Evaluate Yourself with Online Fortinet FCSS_ADA_AR-6.7 Practice Test Engine

If you can obtain the job qualification FCSS_ADA_AR-6.7 certificate, which shows you have acquired many skills. In this way, your value is greatly increased in your company. Then sooner or later you will be promoted by your boss. Our FCSS_ADA_AR-6.7 preparation exam really suits you best. Our FCSS_ADA_AR-6.7 Study Materials can help you get your certification in the least time with the least efforts. With our FCSS_ADA_AR-6.7 exam questions for 20 to 30 hours, and you will be ready to take the exam confidently.

Fortinet FCSS—Advanced Analytics 6.7 Architect Sample Questions (Q56-Q61):

NEW QUESTION # 56
Refer to the exhibit.

The rule evaluates multiple VPN logon failures within a ten-minute window.
Consider the following VPN failure events received within a ten-minute window:

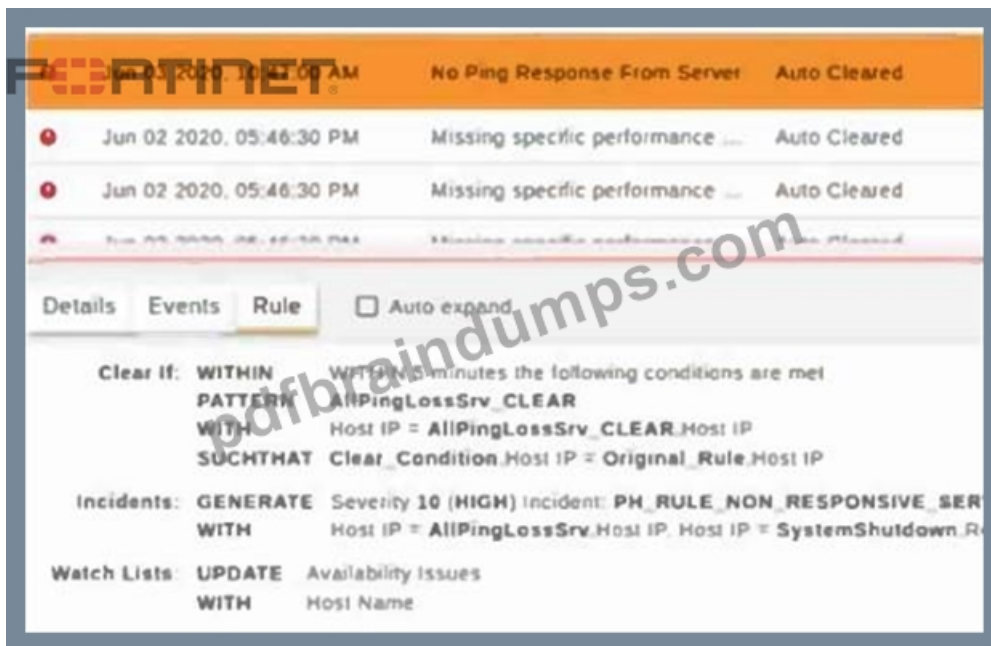

How many incidents are generated?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

NEW QUESTION # 57
Refer to the exhibit.

Why was this incident auto cleared?

- A. Within five minutes, the packet loss percentage dropped to a level where the host IP of the original rule matches the host IP of the clear condition pattern
- B. The original rule did not trigger within five minutes
- C. Within five minutes the packet loss percentage dropped to a level where the reporting IP is the same as the host IP
- D. Within five minutes, the packet loss percentage dropped to a level where the reporting IP is same as the source IP

Answer: A

Explanation:
From the "Clear If" condition in the exhibit:
*WITHIN 5 minutes, the system checks if the pattern AllPingLossSrv_CLEAR occurs.
*The Host IP of the clear condition must match the Host IP of the original rule (Clear_Condition.Host IP = Original_Rule.Host IP).
*If this condition is met, the system automatically clears the incident because it indicates that network connectivity has been restored (packet loss has dropped).
Thus, the incident was auto-cleared because the system detected that the issue was resolved within the defined 5-minute window, meeting the conditions for auto-clearance.

NEW QUESTION # 58
How does FortiSOAR improve incident response times?

- A. By automatically applying security patches?
- B. By coordinating and orchestrating multiple security tools?
- C. By facilitating video conferences with security vendors?
- D. By triggering automated workflows in response to specific incident patterns?

Answer: B,D

NEW QUESTION # 59
Which of the following is crucial when defining and deploying collectors and agents in a SOC environment?

- A. Ensuring high-speed internet connectivity.
- B. Ensuring compatibility with the target system.
- C. Coordinating with the software vendor for updates.
- D. Managing software licenses effectively.

Answer: B

NEW QUESTION # 60
From where does the rule engine load the baseline data values?

- A. The daily database
- B. The profile database
- C. The memory
- D. The profile report

Answer: B

Explanation:
Therule engineinFortiSIEMloadsbaseline data valuesfrom theprofile database. This database stores historical trends and behavioral baselines for various metrics, such asCPU usage, network activity, and authentication patterns.
#Profile databasemaintainslong-term aggregated statisticsfor anomaly detection.
#Baseline valuesare used to comparecurrent eventsagainst expected behavior.
This helps indetecting deviations, such as a sudden increase in failed logins or unusual traffic spikes.

NEW QUESTION # 61
......

Because our Fortinet FCSS_ADA_AR-6.7 practice test is a web-based mock test, there is no need for software installation as it works with all of the popular web browsers, including Internet Explorer, MS Edge, Firefox, Chrome, Opera, and Safari. Your preparation for the FCSS_ADA_AR-6.7 Certification Exam will go more smoothly because our Fortinet FCSS_ADA_AR-6.7 online practice exam precisely replicates the environment of the actual exam.
