Performance by Exam Section

Performance on each exam section is shown only for reference. The exam grade is based on the overall exam performance and not on the performance of individual exam sections. The main topics assessed on the exam are listed, with the proportion filled indicating the strength of each section. The chart is based on a 0% - 100% scale. If a bar is not displayed for an exam section, no questions were answered correctly for that topic.

Based on the partial outputs displayed, which devices can be members of a FortiAnalyzer Fabric?

- A. FortiAnalyzer1 and FortiAnalyzer2
- B. FortiAnalyzer2 and FortiAnalyzer3
- C. FortiAnalyzer1 and FortiAnalyzer3
- **D. All devices listed can be members.**

Answer: D

Explanation:

In a FortiAnalyzer Fabric, devices can participate in a cluster or grouping if they meet specific compatibility criteria. Based on the outputs provided, let's evaluate these criteria:

* Version Compatibility:

* All three devices, FortiAnalyzer1, FortiAnalyzer2, and FortiAnalyzer3, are running version v7.

4.1-build0238, which is the same across the board. This version alignment is crucial because FortiAnalyzer Fabric requires that devices run compatible firmware versions for seamless communication and management.

* Platform Type and Configuration:

* All three devices are configured as Standalone in the HA mode, which allows them to operate independently but does not restrict their participation in a FortiAnalyzer Fabric. Each device is also on the FAZVM64-KVM platform type, ensuring hardware compatibility.

* Global Settings:

* Key settings such as adm-mode, adm-status, and adom-mode are consistent across all devices (adm-mode: normal, adm-status: enable, adom-mode: normal), which aligns with requirements for fabric integration and role assignment flexibility.

* Each device also has the log-forward-cache-size set, which is relevant for forwarding logs within a fabric environment.

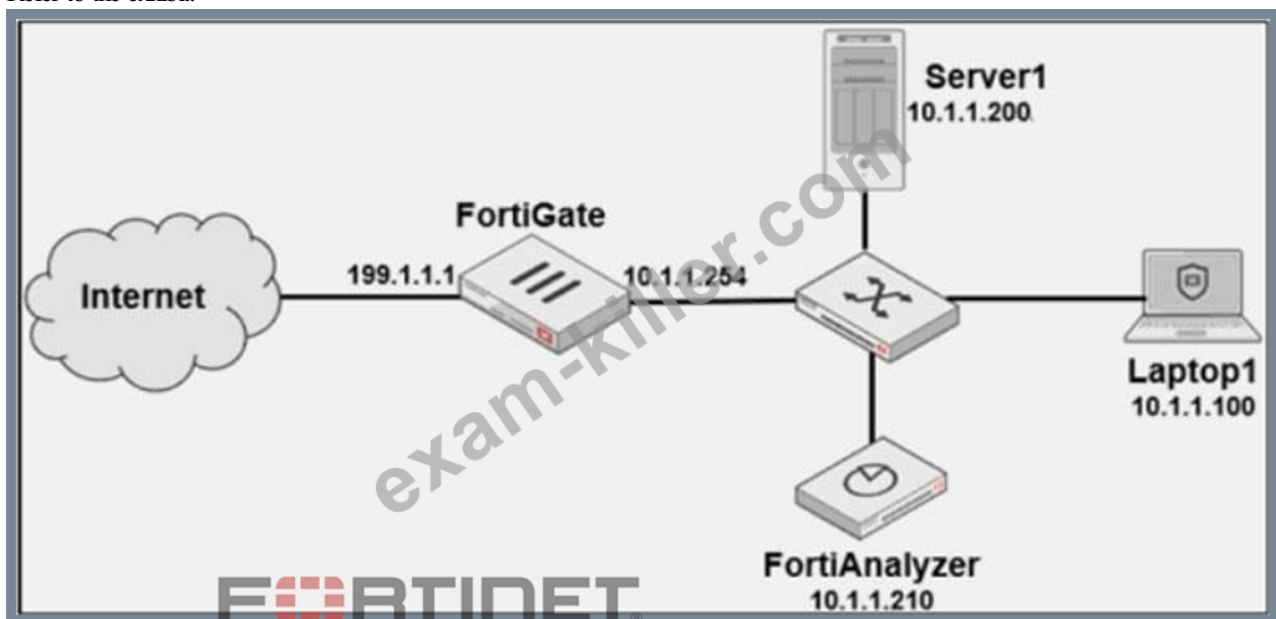

Based on the above analysis, all devices (FortiAnalyzer1, FortiAnalyzer2, and FortiAnalyzer3) meet the requirements to be part of a FortiAnalyzer Fabric.

* FortiAnalyzer 7.4.1 documentation outlines that devices within a FortiAnalyzer Fabric should be on the same or compatible firmware versions and hardware platforms, and they must be configured for integration.

Given that all devices match the version, platform, and mode criteria, they can all be part of the FortiAnalyzer Fabric.
