Epic Training COG170 Cogito Fundamentals Exam With Complete Solution Graded A+

Radar dashboards - Answer are often the first thing users see when they log into Epic every day. Dashboards are the hub of reporting and analytics in Epic, and consolidate data from all corners of your healthcare system. I

Chart Search. - Answer The easiest way to access an activity in Hyperspace

Analytics Catalog - Answer is a central repository of all reporting content.

A component - Answer is a single graph or table or other piece of functionality that your users will interact with on the dashboard. Components are the building blocks of a dashboard, and are the primary way you will add new content or remove content from a dashboard.

guiding principles when creating or editing Radar content: - Answer -Any dashboard available to a user must work
-Each component on a dashboard must work
-All dashboards should have a defined target audience -Each user in that audience must have the security to use every component on the dashboard

The Dashboard Editor has up to six forms that control the dashboard's content and its metadata: - Answer -Basic Information

- Layout
- Content
- Resource Settings
- Parameters
- Access

T/F The Dashboard Editor can be used to view the settings of any dashboard in your system, but only custom-built dashboards can be modified. Epic-released dashboards will be read- only. - Answer True

Basic Information - Answer The Basic Information form records the purpose, ownership, and general information of a dashboard.

Display title - Answer End users see the display title in the Analytics Catalog and when they view a dashboard.

EPIC COG170인증덤프는 최근 출제된 실제시험문제를 바탕으로 만들어진 공부자료입니다. EPIC COG170 시험문제가 변경되면 제일 빠른 시일내에 덤프를 업데이트하여 최신버전 덤프자료를EPIC COG170덤프를 구매한 분들께 보내드립니다. 시험탈락시 덤프비용 전액환불을 약속해드리기에 안심하시고 구매하셔도 됩니다.

최신 Epic Cogito Fundamentals COG170 무료샘플문제 (Q63-Q68):

질문 # 63

To troubleshoot a Caboodle dimension table missing recent data from Clarity, despite successful ETL, what advanced log or tool to check for mapping errors?

- A. Dashboard metric history
- **B. Clarity Console for extraction logs and Caboodle admin for load errors**
- C. SlicerDicer for data validation
- D. Record Viewer for Chronicles source

정답: B

질문 # 64

A Workbench report with grouped summary by provider and location needs to incorporate sub-groups for specialty and sub-measures like cost variance. For advanced aggregation, what in Summary tab?

- **A. Multi-level grouping with nested aggregates (e.g., avg of sum)**
- B. Single level only
- C. Use Explore for sub-groups
- D. Link to SlicerDicer

정답: A

질문 # 65

A Cogito SQL report, sourced from Clarity, groups inpatient admissions by diagnosis-related group (DRG) and calculates multiple metrics (e.g., average cost, length of stay), with a trace log for debugging. The report must be restricted to financial analysts and support export to Epic's benchmarking database. Which configuration is correct?

- A. Create in SlicerDicer, add DRG slices, enable trace logging, restrict via Action Groups, and link to Clarity.
- B. Build in Chronicles, configure summary targets, disable ad hoc searches, set security points, and enable benchmarking filters.
- C. Use Caboodle, assign user roles in Hyperspace, configure Threshold Overrides, and enable benchmarking in SlicerDicer.
- **D. Use Clarity, group via the Display tab, enable trace logging, assign a Report Group for financial analysts, and configure benchmarking export in Report Settings.**

정답: D

질문 # 66

A SlicerDicer session in a dashboard component shows incomplete data for hospital readmissions. The session uses the Encounters data model. What could resolve this issue?

- A. Switch the data source to real-time Chronicles data.
- B. Assign a new Report Group to the component.
- **C. Schedule regular ETL processes to update Caboodle.**
- D. Rebuild the session in Hyperspace with new filters.

정답: C

질문 # 67

For the metric-based component shown below, what is the View As field set to in the component editor?

- **A. Resources**
- B. Summary Targets

정답: A
