Numerous of our loyal customers wrote to us to praise that the AP-207 Exam Questions are the same with the real exam questions and they passed AP-207 exam with ease.

## Salesforce Energy and Utilities Cloud Accredited Professional Sample Questions (Q24-Q29):

### NEW QUESTION # 24

An energy company implementing Energy and Utilities Cloud needs to generate a contract frame its proposals that include up to 100 line items, with its template already built in a DOCX file. According to the new company branding, custom fonts were used.

- A. Client-Side generation, as this doesn't have a high number of line items
- B. Using the Contract Lifecycle Management, which Document Generation mechanism should the administrator recommend?
- C. Server-Side generation, as Client-Side doesn't support custom fonts
- D. Client-Side generation, as Server-Side doesn't support DOCK templates
- E. Server-Side generation, as this has a high number of line items

**Answer: A**

**NEW QUESTION # 25**

What tool should be used to migrate configurations from sandbox to production when a customer has completed configuring OmniStudio components?

- A. IDX Workbench
- B. DataLoader.io
- **C. OmniStudio DataPacks**
- D. Salesforce Export Wizard

**Answer: C**

Explanation:

When migrating configurations, especially those related to OmniStudio components from a sandbox to production environment in Salesforce, OmniStudio DataPacks are the recommended tool. OmniStudio DataPacks, part of the Salesforce DevOps toolkit, allow for the bundling and deployment of complex configurations and metadata associated with OmniStudio components. This tool is specifically designed to handle the intricate dependencies and settings of OmniStudio components, ensuring a seamless and error-free migration process. Reference = Salesforce documentation on OmniStudio deployment and migration strategies emphasizes the use of OmniStudio DataPacks for effective configuration migrations. This is outlined in the Salesforce OmniStudio Developer Guide, which provides detailed instructions on using DataPacks for deploying OmniStudio solutions:

**NEW QUESTION # 26**

A customer has finished development, which includes large volumes of data. They're ready to start UAT for their new Energy and Utilities Cloud implementation.

When should the performance tests be conducted as part of the overall UAT process?

- A. Just before the go-live, so the performance test does not alter the overall load on the system
- **B. At least 3-4 weeks in advance, so there's sufficient time for the developers to fix bugs if necessary**
- C. After the go-live, so the performance can be tracked directly in the production environment
- D. Performance tests should not be done as part of UAT; it should only focus on functional requirements.

**Answer: B**

**NEW QUESTION # 27**

A consultant is facilitating their first requirements gathering session with an energy company in the initial stages of an Energy and Utilities Cloud project and is trying to get clarity on business requirements. The decision will impact numerous contractor organizations that employ the technicians, so the solution should ensure work is distributed fairly and consistently.

Which two approaches can the consultant take to achieve a consensus while building trust?

- **A. Ask probing questions to understand and document the needs of all stakeholders.**
- B. Focus primarily on the contractor organization's concerns.
- C. Demonstrate expertise right away to achieve the fastest stakeholder agreement
- **D. Propose compromises between stakeholders that could result in collective positive outcomes.**

**Answer: A,D**

Explanation:

In the context of facilitating a requirements gathering session for an Energy and Utilities Cloud project with multiple stakeholders, the consultant should aim to build consensus and trust by proposing compromises that could lead to collective positive outcomes and by asking probing questions to understand and document the needs of all stakeholders. This approach ensures that the consultant acknowledges and addresses the concerns and requirements of each party involved, promoting a collaborative environment where solutions are developed with the collective best interest in mind. Reference = The Salesforce Energy and Utilities Cloud documentation on stakeholder engagement and requirements gathering emphasizes the importance of understanding stakeholder needs and finding common ground through effective communication strategies:

### NEW QUESTION # 28

Energy and Utilities Cloud has the capability to provide access to information using several different data access methods Using the Digital Interaction Platform, online web portals, internal console applications, and mobile applications are all examples of which data access technology?

- A. Streaming data API
- B. SSO data access
- C. Omnichannel data access
- D. Metadata API

**Answer: C**

Explanation:

Salesforce Energy and Utilities Cloud provides a comprehensive, unified view of utility customer interactions across multiple channels, facilitating seamless service and support. The digital interaction platform, by leveraging omnichannel data access, enables utilities to offer their customers a consistent experience whether they're accessing information online, through mobile applications, or via internal console applications. This approach ensures that all data access methods are integrated and provide a unified experience, reflecting Salesforce's commitment to creating connected customer experiences across various touchpoints. Reference = Salesforce Energy and Utilities Cloud documentation emphasizes the importance of creating a connected and seamless customer experience across different channels and platforms, which is achieved through omnichannel data access. This can be further explored in the Salesforce Energy and Utilities Cloud guide and the Salesforce Omnichannel features documentation:
