語学検定試験受験料の補助について

語学力向上のため、下の表に記載している試験(1言語につき1試験、計6試験)について、補助の条件を満たした方に受験料の補助をします。
留学や資格取得などに活用してください。

■補助対象の語学検定試験

試験名	レベル	受験料
【1ヶ月間】 アメリカンステイト サイト語検定試験 ^{※1}	A2	18,000円
	B1	24,000円
	B2	30,000円
	C1	36,000円
	C2	42,000円
	C3	48,000円
【英語】ELTS	5.5	27,500円
	6.0	33,000円
【フランス語】DELF	B1	20,500円
	B2	24,500円
【ドイツ語】SIELE Global	なし*	153ユーロ
	3級	6,600円
【申請料】ISK	4級	7,920円
	5級	9,900円
	6級	11,550円
	初級	6,050円
	中級	7,150円
	高級	8,250円
【韓国語】TOPK	1級-2級	5,000円
	3級-6級	7,700円

*SIELE Globalは海外で事前に受けた試験スコアに換算することがあります。

※1「アメリカンステイトサイト語検定試験」は、本学で主に受験料補助を適用している。本学は試験料からアンケートによる内訳（1,000円）を別の金額を学生に補助する。

■受験料の補助金額

受験料	5,000円～10,000円	10,000円～14,999円	15,000円～
大学の補助額	2,000円	5,000円	10,000円

■補助の条件

- 補助対象となる試験
左表(補助対象の語学検定試験)の指定レベルの試験であり、各年度4月1日以後に試験が実施され、2月末日までに試験結果が出る試験である。
- 補助対象者
獨協大学 留学生・大学院生
- 申請手順
①試験受験料に大学に補助申請書を
②左表(補助対象の語学検定試験)レベルに合格する
③試験結果を3月10日までに提出する。CFP/CEFR/IELTS/TOEFL/TOEIC/TOPIK
- 申請できる回数
毎年度(各言語)1回かつ2言語まで
例1:「ドイツ」→「スペイン」→「フランス」試験A2/B1
→「韓国語」試験TOPK、1回1回一方申請OK
例2:「IELTS」試験6.0/7.0 A2以上
→「韓国語」試験TOPK、1回1回一方申請OK
→「韓国語」試験TOPK、1回1回一方申請OK
- 年度を超えて申請できる回数
受験料補助金額に受け付ける場合は、次年度以降の同一言語での申請は、前(過去)に認定されたレベルより高いレベルに限って申請可能。

私たちは絶えずC_ADBTP_2601スタディガイドを改善および更新し、時代の開発ニーズと業界のトレンドの変化に応じて、新しい血液を注入します。私たちは、テストC_ADBTP_2601認定に関するすべての関連知識を最も簡単で効率的かつ直感的な方法で学習者に教えるように最善を尽くします。専門家に高い報酬を支払って、C_ADBTP_2601試験準備の作成に彼らが最大の役割を果たすようにします。国際および国内市場でのC_ADBTP_2601テスト問題の割合は常に増加しています。

SAP Administrating SAP Business Technology Platform(C_ADBTP_2601) 認定 C_ADBTP_2601 試験問題 (Q10-Q15):

質問 # 10

SIMULATION

Create Directories and Subaccounts

In a global account for SAP Business Technology Platform (BTP), create a hierarchy of subaccounts using directories.

Task 1: Create Directories

In your SAP BTP cockpit, create the directory Americas (Description: Americas Accounts) with your global account as the parent.

Create the directory Eurasia (Description: Eurasia Accounts) with your global account as the parent.

Create the directory Partner (Description: Partner Accounts) with the Americas directory as the parent. Add the label access with value external.

Create the directory Human Resources (Description: Human Resources Accounts) with the Eurasia directory as the parent. Add the label access with value internal.

正解:

解説:

See the Explanation below for complete solution

Explanation:

Task 1: Create Directories

You need to create these directories:

Americas

Eurasia

Partner under Americas with label access=external

Human Resources under Eurasia with label access=internal

Before You Start

Log in to the SAP BTP Cockpit.

Make sure you are inside the correct Global Account.

Open the left-side navigation menu.

Why this is important:

All directories in this task must be created inside the correct global account hierarchy. If you create them in the wrong location, the simulation result will be incorrect.

Step 1 - Create Directory Americas

What to do

In the SAP BTP Cockpit, select your Global Account.

In the left navigation menu, click Directories.

Click Create or Create Directory.

Fill the fields as follows:

Name: Americas

Description: Americas Accounts

Parent: your Global Account

Click Create.

Create Directory

Display Name * Americas

Description Americas Accounts

Parent * BTP Admin Certification xxxxx

> Advanced

Cockpit supports multi-level directories in your account structure. You can add your new directory directly to the root global account or to an existing directory by choosing the location under Parent.

SAP

Create Cancel

Explanation:

This creates a top-level directory directly under the global account.

It will later be used as the parent for the Partner directory.

What to verify

After creation, you should see:

Americas

listed under the directories of the global account.

Step 2 - Create Directory Eurasia

What to do

Stay in Directories.

Click Create Directory again.

Fill the fields:

Name: Eurasia

Description: Eurasia Accounts

Parent: your Global Account

Click Create.

Create Directory

Display Name*

Description

Parent*

> Advanced

Cockpit supports multi-level directories in your account structure. You can add your new directory directly to the root global account or to an existing directory by choosing the location under Parent.

