PDF 1z0-1042-24 VCE, 1z0-1042-24 Reliable Exam Syllabus

Our services before, during and after the clients use our 1z0-1042-24 study materials are considerate. Before the purchase, the clients can download and try out our 1z0-1042-24 study materials freely. During the clients use our products they can contact our online customer service staff to consult the problems about our products. After the clients use our 1z0-1042-24 Study Materials if they can't pass the test smoothly they can contact us to require us to refund them in full and if only they provide the failure proof we will refund them at once. Our company gives priority to the satisfaction degree of the clients and puts the quality of the service in the first place.

Oracle 1z0-1042-24 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Testing, Monitoring, and Troubleshooting Integrations: This section assesses candidates abilities in testing, monitoring, and troubleshooting integrations within the OIC.

Topic 2	<ul style="list-style-type: none"> Creating Scheduled Integrations: In this section of the exam, candidates are evaluated based on their skills in managing scheduled integrations. This includes converting scheduled integrations to app-driven integrations and understanding the scheduling options within the OIC.
Topic 3	<ul style="list-style-type: none"> Creating Orchestrated Integrations: This part of the exam evaluates the candidate's skills in creating and managing orchestrated integrations using OIC. Candidates should be able to manage OIC lookups, use the OIC Data Mapper, and incorporate custom JavaScript libraries into their integrations.
Topic 4	<ul style="list-style-type: none"> Getting Started with OIC Integrations: This section tests the ability of IT professionals and integration specialists to understand the fundamental components and concepts of Oracle Integration Cloud (OIC). Candidates are expected to describe the key features of OIC integration and explain core integration concepts.
Topic 5	<ul style="list-style-type: none"> Using OIC Connections & Adapters: Candidates must demonstrate their ability to create and configure OIC connections, including trigger and invoke connections. They should be familiar with the Connectivity Agent, which facilitates on-premises connectivity to OIC services.

Oracle Cloud Infrastructure 2024 Application Integration Professional Sample Questions (Q84-Q89):

NEW QUESTION # 84

You created a scheduled integration in Oracle Integration Cloud (OIC) that uses scheduled parameters named startDate and endDate to determine the date range for a data synchronization process. The default values for these parameters are set to the previous day for startDate and the current day for endDate. However, you now want to schedule a run of the instance with a different start date.

What should you do?

- A. Modify the parameter value in the integration code and redeploy the integration.
- B. Create a new version of the integration by modifying the parameter value, and then deploy the new scheduled integration version.
- C. Modify the parameter value in the instance's integration properties and restart the instance.
- D. Override the parameter value when scheduling the integration instance.**

Answer: D

Explanation:

Override the parameter values when scheduling the instance. This approach is efficient and flexible, allowing you to adjust the schedule parameters without modifying the integration.

NEW QUESTION # 85

Which of the following Service-Oriented Architecture Cloud Service (SOA CS) Components is NOT used to directly route a message to an endpoint?

- A. Oracle Mediator
- B. Oracle Business Rules**
- C. Oracle Service Bus
- D. Oracle BPEL Process Manager

Answer: B

Explanation:

Oracle Business Rules is used to define and execute business rules, but it does not handle message routing directly, unlike Mediator, BPEL Process Manager, and Service Bus.

NEW QUESTION # 86

When creating integrations in Oracle Integration Cloud (OIC), a visual mapper enables you to map element nodes between

applications by dragging source element nodes onto target element nodes.
Which statement is NOT true about the OIC Data Mapper functionality?

- A. The data structure for the target service is always displayed on the right side in the Designer view.
- B. In the Designer view, the Sources section contains data structures of all available data objects, which includes integration metadata, tracking variables, global variables, and integration property values.
- C. When you navigate to the mapper and select a target element, Expression Builder launches in a user-friendly mode by default.
- **D. All Source and Target data objects are represented internally as JSON structures.**
- E. All transformation mappings use eXtensible Stylesheet Language (XSL).

Answer: D

Explanation:

Not all Source and Target data objects are represented as JSON structures in OIC; XML and other data formats are also supported. The rest of the statements are true regarding the OIC data mapper functionality.

NEW QUESTION # 87

To use Integration Insight to map milestones to actions in an Oracle Integration Cloud (OIC) business process implementation, certain prerequisites and conditions must be met.

Which is NOT a valid consideration for models and mapping milestones?

- A. Milestones in a single model can be mapped to multiple business processes.
- B. Extraction criteria for the instance unique identifier is defined with an XPath extension.
- **C. A business process implementation can be mapped to milestones within only one model.**
- D. Extraction criteria for the milestone indicator is defined with an XPath expression.
- E. The model must be in Draft state in order to map a milestone to an integration action.

Answer: C

Explanation:

A business process implementation can be mapped to milestones across multiple models, making the incorrect statement. Milestones can be used in complex scenarios, shared between processes, and can be identified with XPath expressions.

NEW QUESTION # 88

In an Oracle Integration (OIC) project, you are asked to leverage a custom JavaScript library function to be used within an Application pattern integration flow. Which set of steps should you follow to handle this requirement?

- **A. Import the JavaScript library file to the project, then use the JavaScript action within the integration flow to reference the library function.**
- B. Import the JavaScript library file into your OIC instance's database schema, then use a Local Invoke action to call the function.
- C. Copy and paste the JavaScript function code into a new JavaScript stage within the integration flow, then map the inbound and outbound data elements in the corresponding Map action.
- D. Use the Function Call action within the integration flow to reference the external URL that is hosting the JavaScript library function.

Answer: A

Explanation:

Comprehensive and Detailed Explanation:

JS Library:

* B: True-import and reference is standard.

NEW QUESTION # 89

.....

They put all their efforts to maintain the top standard of Oracle 1z0-1042-24 exam questions all the time. So you rest assured that

with Oracle 1z0-1042-24 exam dumps you will get everything thing that is mandatory to learn, prepare and pass the difficult Oracle 1z0-1042-24 Exam with good scores. Take the best decision of your career and just enroll in the Oracle 1z0-1042-24 certification exam and start preparation with Oracle 1z0-1042-24 practice questions without wasting further time.
