizations. It covers identification of security vulnerabilities, performance enhancements, and privacy features like content exclusions at repository and organization levels with explanation of their limitations. Candidates learn about safeguarding mechanisms such as duplication detection, contractual protections, security checks, and troubleshooting guide for common Copilot issues including context exclusions and suggestion gaps.

Try Before You Buy Free Microsoft GH-300 Exam Questions Demos

Our GH-300 study guide is carefully edited and reviewed by our experts. The design of the content conforms to the examination outline and its key points. Through the practice of our GH-300 exam questions, you can grasp the intention of the examination organization accurately. And we also have the Software version of our GH-300 Learning Materials that can simulate the real exam which can help you better adapt to the real exam.

Microsoft GitHub Copilot Sample Questions (Q19-Q24):

NEW QUESTION # 19

How can GitHub Copilot be limited when it comes to suggesting unit tests?

- A. GitHub Copilot can handle any complexity in code and automatically generate appropriate unit tests.
- B. GitHub Copilot's limitations in generating unit tests can vary based on the IDE version you are using.
- C. GitHub Copilot can generate all types of unit tests, including those for edge cases and complex integration scenarios.
- D. GitHub Copilot primarily suggests basic unit tests that focus on core functionalities, often requiring additional input from developers for comprehensive coverage.

Answer: D

Explanation:

GitHub Copilot often suggests basic unit tests and may not cover all edge cases or complex integration scenarios, requiring developers to supplement its suggestions.

Reference: GitHub Copilot testing limitations.

NEW QUESTION # 20

In what way can GitHub Copilot and GitHub Copilot Chat aid developers in modernizing applications?

- A. GitHub Copilot can create and deploy full-stack applications based on a single query.
- B. GitHub Copilot can suggest modern programming patterns based on your code.
- C. GitHub Copilot can refactor applications to align with upcoming standards.
- D. GitHub Copilot can directly convert legacy applications into cloud-native architectures.

Answer: B

Explanation:

GitHub Copilot and GitHub Copilot Chat are powerful AI-driven tools designed to assist developers by providing context-aware code suggestions and interactive support. Specifically, in the context of modernizing applications, GitHub Copilot excels at analyzing existing code and suggesting modern programming patterns, best practices, and syntax improvements that align with contemporary development standards. For example, it can recommend updates to outdated constructs, propose more efficient algorithms, or suggest frameworks and libraries that are widely used in modern application development.

* Why not A? GitHub Copilot does not "directly convert" legacy applications into cloud-native architectures. It can assist by suggesting code changes or patterns that support such a transition, but it doesn't autonomously perform the full conversion process, which involves architectural decisions and deployment steps beyond its scope.

* Why not C? While GitHub Copilot can generate code snippets and even larger portions of an application, it cannot create and deploy full-stack applications from a single query. It requires developer input, refinement, and integration to achieve a complete, deployable solution.

* Why not D? GitHub Copilot can assist with refactoring by suggesting improvements to existing code, but it doesn't inherently "align with upcoming standards" in a predictive sense. Its suggestions are based on current best practices and the data it was trained on, not future standards that are yet to be defined.

Thus, B is the most accurate and realistic way GitHub Copilot aids developers in modernizing applications, leveraging its ability to provide relevant, context-based suggestions to update and improve codebases.

Reference: GitHub Copilot documentation on application modernization.

NEW QUESTION # 21

What is a likely effect of GitHub Copilot being trained on commonly used code patterns?

- A. Suggest innovative coding solutions that are not yet popular.
- **B. Suggest code snippets that reflect the most common practices in the training data.**
- C. Suggest homogeneous solutions if provided a diverse data set.
- D. Suggest completely novel projects, while reducing time on a project.

Answer: B

Explanation:

"Because GitHub Copilot is trained on a large amount of publicly available code, it often suggests snippets that reflect common coding practices and idioms." This shows that Copilot reflects the most common practices it has seen in its training data.

References: GitHub Copilot documentation on training and suggestion patterns.

NEW QUESTION # 22

What is the correct way to access the audit log events for GitHub Copilot Business?

- A. Use the Code tab in the GitHub repository
- B. Navigate to the Security tab in the organization's GitHub settings
- C. Navigate to the Insights tab in the repository settings
- **D. Use the Audit log section in the organization's GitHub settings**

Answer: D

Explanation:

Audit log events for GitHub Copilot Business can be accessed through the Audit log section within the organization's GitHub settings. This log provides a record of activities related to Copilot usage and configuration.

Reference: GitHub Copilot Business documentation on audit logs.

NEW QUESTION # 23

What are the different ways to give context to GitHub Copilot to get more precise responses? (Each correct answer presents part of the solution. Choose two.)

- **A. Engage with chat participants such as @workspace to incorporate collaborative context into the responses.**
- B. Access developer's previous projects and code repositories to understand their coding style without explicit permission.
- **C. Utilize chat variables like *file to anchor the conversation within the specific context of the files or editors in use.**
- D. Utilize to interpret developer's thoughts and intentions without any code or comments.

Answer: A,C

Explanation:

Exact extracts:

* "You can give Copilot Chat additional context using variables such as @workspace or @file to scope the conversation."

References: GitHub Copilot Chat variables and context documentation.

NEW QUESTION # 24

.....

We update our GH-300 test prep within one year and you will download free which you need. After one year, we provide the client 50% discount benefit if buyers want to extend their service warranty so you can save much money. If you are the old client, you can enjoy some certain discount when buying GH-300 Exam Torrent so you can enjoy more service and more benefits. Our update can provide the latest and most useful GH-300 prep torrent to you and you can learn more and pass the GH-300 exam successfully.