Create **Cancel**

Explanation:

This creates another top-level directory, parallel to Americas.

What to verify

You should now see both:

Americas

Eurasia

under the global account.

Step 3 - Create Directory Partner under Americas

What to do

In the Directories area, select Americas.

Click Create Directory.

Enter:

Name: Partner

Description: Partner Accounts

Parent: Americas

Locate the Labels section.

Add a new label:

Key: access

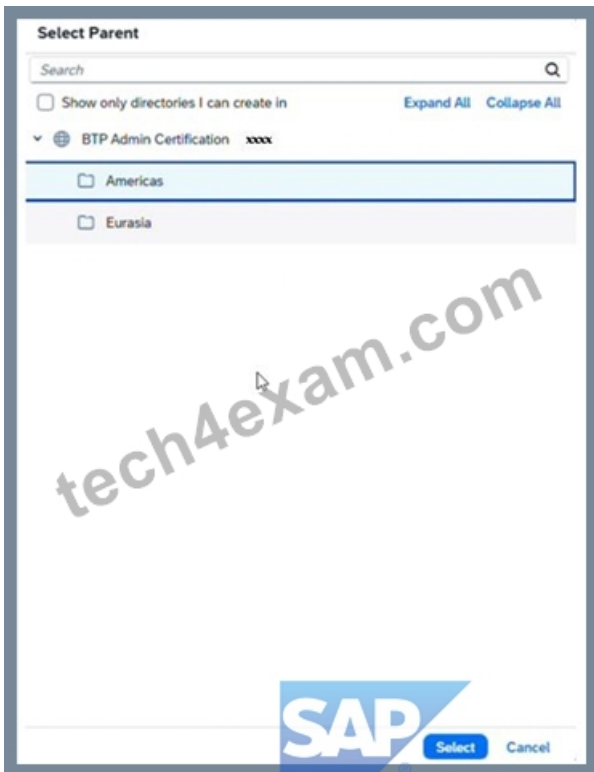

Value: external

Click Create.

Name	Type	Enhancement	Provider	Region	Changed On
STP Admin Certification XXXX	Global Account				March 26, 2024, 9:12:21
Americas	Directory				March 26, 2024, 9:27:51
Eurasia	Directory				March 26, 2024, 9:27:51

Labels section:

- Go to Overview
- More Info
- Create Directory
- Create Subaccount
- Delete

Create Directory

Display Name *

Partner

Description

Partner Accounts

Parent *

Americas

Advanced

Enable entitlement management

Enable user management

Add labels to this directory.

Name:

access

Values:

external

Create

Cancel

Explanation:

This creates Partner as a child directory under Americas.

The label is required and must be entered exactly:

access = external

This label helps classify the directory.

What to verify

Under Americas, you should now see:

Partner

and the directory should contain the label:

access=external

Step 4 - Create Directory Human Resources under Eurasia

What to do

Go back to the Directories list.

Select Eurasia.
 Click Create Directory.
 Enter:
 Name: Human Resources
 Description: Human Resources Accounts
 Parent: Eurasia
 In the Labels section, add:
 Key: access
 Value: internal
 Click Create.

Explanation:
 This creates Human Resources as a child directory under Eurasia.
 The required label is:
 access = internal
 What to verify
 Under Eurasia, you should now see:
 Human Resources
 and the label should be:
 access=internal
 Final Expected Directory Structure
 After completing Task 1, your structure must be exactly like this:
 Global Account
 Americas
 Partner
 Label: access=external
 Eurasia
 Human Resources
 Label: access=internal

Name	Type	Environment	Provider	Region	Labels	Changed On
STP Admin Certification XXXX	Global Account					March 20, 2026, 6:56:2...
Americas	Directory					March 22, 2026, 4:25:1...
Partner	Directory				1 label	March 22, 2026, 4:29:2...
Eurasia	Directory					March 22, 2026, 4:26:0...
Human Resources	Directory				1 label	March 22, 2026, 4:31:0...

Important Checks Before Moving On

Verify all of the following:

Americas exists

Eurasia exists

Partner is under Americas

Human Resources is under Eurasia

Partner has label access=external

Human Resources has label access=internal

All names and descriptions are entered exactly as required

Common Mistakes to Avoid

1. Wrong parent

Partner must be created under Americas

Human Resources must be created under Eurasia

2. Wrong label key or value

Use exactly:

access → external

access → internal

3. Spelling errors

Be careful with:

Americas

Eurasia

Partner

Human Resources

4. Creating all directories directly under the global account

Only Americas and Eurasia are direct children of the global account.

Partner and Human Resources must be child directories.

質問 # 11

SIMULATION

Enable Service Subscriptions

Task 2: Entitle and Subscribe a Service in a Subaccount

In your AM PA Prod subaccount, entitle the standard (Application) service plan for SAP Build Work Zone, standard edition.

In the AM PA Prod subaccount, establish a trust to the agvlamkzw.accounts.ondemand.com identity provider.

In your AM PA Prod subaccount, create a service subscription for SAP Build Work Zone, standard edition with the standard service plan.

正解:

解説:

See the Explanation below for complete solution.

Explanation:

Part A - Entitle the Service Plan in AM PA Prod

Step 1 - Open the AM PA Prod Subaccount

What to do

In the SAP BTP Cockpit, go to Directories.

