Salesforce Certified Identity and Access Management Architect certification exam covers a broad range of topics related to identity and access management, including authentication, authorization, single sign-on, federation, password policies, and security protocols. Candidates are expected to have a deep understanding of the Salesforce platform, as well as experience working with complex enterprise environments. Identity-and-Access-Management-Architect Exam also assesses a candidate's ability to design and implement identity and access management solutions that meet the unique needs of different types of organizations, such as healthcare, financial services, and government agencies.

Salesforce Certified Identity and Access Management Architect Sample Questions (Q83-Q88):

NEW QUESTION # 83
Universal containers (UC) wants users to authenticate into their salesforce org using credentials stored in a custom identity store. UC does not want to purchase or use a third-party Identity provider. Additionally, UC is extremely wary of social media and does not consider it to be trust worthy. Which two options should an architect recommend to UC? Choose 2 answers

- A. Implement the Openid protocol and configure an Authentication provider
- B. Build a custom web page that uses the identity store and calls frontdoor.jsp
- C. Use a professional social media such as LinkedIn as an Authentication provider
- D. Build a custom Web service that is supported by Delegated Authentication.

Answer: A,D

NEW QUESTION # 84
Universal Containers (UC) has decided to replace the homegrown customer portal with Salesforce Experience Cloud. UC will continue to use its third-party single sign-on (SSO) solution that stores all of its customer and partner credentials.
The first time a customer logs in to the Experience Cloud site through SSO, a user record needs to be created automatically.
Which solution should an identity architect recommend in order to automatically provision users in Salesforce upon login?

- A. Third-party AppExchange solution
- B. Custom login flow and Apex handler
- C. Just-in-Time (JIT) provisioning
- D. Custom middleware and web services

Answer: C

NEW QUESTION # 85
Universal Containers (UC) would like to enable self-registration for their Salesforce Partner Community Users. UC wants to capture some custom data elements from the partner user, and based on these data elements, wants to assign the appropriate Profile and Account values.
Which two actions should the Architect recommend to UC1
Choose 2 answers

- A. Configure Registration for Communities to use a custom Visualforce Page.
- B. Modify the CommunitiesSelfRegController to assign the Profile and Account.
- C. Modify the SelfRegistration trigger to assign Profile and Account.
- D. Configure Registration for Communitiesto use a custom Apex Controller.

Answer: B,D

Explanation:

To enable self-registration for partner community users, UC should modify the CommunitiesSelfRegController class to assign the Profile and Account values based on the custom data elements captured from the partner user. UC should also configure Registration for Communities to use a custom Apex controller that extends the CommunitiesSelfRegController class and overrides the default registration logic3.

Customize Self-Registration

NEW QUESTION # 86
Which two things should be done to ensure end users can only use single sign-on (SSO) to login in to Salesforce?
Choose 2 answers

- A. Request Salesforce Support to enable delegated authentication.
- B. Once SSO is enabled, users are only able to login using Salesforce credentials.
- C. Assign user "is Single Sign-on Enabled" permission via profile or permission set.
- D. Enable My Domain and select "Prevent login from https://login.salesforce.com".

Answer: C,D

NEW QUESTION # 87
Universal Containers (UC) currently uses Salesforce Sales Cloud and an external billing application. Both Salesforce and the billing application are accessed several times a day to manage customers. UC would like to configure single sign-on and leverage Salesforce as the identity provider. Additionally, UC would like the billing application to be accessible from Salesforce. A redirect is acceptable.
Which two Salesforce tools should an identity architect recommend to satisfy the requirements?
Choose 2 answers

- A. App Launcher
- B. salesforce Canvas
- C. Connected Apps
- D. Identity Connect

Answer: A,B

Explanation:
Explanation
Salesforce Canvas is a tool that allows external applications to be embedded into Salesforce as iframes, which can provide a seamless user experience. App Launcher is a feature that allows users to access connected apps from a single location in Salesforce. To enable single sign-on and use Salesforce as the identity provider, the external billing application needs to be configured as a connected app and use an OAuth 2.0 or SAML protocol. Identity Connect is not relevant for this scenario, as it is a tool for synchronizing user data between Salesforce and Active Directory.
