

Pass-Sure F5CAB1 Reliable Dump Provide Prefect Assistance in F5CAB1 Preparation

Score Report

F5CAB1 - BIG-IP Administration Install, Initial Configuration, and Upgrade

Exam Score Report

Date Tested: 12/9/2025

Candidate: [Redacted]

Thank you for completing the F5CAB1 - BIG-IP Administration Install, Initial Configuration, and Upgrade exam. Based on preliminary exam scoring, you have **Passed**.

This is a preliminary result. Your exam results can be found in the Education Services Portal within 24 hours.

P.S. Free 2026 F5 F5CAB1 dumps are available on Google Drive shared by DumpsQuestion: <https://drive.google.com/open?id=1INNzsV5gVeOrR8fbwXZZcURe9j pzZyxA>

The loss of personal information in the information society is indeed very serious, but F5CAB1 guide materials can assure you that we will absolutely protect the privacy of every user. Our F5CAB1 study braindumps users are all over the world, is a very international product, our F5CAB1 Exam Questions are also very good in privacy protection. And we offer good services on our F5CAB1 learning guide to make sure that every detail is perfect.

F5 F5CAB1 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">BIG IP Administration Data Plane Concepts: This section of the exam measures skills of Network Administrators and covers how BIG IP handles application traffic on the data plane. It includes understanding flow of traffic, key data path components, basic concepts of load balancing, and how security and performance features affect user traffic.
Topic 2	<ul style="list-style-type: none">BIG IP Administration Control Plane Administration: This section of the exam measures skills of System Administrators and covers managing the control plane where BIG IP is configured and administered. It includes working with user accounts, roles, device settings, configuration management, and using the graphical interface and command line for daily administrative tasks.

Topic 3	<ul style="list-style-type: none"> • BIG IP Administration Support and Troubleshooting: This section of the exam measures skills of Network Administrators and covers identifying and resolving common issues that affect BIG IP operation. It focuses on using logs, statistics, diagnostic tools, and basic troubleshooting methods to restore normal traffic flow and maintain stable application delivery.
Topic 4	<ul style="list-style-type: none"> • BIG IP Administration Data Plane Configuration: This section of the exam measures skills of System Administrators and covers configuring BIG IP objects that control data plane behavior. It focuses on setting up virtual servers, pools, nodes, monitors, and profiles so that applications are delivered reliably and efficiently according to design requirements.
Topic 5	<ul style="list-style-type: none"> • BIG IP Administration Install Initial Configuration and Upgrade: This section of the exam measures skills of System Administrators and covers the lifecycle tasks for deploying and maintaining a BIG IP system. It includes installing the platform, performing initial setup, applying licenses, configuring basic networking, and planning and executing software upgrades and hotfixes.

Valid F5CAB1 Vce, Exam F5CAB1 Consultant

In your day-to-day life, things look like same all the time, but preparing for critical F5CAB1 practice exam is not one of those options. About the exam ahead of you this time, our F5CAB1 study braindumps will be your indispensable choices. Before you get the official one, you can estimate our quality by downloading the free demos. You will pay just a small amount of money on our F5CAB1 Exam Guide but harvest colossal success with potential bright future. And we have confidence that your future aims will come along with this successful exam as the beginning. So choosing F5CAB1 actual question is choosing success.

F5 BIG-IP Administration Install, Initial Configuration, and Upgrade Sample Questions (Q48-Q53):

NEW QUESTION # 48

Which one of the following is a port and protocol combination allowed by the Allow Default setting for Port Lockdown?

- A. TCP 80
- B. UDP 8443
- **C. TCP 443**

Answer: C

Explanation:

Port Lockdown controls which ports and protocols a Self IP will respond to.

The Allow Default setting permits only a predefined set of BIG-IP internal and required service ports.

The Allow Default list includes:

- * TCP 443 # HTTPS (Management/TMUI access via Self-IP)
- * TCP 4353 # CMI (device sync)
- * TCP/UDP ports related to HA communication
- * Other essential internal F5 ports

Why TCP 443 is correct:

- * It is one of the officially allowed ports under Allow Default.
- * It enables HTTPS/TMUI access through a Self IP.

Why the other options are incorrect:

A). TCP 80 (HTTP)

* Not allowed under Allow Default

* HTTP via Self-IP is blocked unless placed under Allow Custom

B). UDP 8443

* Not an F5 default service

* Not part of the Allow Default ports

NEW QUESTION # 49

A BIG-IP Administrator plans to upgrade a BIG-IP device to the latest TMOS version. Which two tools could the administrator leverage to verify known issues for the target versions? (Choose two.)