Open the Partner directory.

Select the subaccount AM PA Prod.

Explanation:

This opens the exact subaccount where the entitlement and subscription must be created.

What to verify

You should now be on the AM PA Prod subaccount page.

Step 2 - Open Entitlements in the Subaccount

What to do

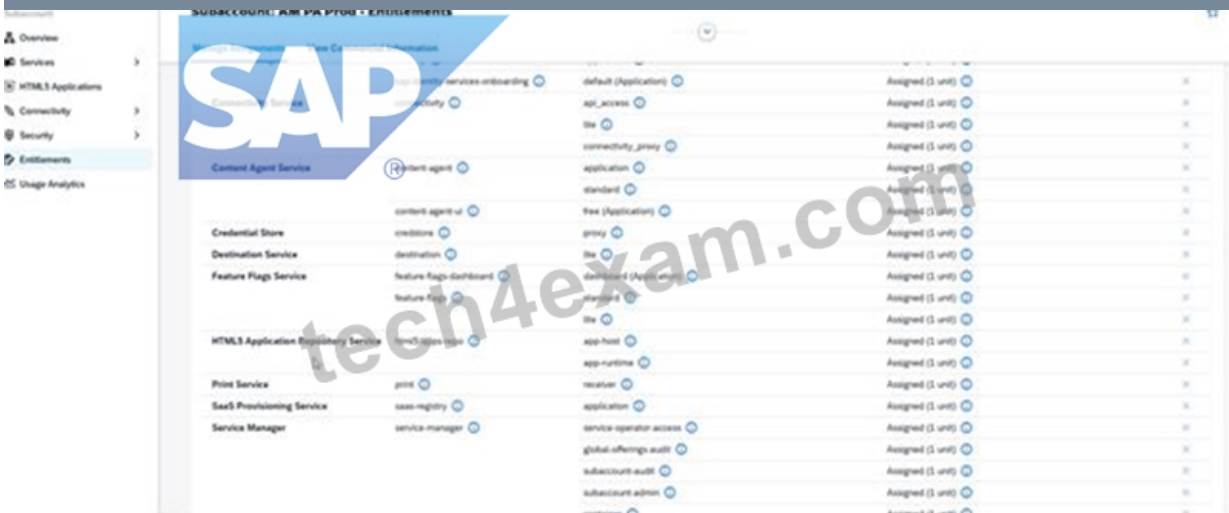

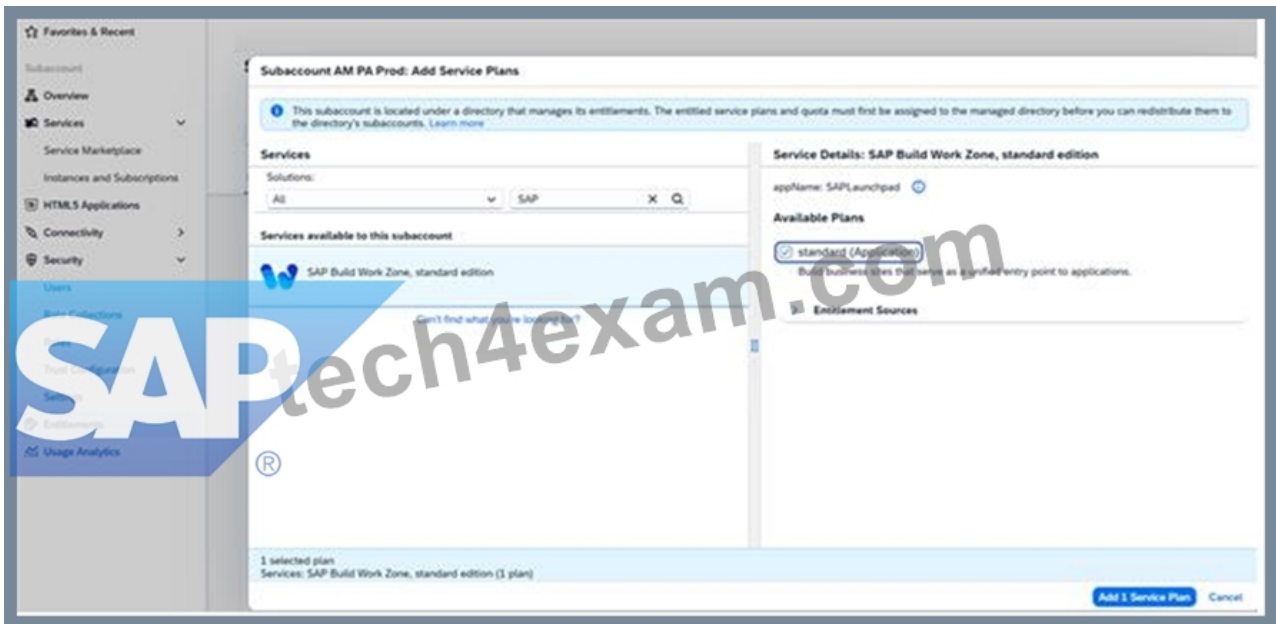

In AM PA Prod, open Entitlements.

Explanation:

SAP documents that subaccount entitlements are configured in the subaccount's entitlement area, where you add service plans and quotas available to that subaccount.

What to verify

You should see the Entitlements screen for AM PA Prod.

