

Authentic F5 F5CAB1 Exam Questions

What's more, part of that Pass4cram F5CAB1 dumps now are free: https://drive.google.com/open?id=1c-XqEmQgeuMctIo7c5yD7e_UPKKOIK_e

The more times you choose us, the more discounts you may get. To make your whole experience more comfortable, we also provide considerate whole package services once you make decisions of our F5CAB1 test question. If you have any questions related to our F5CAB1 exam prep, pose them and our employees will help you as soon as possible. It is a mutual benefit job, that is why we put every exam candidates' goal above ours, and it is our sincere hope to make you success by the help of F5CAB1 Guide question and elude any kind of loss of you and harvest success effortlessly.

F5 F5CAB1 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• BIG IP Administration Support and Troubleshooting: This section of the exam measures skills of Network Administrators and covers identifying and resolving common issues that affect BIG IP operation. It focuses on using logs, statistics, diagnostic tools, and basic troubleshooting methods to restore normal traffic flow and maintain stable application delivery.
Topic 2	<ul style="list-style-type: none">• BIG IP Administration Data Plane Configuration: This section of the exam measures skills of System Administrators and covers configuring BIG IP objects that control data plane behavior. It focuses on setting up virtual servers, pools, nodes, monitors, and profiles so that applications are delivered reliably and efficiently according to design requirements.
Topic 3	<ul style="list-style-type: none">• BIG IP Administration Install Initial Configuration and Upgrade: This section of the exam measures skills of System Administrators and covers the lifecycle tasks for deploying and maintaining a BIG IP system. It includes installing the platform, performing initial setup, applying licenses, configuring basic networking, and planning and executing software upgrades and hotfixes.

Topic 4	<ul style="list-style-type: none"> • BIG IP Administration Data Plane Concepts: This section of the exam measures skills of Network Administrators and covers how BIG IP handles application traffic on the data plane. It includes understanding flow of traffic, key data path components, basic concepts of load balancing, and how security and performance features affect user traffic.
Topic 5	<ul style="list-style-type: none"> • BIG IP Administration Control Plane Administration: This section of the exam measures skills of System Administrators and covers managing the control plane where BIG IP is configured and administered. It includes working with user accounts, roles, device settings, configuration management, and using the graphical interface and command line for daily administrative tasks.

Dumps F5CAB1 Free Download, New F5CAB1 Test Vce

The most important is that you just only need to spend 20 to 30 hours on practicing F5CAB1 exam questions before you take the exam, therefore you can arrange your time to balance learning and other things. Of course, you care more about your test pass rate. We offer you more than 99% pass guarantee if you are willing to use our F5CAB1 test guide and follow our plan of learning. If you fail to pass the exam with our BIG-IP Administration Install, Initial Configuration, and Upgrade torrent prep, you will get a full refund. However, if you want to continue studying our course, you can still enjoy comprehensive services through F5CAB1 Torrent prep. We will update relevant learning materials in time. And we guarantee that you can enjoy a discount of more than one year.

F5 BIG-IP Administration Install, Initial Configuration, and Upgrade Sample Questions (Q57-Q62):

NEW QUESTION # 57

Which two items demonstrate the creation of a new volume for software images? (Choose two.)

- A. Using the GUI, go to System > Disk Management, select New Volume. In the pop-up window, type the name or number of the new volume and click Apply.
- B. `tmsh install /sys software image BIGIP-<version>.iso volume HD1.5 create-volume`
- C. `tmsh install sys software image /shared/images/BIGIP-<version>.iso volume HD1.5 create-volume`
- D. `tmsh install software image /shared/images/BIGIP-<version>.iso volume HD1.5 create-volume`
- E. Using the GUI, go to System > Software Management > Available Images > Install, and in the Install Software Image pop-up window, type the new volume name or number and click Install.

Answer: A,D

Explanation:

In BIG-IP, software images are installed on boot volumes (for example, HD1.1, HD1.2, HD1.3, etc.).

To install software on a new volume, the administrator must instruct the system to create a new boot location before installation.

There are two correct ways to create a new volume:

A). `tmsh` command (with correct syntax)

`tmsh install software image /shared/images/BIGIP-<version>.iso volume HD1.5 create-volume` This syntax correctly includes:

`install software image`

full path to ISO (`/shared/images/...`)

volume name (HD1.5)

`create-volume` keyword

This instructs BIG-IP to create the new boot volume as part of the installation.