- A. F5 University
- **B. F5 iHealth**
- **C. F5 Bug Tracker**
- D. F5 End User Diagnostics (EUD)
- E. F5 Downloads

Answer: B,C

Explanation:

When performing a TMOS upgrade, F5 recommends validating the target software version to ensure that the release does not contain defects that may impact system behavior. The upgrade preparation process includes checking for known issues, validating compatibility, and reviewing advisory information for the intended version. Two primary F5 tools serve this purpose:

B). F5 iHealth

iHealth is a cloud-based diagnostic and analysis platform used to evaluate the operational state of a BIG-IP system.

Administrators upload a QKView file to iHealth to receive an automated assessment of the system.

As part of upgrade planning, iHealth provides:

Version-specific issue analysis, comparing the system's configuration and hardware against F5's internal catalog of published issues. Upgrade advisories, identifying potential risks such as deprecated features, module compatibility concerns, or changes in behavior between TMOS versions.

Checks against known defects, allowing administrators to determine whether the target TMOS version contains issues relevant to their deployment.

This aligns with F5's recommended upgrade workflow, where iHealth is used before upgrading to confirm system readiness and detect software-level concerns.

D). F5 Bug Tracker

The Bug Tracker is F5's dedicated interface for reviewing software defects across TMOS releases.

It enables administrators to:

Search for known bugs by TMOS version, module, severity, or defect ID.

Review the status of defects (open, resolved, fixed in later releases).

Identify whether high-impact or security-related issues are associated with the target upgrade version.

F5 documentation emphasizes reviewing known defects prior to installation of new software images, making the Bug Tracker a critical resource for upgrade validation.

NEW QUESTION # 50

A BIG-IP Administrator discovers malicious brute-force attempts to access the BIG-IP device on the management interface via SSH.

The administrator needs to restrict SSH access to the management interface.

Where should this be accomplished?

- A. Network > Self IPs
- **B. System > Configuration**
- C. System > Platform
- D. Network > Interfaces

Answer: B

NEW QUESTION # 51

Which configuration file can a BIG-IP administrator use to verify the provisioned modules?

- **A. /config/bigip.conf**
- B. /var/local/ucs/config.ucs
- C. /config/bigip.license
- D. /config/bigip_base.conf

Answer: A

Explanation:

Provisioning settings define which modules are enabled and how system resources are allocated to them.

These provisioning declarations are stored in:

`/config/bigip.conf`

This file contains:

- * Full module provisioning statements
- * TMSH-equivalent provisioning configurations such as:
 - * `sys provision ltm { level nominal }`
 - * `sys provision asm { level nominal }`

It is the primary system configuration file that stores all active provisioning details.

Why the other answers are incorrect

A). `/config/bigip.license`

* Shows licensed modules, not provisioned modules.

B). `/config/bigip_base.conf`

* Stores base networking (VLANs, Self-IPs, routes), not provisioning.

D). `config.ucs`

* A backup archive, not a live configuration file.

Thus, the correct file to review active module provisioning is `/config/bigip.conf`.

NEW QUESTION # 52

Which two items demonstrate the creation of a new volume for software images? (Choose two.)

- A. `tmsh install software image /shared/images/BIGIP-<version>.iso volume HD1.5 create-volume`
- B. Using the GUI, go to System > Disk Management, select New Volume. In the pop-up window, type the name or number of the new volume and click Apply.
- C. `tmsh install sys software image /shared/images/BIGIP-<version>.iso volume HD1.5 create-volume`
- D. `tmsh install /sys software image BIGIP-<version>.iso volume HD1.5 create-volume`
- E. Using the GUI, go to System > Software Management > Available Images > Install, and in the Install Software Image pop-up window, type the new volume name or number and click Install.

Answer: A,B

Explanation:

In BIG-IP, software images are installed on boot volumes (for example, HD1.1, HD1.2, HD1.3, etc.).

To install software on a new volume, the administrator must instruct the system to create a new boot location before installation.

There are two correct ways to create a new volume:

A). `tmsh` command (with correct syntax)

`tmsh install software image /shared/images/BIGIP-<version>.iso volume HD1.5 create-volume` This syntax correctly includes:

`install software image`

full path to ISO (`/shared/images/...`)

volume name (HD1.5)

`create-volume` keyword

This instructs BIG-IP to create the new boot volume as part of the installation.

C). Using the GUI System > Disk Management

From the Disk Management menu, the administrator can:

Select "New Volume"

Enter the volume identifier (e.g., HD1.5)

Apply changes

This GUI method is officially supported and explicitly creates a new boot volume before installing the software.

NEW QUESTION # 53

.....

You can avoid this mess by selecting a trusted brand such as Exams. To buy real F5CAB1 Exam Dumps. The credible platform offers a product that is accessible in 3 formats: F5 F5CAB1 Dumps PDF, desktop practice exam software, and a web-based practice test. Any applicant of the F5CAB1 examination can choose from these preferable formats.