Step 3 - Add the Required Service Plan

What to do

Click Configure Entitlements or Add Service Plans.

Search for:

SAP Build Work Zone, standard edition

Select the service.

Choose the plan:

standard (Application)

Add the service plan.

Save the entitlement changes.

Explanation:

The task requires the standard (Application) plan specifically. SAP's entitlement flow requires you to add the service plan to the subaccount before you can subscribe to the application.

What to verify

Under Entitlements, you should now see:

SAP Build Work Zone, standard edition

plan: standard (Application)

Part B - Establish Trust to the Identity Provider

Step 4 - Open Trust Configuration

What to do

In the AM PA Prod subaccount, go to:

Security

Trust Configuration

Explanation:

SAP Help states that trust to a custom identity provider is established from the cockpit in Security > Trust Configuration.

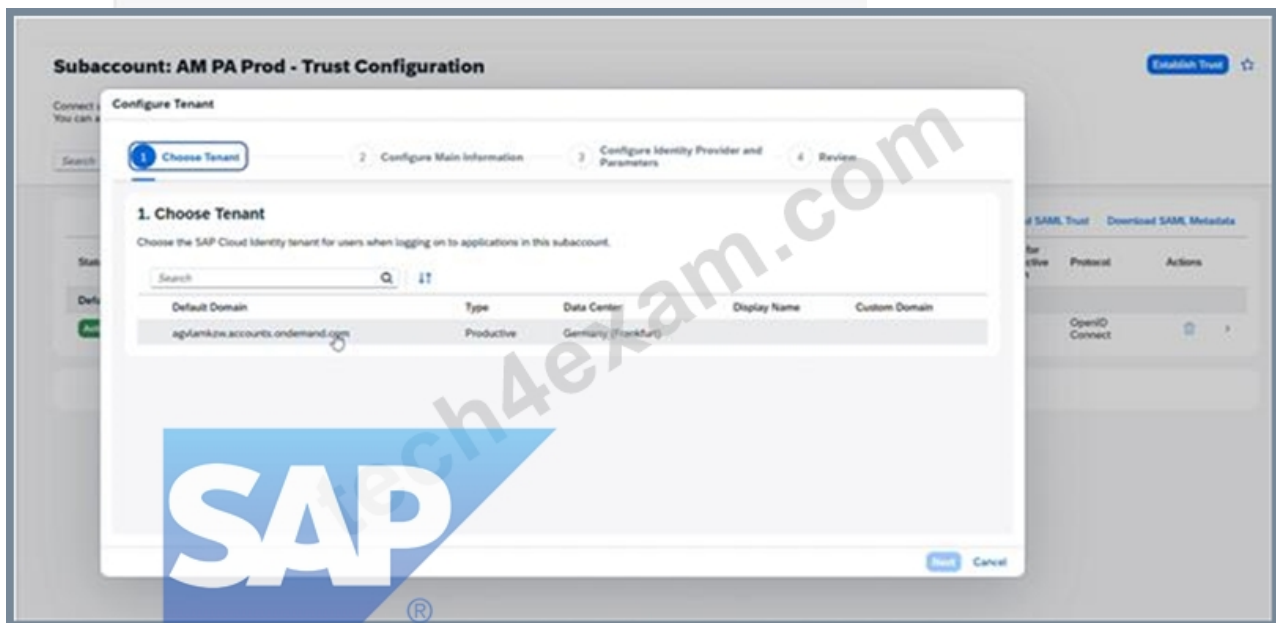

What to verify

You should be on the Trust Configuration page of AM PA Prod.

Step 5 - Start the Trust Setup

What to do

Click Establish Trust or New Trust Configuration.

Explanation:

This opens the wizard or form to add a trusted identity provider for the subaccount. SAP documents this as the standard cockpit flow for custom identity provider trust.

Step 6 - Enter the Identity Provider

What to do

In the trust configuration, use the identity provider:

agvlamkzw.accounts.ondemand.com

Continue through the wizard and confirm the trust setup.

Save the configuration.

Explanation:

The simulation explicitly requires trust to that identity provider domain. For SAP Build Work Zone, standard edition, SAP also notes that the subaccount must trust an identity provider before subscription use cases for business users are completed.

What to verify

On the Trust Configuration page, the identity provider

agvlamkzw.accounts.ondemand.com should appear as trusted.

Configure Tenant

1 Choose Tenant — 2 **Configure Main Information** — 3 Configure Identity Provider and Parameters — 4 Review

2. Configure Main Information

Main Information

If you need multiple trust configurations for business users, make sure that you provide an understandable link text. This helps users choose the right identity provider during logon.

Name: * agvlamkzw.accounts.ondemand.com (business users)

Purpose: Identity provider for business users

Origin Key: * sap.custom

Description: Identity Authentication tenant agvlamkzw.accounts.ondemand.com used for business users

Previous **Next** Cancel

Configure Tenant

1 Choose Tenant — 2 Configure Main Information — 3 **Configure Identity Provider and Parameters** — 4 Review

3. Configure Identity Provider and Parameters

For a good single sign-on experience, choose the same domain for all BTP accounts and non-BTP applications. Choose "Default" to always use the default domain configured in your tenant.

