Designing and Implementing Microsoft DevOps Solutions exam dumps, AZ-400 dumps torrent

A considerable amount of effort goes into our products. So in most cases our AZ-400 study materials are truly your best friend. On one hand, our AZ-400 study materials are the combination of the latest knowledge and the newest technology, which could constantly inspire your interest of study. On the other hand, our AZ-400 Study Materials can predicate the exam correctly. Therefore you can handle the questions in the real exam like a cork. Through highly effective learning method and easily understanding explanation, you will pass the AZ-400 exam with no difficulty.

Microsoft Designing and Implementing Microsoft DevOps Solutions Sample Questions (Q320-Q325):

NEW QUESTION # 320
You have a project in Azure DevOps that contains a Continuous Integration/Continuous Deployment (CI/CD) pipeline.
You need to enable detailed logging by defining a pipeline variable.
Mow should you configure the variable? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 321
You administer an Azure DevOps project that includes package feeds.
You need to ensure that developers can unlist and deprecate packages. The solution must use the principle of least privilege.
Which access level should you grant to the developers?

- A. Contributor
- B. Collaborator
- C. Owner

Answer: A

Explanation:
Feeds have four levels of access: Owners, Contributors, Collaborators, and Readers. Owners can add any type of identity-individuals, teams, and groups-to any access level.

NEW QUESTION # 322
You have a GitHub organization that contains three users named User 1. User2. and User3. You have a project that contains a repository named repo1. You need to configure permissions for repo1. The solution must meet the following requirements:
* Ensure that User 1 can actively push to repo1.
* Ensure that Usef2 can manage issues and pull requests for repo1.
* Ensure that User3 can manage repo1.
* Prevent User3 from accessing sensitive data in repo1.
Which role should you assign to each use?

Answer:

Explanation:

NEW QUESTION # 323
You have an Azure DevOps project that contains a build pipeline. The build pipeline uses approximately 50 open source libraries.
You need to ensure that the project can be scanned for known security vulnerabilities in the open source libraries.
What should you do? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:
Explanation
Box 1: A Build task
Trigger a build
You have a Java code provisioned by the Azure DevOps demo generator. You will use WhiteSource Bolt extension to check the vulnerable components present in this code.
* Go to Builds section under Pipelines tab, select the build definition WhiteSourceBolt and click on Queue to trigger a build.
* To view the build in progress status, click on ellipsis and select View build results.
Box 2: WhiteSource Bolt
WhiteSource is the leader in continuous open source software security and compliance management.
WhiteSource integrates into your build process, irrespective of your programming languages, build tools, or development environments. It works automatically, continuously, and silently in the background, checking the security, licensing, and quality of your open source components against WhiteSource constantly-updated denitive database of open source repositories.

NEW QUESTION # 324
You have a tendril in Microsoft Azure Active Directory (Azure AD), part of Microsoft Entra. The tenant contains three groups

named Group1. Group2, and Group3.
You create a new project in Azure DevOps named Project1.
You need to secure the service connections for Project1. The solution must meet the following requirements:
* The members of Group1 must be able to share and unshare a service connection with other projects.
* The members of Group2 must be able to rename a service connection and update the description.
* The members of Group3 must be able to use the service connection within build or release pipelines.
* The principle of least privilege must be followed.
Which permission should you grant to each group? To answer, drag the appropriate permissions to the correct groups. Each permission may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:
Explanation:

NEW QUESTION # 325
.....

With our high efficient of AZ-400 learning materials you may only need to spend half of your time that you will need if you didn't use our products successfully passing a professional qualification exam. In this way, you will have more time to travel, go to parties and even prepare for another exam. The benefits of AZ-400 training torrent for you are far from being measured by money. We have a first-rate team of experts, advanced learning concepts and a complete learning model. The time saved and the guaranteed success for you with our AZ-400 learning materials is the greatest return to us.
