2026 Useful Latest Chrome-Enterprise-Administrator Braindumps Questions | Professional Chrome Enterprise Administrator Certification Exam 100% Free Valid Braindumps

It is not hard to know that Chrome-Enterprise-Administrator study materials not only have better quality than any other study materials, but also have better quality. On the one hand, we can guarantee that you will pass the Chrome-Enterprise-Administrator exam easily if you learn our Chrome-Enterprise-Administrator Study Materials; on the other hand, you will learn a lot of useful

knowledge from our Chrome-Enterprise-Administrator learning braindump. Are you ready? You can free download the demo of our Chrome-Enterprise-Administrator study materials on the web first.

Google Professional Chrome Enterprise Administrator Certification Exam Sample Questions (Q31-Q36):

NEW QUESTION # 31

An end user is returning from an extended leave of absence and finds their browser is no longer active. The administrator is not sure if the inactivity policy has been violated. What is the minimum action necessary to re-enroll this browser?

- A. Delete the browser from CEC and reopen Chrome
- B. Verify the policy has been violated and then wipe the browser
- C. Delete the device management token and reopen Chrome
- D. Close and reopen Chrome

Answer: C

Explanation:

If a browser becomes inactive due to policy, the device management token likely needs to be refreshed or re-established. Deleting the token and then reopening Chrome will typically trigger the browser to attempt re-enrollment and obtain a new token, bringing it back under management. Wiping the browser or deleting it from the CEC might be necessary in more severe cases but is not the minimum action. Simply closing and reopening Chrome might not be sufficient if the token has expired or been invalidated.

NEW QUESTION # 32

How often do extensions update?"

- A. Extensions only update when the user manually initiates the update process from the Chrome Web Store's extension management page
- B. Extensions update immediately whenever the developer publishes a new version to the Chrome Web Store, regardless of whether Chrome is running
- C. When Chrome is running, the update occurs within the first few minutes of launching Chrome and then again every few hours. Updates occur when users sign into the Chrome Web Store
- D. When Chrome is not running, the update occurs within the first few minutes of OS loading and then again every few hours when a new version is available in the Chrome Web Store, even when Chrome is not running

Answer: C

Explanation:

Chrome checks for extension updates periodically when the browser is running. This check typically happens within the first few minutes of launching Chrome and then again every few hours. While updates are triggered by developers publishing to the Chrome Web Store, the actual update on the user's browser happens when Chrome is active and performs these periodic checks. Option A is incorrect as extensions generally don't update when Chrome is not running. Option C describes a manual update process, which is not the default behavior. Option D is incorrect because the update on the user's end is dependent on Chrome being active and checking for updates.

NEW QUESTION # 33

A browser administrator is looking to deploy Chrome Enterprise Core and build a configuration that supports both managed device browsers as well as managed profiles. Company

- Employees
- Users
- Contractors

If this is the current organizational unit (OU) structure in the Google Admin console, which change should the administrator make to the structure to support the desired use case?

- A. Create a Managed Browsers OU nested under the Employees OU
- B. Create a Managed Browsers OU nested under the Company OU
- C. Create a Managed Browsers OU nested under the Users OU
- D. Create a Managed Browsers OU nested under the Contractors OU

Answer: B

Explanation:

To effectively manage both managed device browsers (which apply policies at the device level) and managed profiles (which apply policies at the user profile level), creating a separate OU at the top level (under "Company") or directly under it, specifically for "Managed Browsers," is the recommended approach. This allows for distinct policies tailored to the browser instance, regardless of the user signed in. Nesting under specific user OUs (Employees, Users, Contractors) would complicate the management of shared devices or scenarios where different user types might use the same managed browser.

NEW QUESTION # 34

An administrator is modifying a policy at the top-level organizational unit (OU), and there is an OU below that should not accept this modification. What can the administrator do to be certain of this*?

- A. Set policy precedence to Child > Parent
- B. Turn off inheritance for all policies
- C. Set the policy to locally applied at the parent OU
- **D. Set the policy to locally applied at the child OU**

Answer: D

Explanation:

To prevent a child OU from inheriting a policy set at a parent OU, the administrator needs to configure the policy within the child OU itself and set its inheritance status to "Locally applied." This explicitly overrides the inherited policy from the parent with a specific setting for the child OU. Setting it to locally applied at the parent would not prevent inheritance. Turning off inheritance entirely might not be desired for other policies, and "Child > Parent" is the default precedence when inheritance is enabled.

NEW QUESTION # 35

The security team has a request to approve two extensions with similar functionality. They only want to approve one extension for use in the environment to avoid redundancy. What is an objective measurement that the security team can use to help determine which extension may be safer to use?

- A. Chrome Web Store Ratings
- **B. 3rd Party Risk Score**
- C. Chrome Manifest Version
- D. Permission Count

Answer: B

Explanation:

A "3rd Party Risk Score" provides an objective assessment of the extension's security and privacy risks, often based on automated analysis of its code, requested permissions, developer reputation, and other factors. This is a more data-driven approach to evaluating safety compared to simply counting permissions (which doesn't account for the sensitivity of each permission), the Manifest version (which indicates features but not necessarily safety), or Chrome Web Store ratings (which are subjective and can be manipulated).

NEW QUESTION # 36

.....

You can take advantage of several perks if you buy Pass4sureCert's bundle package of Google Chrome-Enterprise-Administrator dumps. The bundle package is cost-effective and includes all three formats of Professional Chrome Enterprise Administrator Certification Exam exam preparation material: Google Chrome-Enterprise-Administrator PDF Dumps, Questions and Answers, and Google Chrome-Enterprise-Administrator Practice Test software (online and offline). Google Chrome-Enterprise-Administrator Dumps are worth trying while preparing for the exam. You will be sure of what Google Chrome-Enterprise-Administrator exam questions will be asked in the exam.