C). Using the GUI System > Disk Management

From the Disk Management menu, the administrator can:

Select "New Volume"

Enter the volume identifier (e.g., HD1.5)

Apply changes

This GUI method is officially supported and explicitly creates a new boot volume before installing the software.

NEW QUESTION # 58

Which configuration file can a BIG-IP administrator use to verify the provisioned modules?

- A. /config/bigip.license
- B. /config/bigip_base.conf
- **C. /config/bigip.conf**
- D. /var/local/ucs/config.ucs

Answer: C

Explanation:

Provisioning settings define which modules are enabled and how system resources are allocated to them.

These provisioning declarations are stored in:

/config/bigip.conf

This file contains:

- * Full module provisioning statements
- * TMSH-equivalent provisioning configurations such as:
 - * sys provision ltm { level nominal }
 - * sys provision asm { level nominal }

It is the primary system configuration file that stores all active provisioning details.

Why the other answers are incorrect

A). /config/bigip.license

* Shows licensed modules, not provisioned modules.

B). /config/bigip_base.conf

* Stores base networking (VLANs, Self-IPs, routes), not provisioning.

D). config.ucs

* A backup archive, not a live configuration file.

Thus, the correct file to review active module provisioning is /config/bigip.conf.

NEW QUESTION # 59

The BIG-IP Administrator uses Secure Copy Protocol (SCP) to upload a TMOS image to the /shared/images/ directory in preparation for a TMOS upgrade.

After the upload is completed, what will the system do before the image is shown in the GUI under:

System » Software Management » Image List?

- A. The system performs a reboot into a new partition
- **B. The system verifies the internal checksum**
- C. The system copies the image to /var/local/images/

Answer: B

Explanation:

When a TMOS image (.iso file) is uploaded into the /shared/images/ directory, the BIG-IP performs an internal validation step before the ISO appears in the GUI.

1. The system verifies the internal checksum

- * BIG-IP automatically reads the embedded checksum inside the ISO file
- * Verifies integrity of the uploaded image
- * Confirms the file is not corrupted or incomplete
- * Ensures the image is a valid F5 TMOS software image

Only after this checksum verification succeeds does the image appear under:

System # Software Management # Image List

Why the other options are incorrect:

A). The system performs a reboot into a new partition

* Uploading an ISO file never triggers a reboot.

C). The system copies the image to /var/local/images/

* All valid TMOS images remain in /shared/images/.

* No copying occurs.

NEW QUESTION # 60

Which of the following actions is NOT required during the initial setup of a BIG-IP system?

- A. Set up self-IPs
- B. Assign an administrative password
- C. Set up SSL certificates
- D. Install a software license

Answer: C

Explanation:

Setting up SSL certificates is typically done after the initial setup, not during it. The main tasks during initial setup involve network configuration and licensing.

NEW QUESTION # 61

What command will allow the BIG-IP Administrator to view the configured management IP of a BIG-IP system? (Choose one.)

- A. tmsh show sys management-ip
- B. tmsh list sys management-ip
- C. tmsh list sys management-route
- D. tmsh list net self

Answer: B

Explanation:

Comprehensive and Detailed Explanation (Paraphrased)

The BIG-IP stores the configured management IP address as a system configuration object under the /sys hierarchy.

To display configured (persistent) values, BIG-IP uses the tmsh list command, not show.

Why tmsh list sys management-ip is correct

* The management IP configuration is defined under:

* /sys management-ip

* Running:

* tmsh list sys management-ip

displays:

* The configured management IP address

* Netmask

* Associated attributes

This command shows the actual configured management IP, which is what the question asks for.

Why the other options are incorrect

A). tmsh show sys management-ip

* The show command is used for runtime statistics and status.

* management-ip is a configuration object, not a statistics object.

C). tmsh list sys management-route

* Displays management routing information, not the management IP address itself.

D). tmsh list net self

* Displays Self IPs used on the data plane.

* Does not show the management interface IP.

NEW QUESTION # 62

.....

With the help of the F5 F5CAB1 brain dumps and preparation material provided by Pass4cram, you will be able to get F5 F5-CA certified at the first attempt. Our F5 experts have curated an amazing F5CAB1 exam guide for passing the F5CAB1 Exam. You can get the desired outcome by preparing yourself from the F5CAB1 exam dumps material provided by Pass4cram. We frequently update our F5CAB1 exam preparation material to reflect the latest changes in the F5CAB1 exam syllabus.
