

Exam4Docs provides to CIPS L5M10 test materials

A Logistics Management (L5M10) practice questions is a helpful, proven strategy to crack the Logistics Management (L5M10) exam successfully. It helps candidates to know their weaknesses and overall performance. Exam4Docs software has hundreds of Logistics Management (L5M10) exam dumps that are useful to practice in real-time. The Logistics Management (L5M10) practice questions have a close resemblance with the actual L5M10 exam.

CIPS L5M10 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Analyse the Role and Activities of Logistics Management: This section of the exam measures the skills of Logistics Managers and covers the essential concepts, functions, and strategic importance of logistics within modern supply chains. It explains what logistics is, how its key elements work together—such as transportation, warehousing, inventory, packaging, information flow, and security—and how these components support procurement, production, distribution, after-sales processes, and product disposal. The section explores how logistics integrates with broader supply chain management and introduces the idea of total logistics and total cost thinking, showing how multimodal transport and pipeline inventory contribute to efficiency. Candidates must understand how logistics creates competitive advantage by aligning operations with business strategy, managing customer service levels, measuring service quality, and recognizing its financial impact. This heading also evaluates the increasing role of technology in logistics, including barcoding, RFID, e-fulfilment systems, warehouse management systems, automated data capture, and the integration of digital tools across the logistics network.
Topic 2	<ul style="list-style-type: none">• Understand Capacity Planning and Control in Logistics Management: This section of the exam measures the skills of Operations Planners and focuses on the techniques and systems used to manage capacity, demand, and resource planning across logistics activities. It explains how organizations balance planning with real-time control, adjust to fluctuating demand, and schedule workloads effectively. Candidates are expected to understand capacity concepts, constraints, demand forecasting, capacity measurement, and different planning approaches such as level planning, chase demand strategies, and demand management methods. The section also examines the use of technology in capacity planning, particularly Materials Requirements Planning (MRP), MRP II, ERP systems, master production scheduling, inventory data, and bills of materials, while recognizing the limitations of these tools. Finally, it covers the role of reverse logistics, emphasizing the handling of customer returns, the development of return policies, and how returned items are reintegrated into the supply chain.

Exam4Docs is driven by the ambition of making you succeed. Our CIPS L5M10 study material offers you high-quality training material and helps you have a good knowledge of the L5M10 actual test. The team members of Exam4Docs work with a passion to guarantee your success and make you prosperous. We provide the L5M10 Test Engine with self-assessment features for enhanced progress.

CIPS Logistics Management Sample Questions (Q84-Q89):

NEW QUESTION # 84

Baby Ltd manufactures 100 prams each quarter. In Q1, it sold 78 prams. A customer phones in March to order 3 prams for the following month. Is there Availability to Promise (ATP)?

- A. Yes - 100 prams will be manufactured in Q2 so the customer can order one of these
- B. Yes - 22 prams were unsold last quarter
- C. Maybe - the customer must wait until Q2 to be sure
- D. **Maybe - it depends on the number of customer orders already received for Q2**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Availability to Promise (ATP) is the portion of inventory or planned production that is not yet committed to existing customer orders. It depends on confirmed orders and forecasted production. Without knowing Q2's confirmed demand, ATP cannot be guaranteed. (Reference: CIPS L5M10 Study Guide, ATP definition and application, p. 182)

NEW QUESTION # 85

Which of the following are advantages of introducing a Materials Requirements Planning (MRP) system to a business? Select TWO.

- A. More agile supply chain
- B. Less time spent repairing machines
- C. **Reduced inventory costs**
- D. **Better customer service**

Answer: C,D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

MRP systems synchronise material requirements with production schedules, reducing unnecessary inventory and ensuring timely delivery—thus improving customer service and reducing carrying costs. MRP does not directly enhance machine repair or agility (which are Lean/ERP benefits).

(Reference: CIPS L5M10 Study Guide, Advantages of MRP systems, p. 188)

NEW QUESTION # 86

Strategic planning is long-term planning, usually over 5-10 years in the future. Is this sentence correct?

- A. **Yes - the longer the strategic plan, the less detail it will include**
- B. Yes - strategic plans have more detail than short-term plans
- C. No - long-term plans are tactical rather than strategic
- D. No - strategic plans detail the objectives of the organisation over the upcoming year

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Strategy deals with long-term direction and typically contains broad objectives with lower detail; tactical (mid-term) and operational (short-term) plans add specificity and detail. Therefore, longer-horizon strategic plans contain less operational detail than short-term plans. (Reference: CIPS L5M10 Study Guide, Planning horizons-strategic/tactical/operational, pp. 99-100)

NEW QUESTION # 87

Which of the following are types of Auto-Identification and Data Capture (AIDC) technology used in logistics? Select THREE

- A. Electronic data interchange
- B. Biometrics
- C. Smartphones
- D. Barcodes
- E. Voice recognition

Answer: B,D,E

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

AIDC encompasses technologies that automatically identify items and capture data with minimal human intervention. Examples include barcodes/QR, RFID, biometrics, magnetic stripes, and voice recognition.

Smartphones are devices that may host AIDC apps but are not a technology class themselves; EDI is a system- to-system messaging standard, not AIDC. (Reference: CIPS L5M10 Study Guide, AIDC overview and examples, p. 83)

NEW QUESTION # 88

What is the name of the type of barcode that uses 12 numeric digits and is typically used for tracking items in store?

- A. PDF417
- B. QR Code
- C. Aztec Code
- D. UPC

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

UPC (Universal Product Code) is a linear barcode symbology using 12 numeric digits, widely used in retail point-of-sale and in-store item identification. QR, PDF417, and Aztec are different symbologies (2D or stacked) with different use cases and data capacities. (Reference: CIPS L5M10 Study Guide, Barcode types overview, pp. 75-76)

NEW QUESTION # 89

.....

If you want to get a good job, and if you are not satisfied with your present situation, if you long to have a higher station in life. We think it is high time for you to try your best to gain the L5M10 certification. You do not need to think it is too late for you to study.
