In the era of information, everything around us is changing all the time, so do the SC-100 exam. But you don't need to worry it. We take our candidates' future into consideration and pay attention to the development of our Microsoft Cybersecurity Architect study training dumps constantly. Free renewal is provided for you for one year after purchase, so the SC-100 Latest Questions won't be outdated. The latest SC-100 latest questions will be sent to you email, so please check then, and just feel free to contact with us if you have any problem. Our reliable SC-100 exam material will help pass the exam smoothly.

Microsoft SC-100 (Microsoft Cybersecurity Architect) Certification Exam is one of the most well-known certifications in the cybersecurity industry. It is designed to validate the candidates' knowledge and skills in cybersecurity architecture and provide them with the necessary proficiency to identify and manage security risks in complex enterprise environments. SC-100 exam is ideal for individuals who want to build a career in cybersecurity architecture or for professionals who are currently working in this field and want to upgrade their skills and knowledge.

Microsoft SC-100 Exam Syllabus Topics:

Topic	Details
Topic 1	• Design security solutions for infrastructure: It measures your knowledge of designing solutions for the management of security posture in hybrid and multi cloud environments. Moreover, it also focuses on designing such solutions which are required to secure server and client endpoints. Lastly, it covers how to specify certain needs to secure SaaS, PaaS, and IaaS services.
Topic 2	• Design security solutions for applications and data: Focal points of this topic is designing solutions for securing Microsoft 365, securing applications, and securing an organization's data.
Topic 3	• Design security operations, identity, and compliance capabilities: This topic covers sub-topics related to designing solutions for security operations, identity and access management, securing privileged access, and regulatory compliance.
Topic 4	• Design solutions that align with security best practices and priorities: It covers how to design a strategy of resiliency for ransomware and other attacks based on practices of Microsoft Security. The topic also focuses on designing solutions that align with the Microsoft Cybersecurity Reference Architectures (MCRA) and Microsoft Cloud Security Benchmark (MCSB). Lastly, it delves into designing such solutions that align with the Microsoft Cloud Adoption Framework for Azure and the Microsoft Azure Well-Architected Framework.

SC-100 Dumps For ExamDiscuss - Best

Now it is wise choice for you to choose our SC-100 actual test guide materials. Valid exam questions help you study and prepare double results with half works. You will get high-quality 100% pass rate SC-100 learning prep so that you can master the key knowledge and clear exam easily. You can Pass SC-100 Exam in the shortest time and obtain a certification soon. It will benefit you more. Instead of admiring others' redoubtable life, start your new life from choosing valid test dumps. Our SC-100 actual test guide is the pass king in this field which will be the best option for you.

Microsoft Cybersecurity Architect Sample Questions (Q31-Q36):

NEW QUESTION # 31
For a Microsoft cloud environment, you are designing a security architecture based on the Microsoft Cloud Security Benchmark. What are three best practices for identity management based on the Azure Security Benchmark? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

- A. Manage application identities securely and automatically.
- B. Protect identity and authentication systems.
- C. Manage the lifecycle of identities and entitlements
- D. Use a centralized identity and authentication system.
- E. Enable threat detection for identity and access management.

Answer: B,D,E

NEW QUESTION # 32
Your company has a third-party security information and event management (SIEM) solution that uses Splunk and Microsoft Sentinel. You plan to integrate Microsoft Sentinel with Splunk. You need to recommend a solution to send security events from Microsoft Sentinel to Splunk.
What should you include in the recommendation?

- A. Azure Data Factor
- B. Azure Event Hubs
- C. a Microsoft Sentinel workbook
- D. a Microsoft Sentinel data connector

Answer: B

Explanation:
If data need to go to splunk then event hub.
https://techcommunity.microsoft.com/t5/microsoft-sentinel-blog/azure-sentinel-side-by-side-with- splunk-via-eventhub/ba-p/2307029

NEW QUESTION # 33
You have a Microsoft 365 subscription
You need to recommend a security solution to monitor the following activities:
* User accounts that were potentially compromised
* Users performing bulk file downloads from Microsoft SharePoint Online What should you include in the recommendation for each activity? To answer, drag the appropriate components to the correct activities. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each Correct selection is worth one Point.

Answer:

Explanation:

NEW QUESTION # 34

You have an Azure SQL database named DB1 that contains customer information.

A team of database administrators has full access to DB1.

To address customer inquiries, operators in the customer service department use a custom web app named App1 to view the customer information.

You need to design a security strategy for D81. The solution must meet the following requirements:

* When the database administrators access DB1 by using SQL management tools, they must be prevented from viewing the content of the Credit Card attribute of each customer record.

* When the operators view customer records in App1, they must view only the last four digits of the Credit Card attribute.

What should you include in the design? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 35

Your company has on-premises Microsoft SQL Server databases.

The company plans to move the databases to Azure.

You need to recommend a secure architecture for the databases that will minimize operational requirements for patching and protect sensitive data by using dynamic data masking. The solution must minimize costs.

What should you include in the recommendation?

- A. SQL Server on Azure Virtual Machines
- B. Azure SQL Database
- C. Azure SQL Managed Instance
- D. Azure Synapse Analytics dedicated SQL pools

Answer: D

NEW QUESTION # 36

......

With the development of scientific and technological progress computer in our life play an increasingly important role. The job positions relating to internet are hot. Our SC-100 test dumps files help people who have dreams of entering this field and make a great achievement. IT technology skills are universal, once you get a Microsoft certification (SC-100 Test Dumps files), you can have an outstanding advantage while applying for a job no matter where you are.
