Pass Guaranteed Quiz ASIS - Reliable ASIS-PSP - Physical Security Professional Exam Authorized Exam Dumps

You can also become part of a certified ASIS professional community and achieve your career objectives in a short time period. To do this you just need to enroll in the ASIS-PSP exam and put in all your efforts and prepare well to pass the ASIS-PSP Certification Exam. For the instant and complete ASIS-PSP exam preparation, you need to show firm commitment and dedication and get help from Exams-boost ASIS-PSP practice test questions.

ASIS ASIS-PSP (Physical Security Professional) Exam is a certification exam designed to test an individual's knowledge and understanding of the essential principles and practices of physical security management. The ASIS-PSP is a globally recognized certification that is highly valued in the security management industry. Professionals who earn this certification demonstrate their expertise in designing, implementing, evaluating, and maintaining physical security programs that protect people, assets, and information.

To be eligible to sit for the ASIS-PSP exam, individuals must meet certain education and experience requirements. They must have a minimum of a high school diploma or equivalent and have at least five years of experience in the field of physical security, with at least three years of experience in responsible charge of a physical security function. Alternatively, individuals who have a recognized bachelor's degree or higher may substitute up to four years of the required experience.

ASIS-PSP exam is designed for security professionals who are responsible for designing, implementing, and managing physical security plans and programs. ASIS-PSP Exam covers a wide range of topics, including threat assessment, security management practices, physical security technologies, emergency management, and business continuity planning. Candidates who pass the exam demonstrate their mastery of these concepts and their ability to apply them in real-world situations.

As for any of your suggestions, we will take it into consideration, and effectively improve our ASIS-PSP exam question to better meet the needs of clients.

ASIS Physical Security Professional Exam Sample Questions (Q83-Q88):

NEW QUESTION # 83
Concerns itself with those means by which a given facility protects itself against theft and any natural disasters is called:

- A. refuge
- B. safety measures
- C. precautions
- D. Physical security

Answer: D

Explanation:
Physical security refers to measures taken to protect personnel, equipment, and property from threats such as theft, vandalism, and natural disasters. This includes the use of locks, barriers, surveillance systems, access controls, and emergency response planning. It is a foundational element of organizational security strategy.

NEW QUESTION # 84
When selecting countermeasures for risk mitigation, the security practitioner should consider:

- A. As a threat increases in sophistication, the effectiveness of the countermeasures must also increase, or the additional risk must be managed by some other means
- B. As a threat increases in sophistication, the effectiveness of the countermeasures should remain unchanged
- C. The same levels of countermeasure effectiveness and system performance are needed to address different threats
- D. The effectiveness of individual countermeasures and the entire security system depends on the security department's capabilities

Answer: A

Explanation:
Effective risk mitigation requires proportional countermeasures. As threats become more advanced or sophisticated, security measures must also be upgraded accordingly. If not, the residual risk must be transferred, avoided, or accepted.
A and B are incorrect because they imply static or uniform responses to dynamic threats.
C is overly narrow; system performance depends on multiple factors, not just departmental capability.

POA Manual - Risk Mitigation and Countermeasure Selection

NEW QUESTION # 85
What is an example of a Physical Security Personnel metric?

- A. Integrator response to a service request
- B. Identification of malicious intent
- C. Determination of unauthorized access
- D. Mean time to mitigate vulnerabilities

Answer: A

Explanation:
A Physical Security Personnel metric measures the performance or responsiveness of individuals or teams responsible for maintaining physical security systems. "Integrator response to a service request" measures how quickly and effectively a technician or support provider addresses security system issues-making it a valid personnel performance metric.
A and C relate to threat detection or monitoring, not personnel metrics.

B is a system-level metric, not specific to personnel.

PSP Study Guide - Security Operations and Performance Metrics
POA Manual - Maintenance and Support Standards

NEW QUESTION # 86

_____ requires that the arrestee be turned over to the authorities as soon as practicable and in any event without unreasonable delay.

- A. Threatening loss
- B. Detain
- C. Detention
- D. Arrest

Answer: D

NEW QUESTION # 87

The amount of force may be equal to, but not greater than, the force is being used against them, this phenomenon is called:

- A. Security
- B. Protection
- C. Precautions
- D. Self-defense

Answer: D

Explanation:
Self-defense is a legal doctrine that allows a person to use reasonable force to protect themselves from harm.
The force used must be proportionate to the threat faced-equal to but not exceeding the level of force used against them.
Security (A) and Protection (B) are broader terms.
Precautions (D) are preventive measures, not reactive force.