Identity Provider

SAP Cloud Identity Tenant: agvlamkzw.accounts.ondemand.com

Domain: * Default

Parameters

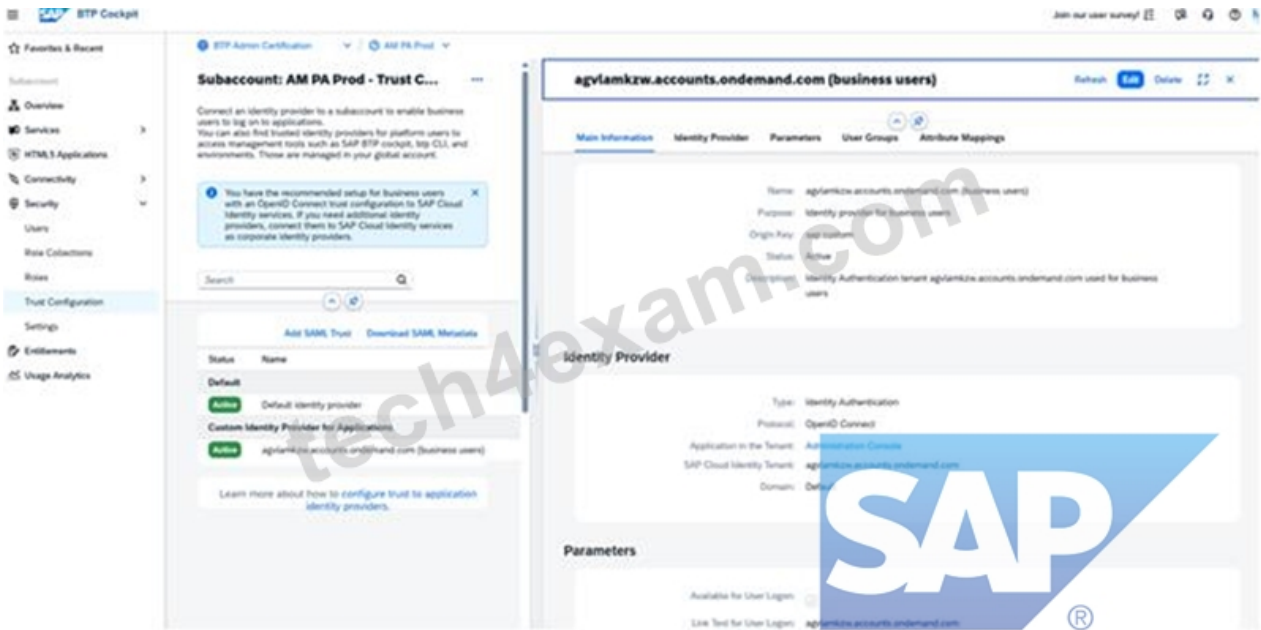

Available for User Logon:

Link Text for User Logon: * agvlamkzw.accounts.ondemand.com

Create Shadow Users on Logon:

Default for non-interactive logon:

Previous **Next** Cancel

Part C - Create the Service Subscription

Step 7 - Open the Subscription Area

What to do

In AM PA Prod, go to:

Services

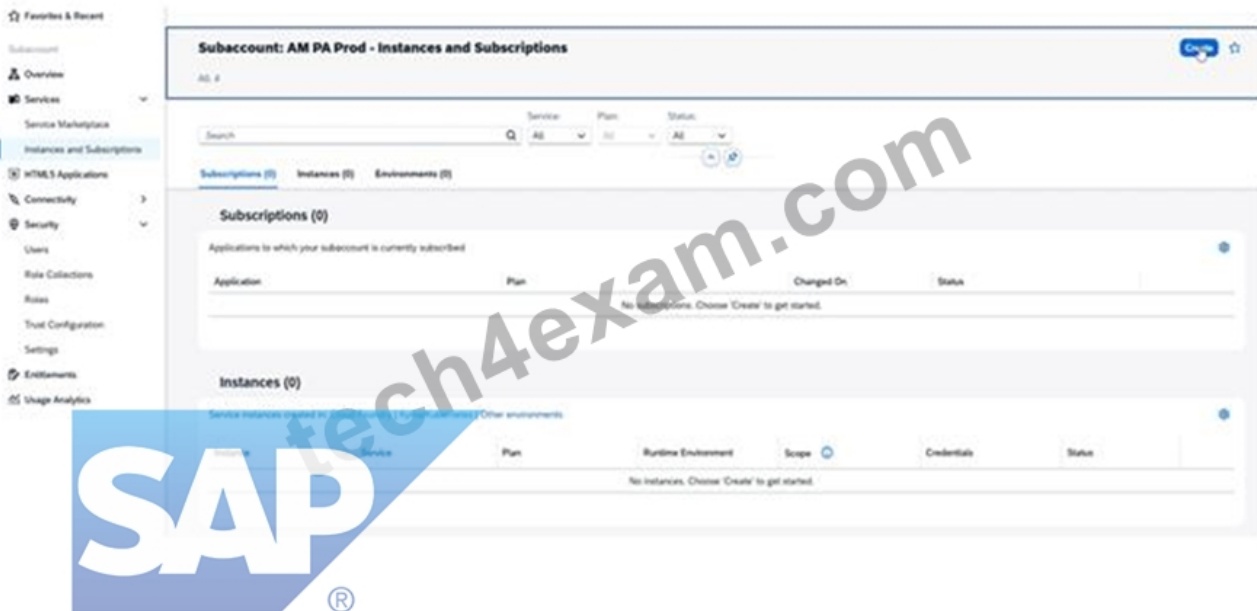

Instances and Subscriptions

Explanation:

SAP Help for SAP Build subscriptions points to the subaccount subscription flow after the entitlement is available. In current cockpit usage, subscriptions are created from the subaccount's services are a.

