There is no need to worry about virus on buying electronic products. For PDFBraindumps have created an absolutely safe environment and our exam question are free of virus attack. We make endless efforts to assess and evaluate our GH-100 exam question' reliability for a long time and put forward a guaranteed purchasing scheme. If there is any doubt about it, professional personnel will handle this at first time, and you can also have their remotely online guidance to install and use our GH-100 Test Torrent.

Microsoft GH-100 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Manage access and permissions based on membership: This section of the exam measures skills of DevOps Engineers and reviews how to manage organizations, teams, and repository permissions. It includes default permission settings, team synchronization through AD, scripting across multiple organizations, and aligning enterprise policies with trust requirements. It also contrasts roles such as organization members, owners, collaborators, and billing managers.
Topic 2	<ul style="list-style-type: none">• Describe how GitHub is deployed, distributed, and licensed: This section of the exam measures skills of GitHub Enterprise Administrators and highlights the deployment models of GitHub Enterprise Server, Enterprise Cloud, and GitHub AE. It covers licensing structures, billing for seat licenses and metered services, support options, and monitoring license usage across users and machine accounts.
Topic 3	<ul style="list-style-type: none">• Manage user identities and GitHub authentication: This section of the exam measures skills of DevOps Engineers and focuses on managing authentication and identity across organizations using SAML SSO, SCIM, and team synchronization. Candidates need to understand identity providers, user membership implications, authorization models, and enforcing security measures such as two-factor authentication.

Topic 4	<ul style="list-style-type: none"> • Enable secure software development and ensure compliance: This section of the exam measures skills of GitHub Enterprise Administrators and deals with applying GitHub's security and compliance capabilities. It covers policies, auditing, scrubbing sensitive data, secret scanning, code scanning with CodeQL, dependency management with Dependabot, and implementing security response plans. It also explores authentication tokens, app security policies, and enterprise managed users.
Topic 5	<ul style="list-style-type: none"> • Manage GitHub Packages: This section of the exam measures skills of GitHub Enterprise Administrators and focuses on managing GitHub Packages, their use in workflows, and how they differ from releases. It involves accessing, writing, and sharing packages across teams while ensuring integration into CI • CD pipelines.

If you attend the test of GH-100 certification you will update your stocks of knowledge and improve your actual abilities, buying our GH-100 exam practice materials can help you pass the test smoothly. There are no threshold limits to attend the GH-100 test such as the age, sexuality, education background and your job conditions, and anybody who wishes to improve their volume of knowledge and actual abilities can attend the GH-100 test.

Microsoft GitHub Administration Sample Questions (Q34-Q39):

NEW QUESTION # 34

What will happen if Dependabot discovers a vulnerable transitive dependency in a repository?

- A. It opens a pull request to update the affected package directly, regardless of version compatibility.
- B. It automatically removes the package from the repository.
- C. It sends an email to the repository owner but does not alter code.
- D. It creates a pull request to update the direct dependency to a version that resolves the vulnerability.

Answer: D

Explanation:

Dependabot will automatically open a pull request that updates the direct dependency to a version which, in turn, resolves (or removes) the vulnerable transitive dependency-ensuring the fix is applied via your declared dependencies.

NEW QUESTION # 35

You discover that a secret (e.g., a token or password) was accidentally committed to a GitHub repository. What is the first step you should take to mitigate the risk?

- A. Delete the repository and create a new one to ensure the secret is no longer accessible.
- B. Rewrite the repository history using git filter-repo or BFG Repo-Cleaner to remove the secret from all commits.
- C. Contact GitHub Support to remove the secret from all forks and clones of the repository.
- D. Revoke and/or rotate the secret to render it unusable, then assess whether history rewriting is necessary.

Answer: D

Explanation:

The immediate priority is to revoke or rotate the exposed credential so it can no longer be used; once it's invalidated, you can safely proceed with history-rewriting or other cleanup steps.

NEW QUESTION # 36

Which of the following is the responsibility of a Team Maintainer in a GitHub organization? (Choose two.)

- A. Adding or removing team members.
- B. Modifying organization-wide settings.
- C. Deleting repositories assigned to the team.
- D. Managing nested sub-teams.

Answer: A,D

Explanation:

Team maintainers can manage nested sub-teams - requesting to add or change parent/child teams within the organization's hierarchy. Team maintainers have permission to add and remove members from their team, controlling day-to-day team membership.

NEW QUESTION # 37

In a GitHub repository using Dependabot, which of the following best describes the purpose of the `.github/dependabot.yml` file?

- A. It lists commit SHAs to exclude from automatic pull requests.
- B. It enables GitHub to scan for secrets in dependency files.
- C. It configures scheduling, package ecosystems, and target directories for update checks.
- D. It encrypts dependency versions before storing them in the repo.

Answer: C

Explanation:

The `.github/dependabot.yml` file defines Dependabot's package-ecosystem, the directories to inspect, and the update schedule (daily/weekly/monthly), controlling when and where Dependabot checks for new versions.

NEW QUESTION # 38

What needs to be done to ensure that only specific repositories can access the runners in an organization runner group?

- A. Add a label to the runner group.
- B. Configure the Actions Policies to "Only selected repositories".
- C. Configure repository access in the runner group settings.
- D. Use GitHub's meta API to configure access.

Answer: C

Explanation:

In the organization's runner group settings, switch the access from "All repositories" to "Selected repositories" and then explicitly choose which repos may use those runners.

NEW QUESTION # 39

.....

IT certification exam cost is really large cost for most candidates in the whole world. Passing exam at first attempt will be everyone's goal.