What to verify

You should see the Instances and Subscriptions page.

Step 8 - Create the Subscription

What to do

Click Create.

Choose Subscription if a type selection appears.

Search for:

SAP Build Work Zone, standard edition

Select the plan:

standard

Then confirm the creation.

New Instance or Subscription

1
Basic Info

3
Review

Enter basic info for your instance or subscription.

i Some services are not shown because Cloud Foundry is not enabled. To enable it, select it from the Service dropdown menu and create an instance of it.

New Instance or Subscription

1

Basic Info

Enter basic info for your instance or subscription.

i Some services are not shown because Cloud Foundry is not enabled. To enable it, select it from the Service dropdown menu and create an instance of it.

Service: * ⓘ Can't find what you're looking for?

SAP Build Work Zone, standard edition
▼

Plan: *

standard
▼

Create
Cancel

Explanation:

SAP's getting-started guidance for SAP Build Work Zone, standard edition says that once the subaccount has the required entitlement, you can subscribe to the application from the subaccount.

What to verify

You should now see a subscription entry for:

SAP Build Work Zone, standard edition

plan: standard

Step 9 - Confirm the Subscription Is Active

What to do

Check the status of the new subscription in Instances and Subscriptions.

Explanation:

The subscription should be visible and active in the subaccount after creation.

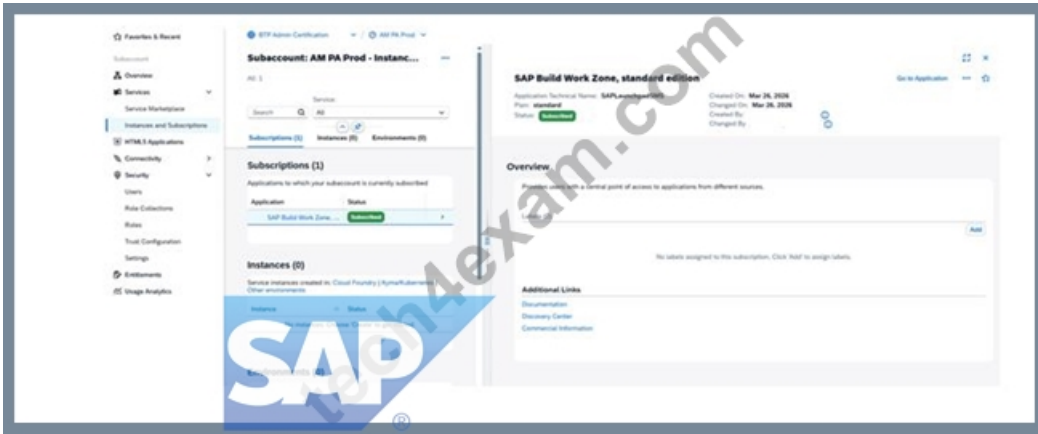

What to verify

You should see:

SAP Build Work Zone, standard edition

subscription created successfully

SAP's guidance for subscription-based applications consistently uses this subaccount subscription flow after entitlement is present.

Final Expected Result for Task 2

Inside AM PA Prod:

the entitlement SAP Build Work Zone, standard edition is assigned

the entitled plan is standard (Application)

trust is established to agvlamkzw.accounts.ondemand.com

a subscription exists for SAP Build Work Zone, standard edition

the subscription uses the standard service plan

Common Mistakes to Avoid

1. Doing the entitlement in the wrong place

This task must be done in:

AM PA Prod subaccount

Not only in:

Partner directory

Directory entitlement and subaccount entitlement are different scopes in the cockpit.

2. Choosing the wrong service or wrong plan

Use exactly:

SAP Build Work Zone, standard edition

standard (Application) for entitlement

standard for the subscription selection screen

SAP's service subscription flow starts only after the correct entitlement exists.

3. Skipping trust configuration

The simulation explicitly requires trust to:

agvlamkzw.accounts.ondemand.com

Trust is configured in Security > Trust Configuration.

4. Looking for subscription creation before entitlement

The entitlement must be added first, otherwise the service may not appear in the subscription creation flow.

Quick Validation Checklist

Confirm all of the following in AM PA Prod:

Entitlements contains SAP Build Work Zone, standard edition

the plan is standard (Application)

Trust Configuration shows agvlamkzw.accounts.ondemand.com

Instances and Subscriptions shows SAP Build Work Zone, standard edition the subscription is created successfully

質問 # 12

SIMULATION

Enable a Cloud Foundry Environment

Add a service plan for Cloud Foundry environment and enable it in a subaccount.

Task 1: Add a Service Plan for Cloud Foundry Environment

In your SAP BTP cockpit, in your EU HCM Dev subaccount, entitle one MEMORY service plan for the Cloud Foundry Runtime.

正解:

解説:

See the Explanation below for complete solution.

Explanation:

Before you start

Log in to SAP BTP Cockpit.

Open your correct Global Account.

Go to the Human Resources directory.

Open the EU HCM Dev subaccount.

This matters because the runtime memory quota must be assigned to the EU HCM Dev subaccount specifically. SAP documents that the MEMORY plan is the quota-bearing plan for Cloud Foundry Runtime.

Step 1 - Open the EU HCM Dev subaccount

In the cockpit, choose Directories.

Open Human Resources.

Select EU HCM Dev.

You should now be on the EU HCM Dev subaccount page.

Step 2 - Open Entitlements

In EU HCM Dev, choose Entitlements.

SAP Help confirms that service plans and quota assignments for a subaccount are configured in the Entitlements area.

Step 3 - Configure entitlements

Click Configure Entitlements or Add Service Plans.

Search for:

Cloud Foundry Runtime

In SAP Help, this appears as Cloud Foundry Runtime (APPLICATION_RUNTIME), and the relevant plan for assigning runtime memory is MEMORY.

Step 4 - Select the MEMORY plan

Under Cloud Foundry Runtime, select:

MEMORY

Set the quantity to 1 if the cockpit shows an amount/quota field.

Add the plan to the subaccount.

Save the entitlementment changes.

The screenshot displays the SAP BTP Cockpit interface for configuring service plans. The main heading is 'Subaccount EU HCM Dev: Add Service Plans'. On the left, a list of services is shown, with 'Cloud Foundry Runtime' selected. On the right, the 'Service Details: Cloud Foundry Runtime' panel is visible, showing the name 'APPLICATION_RUNTIME' and the 'Available Plans' section where the 'MEMORY' plan is checked. A note below the plan states: 'Provision application runtime memory (GB) to your Cloud Foundry org to start developing polyglot cloud-native applications. NOTE: This plan does not apply to Cloud Foundry orgs that are created with the Free plan.' At the bottom, a summary bar indicates '1 selected plan' and 'Services: Cloud Foundry Runtime (1 plan)'. Buttons for 'Add 1 Service Plan' and 'Cancel' are located at the bottom right.

SAP documents that the MEMORY plan is specifically used to assign runtime memory quota to the subaccount, and that 1 unit corresponds to 1 GB of runtime memory when quota is adjusted or assigned.

Step 5 - Verify the result

After saving, check the Entitlements page of EU HCM Dev.

You should see:

Cloud Foundry Runtime

plan: MEMORY

quantity: 1 if shown

Final expected result

Inside EU HCM Dev:

Cloud Foundry Runtime is entitled

the service plan is MEMORY

the assigned amount is 1 if the cockpit displays quantity/quota units

Common mistakes to avoid

Doing this in the wrong subaccount; it must be EU HCM Dev

Choosing the wrong Cloud Foundry plan; the task asks for MEMORY

Forgetting to save the entitlement change after adding the plan

Confusing the runtime memory entitlement with the later step of actually enabling the Cloud Foundry environment; SAP distinguishes the MEMORY runtime quota from enabling the Cloud Foundry org itself.

質問 # 13

SIMULATION

Create a Service Instance in Cloud Foundry

Enable a service instance of the HTML5 Application Repository Service for Cloud Foundry.

Create a Service Instance in a Cloud Foundry Environment

In your SAP BTP cockpit, in the EU HCM Dev subaccount, create the service instance html5-eu-hcm-dev for the HTML5 Application Repository Service with the service plan app-host in the Cloud Foundry space activity-recording

正解:

解説:

See the Explanation below for complete solution.

Explanation:

Before you start

Log in to SAP BTP Cockpit.

Open the correct Global Account.

Go to Directories.

Open Human Resources.

Open the EU HCM Dev subaccount.

This matters because the task must be completed in EU HCM Dev, and the service instance must be created in the specific Cloud Foundry space activity-recording. SAP Help also confirms that the HTML5 Application Repository is used in the Cloud Foundry environment and that the app-host plan is the host service used to store HTML5 application content.

Step 1 - Open the Cloud Foundry space

In EU HCM Dev, go to:

Cloud Foundry

Spaces

Select the space:

activity-recording

SAP Help describes creating Cloud Foundry service instances by first navigating to the subaccount, opening Cloud Foundry Spaces, selecting the target space, and then using that space's Services > Service Instances area.

Step 2 - Open Service Instances in the space

Inside the activity-recording space, go to:

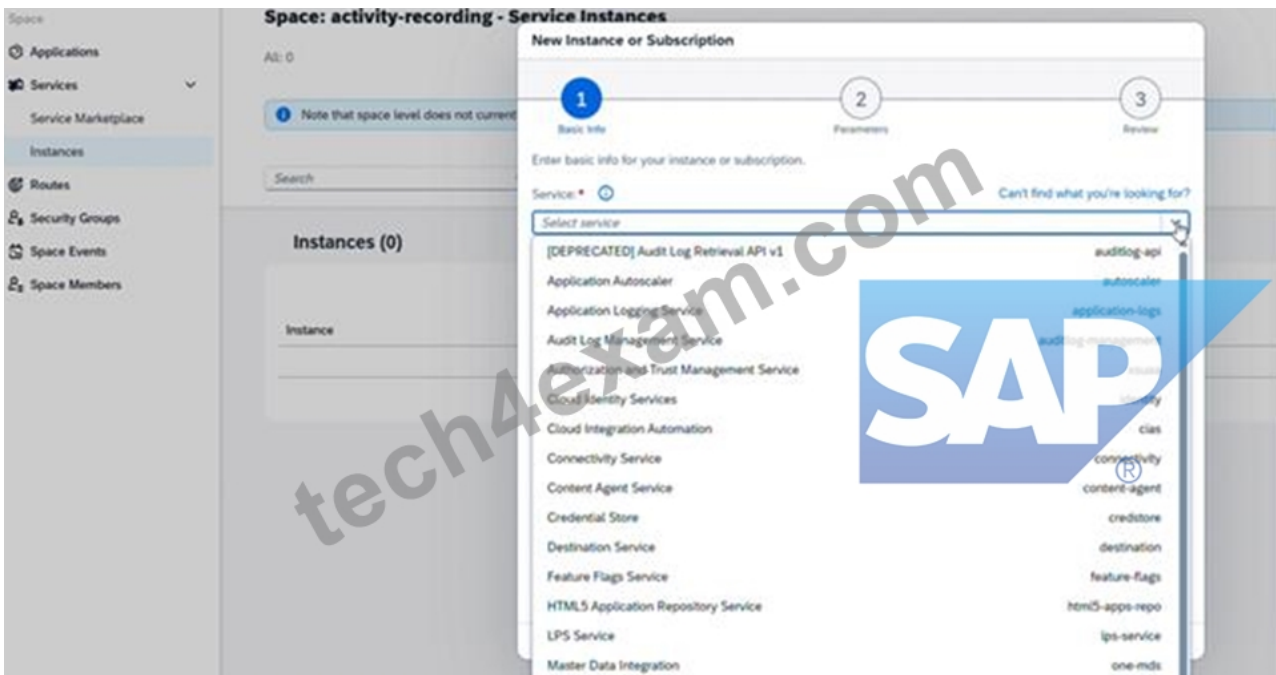

Services

Service Instances

This is the Cloud Foundry-space-level location used for creating service instances in that space.

Step 3 - Start creating the new instance

Click Create.

A wizard opens for the new service instance. SAP Help describes this as the standard cockpit flow for creating service instances in Cloud Foundry spaces.

Step 4 - Choose the required service

In the service selection, choose:

HTML5 Application Repository Service

SAP Help documents the HTML5 Application Repository as the service used for centrally storing HTML5 applications' static content on SAP BTP in the Cloud Foundry environment.

New Instance or Subscription

Step 5 - Choose the required service plan

Select the service plan:

app-host

SAP Help states that the app-host service plan is used to deploy applications to the HTML5 Application Repository.

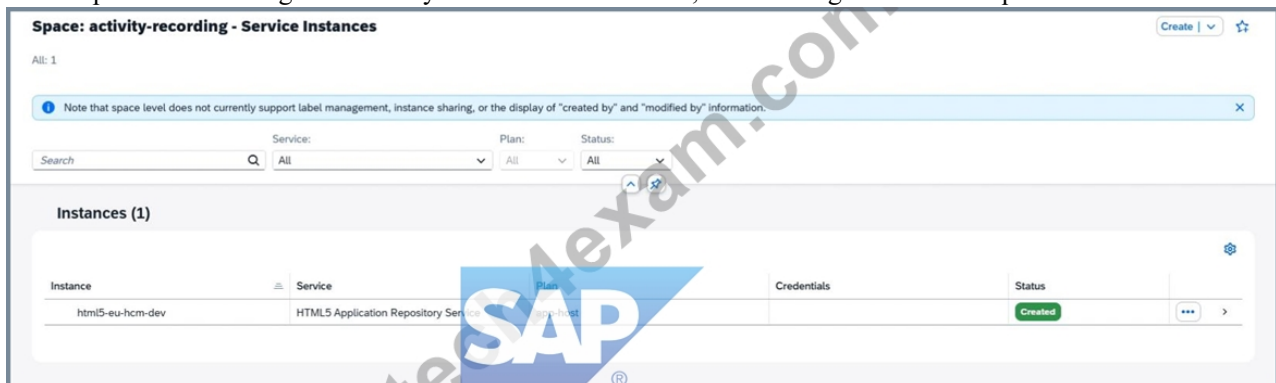

Step 6 - Enter the instance name

Set the service instance name to:

html5-eu-hcm-dev

Then continue and confirm creation.

SAP Help recommends using a CLI-friendly name for service instances, and the task gives the exact required name.

Step 7 - Verify the space is correct

Before final confirmation, verify the target Cloud Foundry space is:

activity-recording

This is important because Cloud Foundry service instances are created within a specific space, not only at the subaccount level.

Step 8 - Create and confirm

Click Create or Finish.

Wait for the status to change from in-progress to created.

SAP Help notes that after creation, the instance appears in the service instances table and its status can be checked there.

Final expected result

Inside EU HCM Dev, in Cloud Foundry space activity-recording, you should have a service instance with:

Service: HTML5 Application Repository Service

Plan: app-host

Instance Name: html5-eu-hcm-dev

Common mistakes to avoid

Creating the instance in the wrong subaccount; it must be EU HCM Dev.

Creating it in the wrong Cloud Foundry space; it must be activity-recording.

Choosing the wrong service; use HTML5 Application Repository Service.

Choosing the wrong plan; use app-host. SAP Help specifically links app-host with hosting deployed HTML5 app content.

Typing the wrong instance name; use exactly html5-eu-hcm-dev.
