Salesforce Certified Experience Cloud Consultant Sample Questions (Q65-Q70):

NEW QUESTION # 65

Partners at Universal Containers (UC) have given feedback that it takes too long for administrators to create new users or reset passwords for partner employees.

What should be done to help UC with user management?

- **A. Delegate external user administration.**
- B. Implement a limit on new users and password resets.
- C. Recommend partners share user credentials.
- D. Create a new user form that automatically triggers a process to create a user.

Answer: A

NEW QUESTION # 66

How can Sharing Sets be used to share records with Customer Community users?

- **A. Create one Sharing Set and add the objects to share in the Sharing Set.**
- B. Create one Sharing Set and use a Sharing Rule to share records with users in the Sharing Set.
- C. Create one Set per object and add the Customer Community profiles to each Sharing Set.
- D. Create one Sharing Set, select the 'All Objects options for the Sharing Set, and add the Customer Community profiles to the Sharing Set.

Answer: A

Explanation:

To share records with Customer Community users using Sharing Sets, you should create one Sharing Set and add the objects to share in the Sharing Set. A Sharing Set is a feature that allows you to share records with Customer Community users based on common account or contact fields. For example, you can share records with users who have the same account ID or contact ID as the record owner. To use Sharing Sets, you need to create one Sharing Set and add the objects that you want to share in the Sharing Set. You can then define the access level and criteria for each object.

NEW QUESTION # 67

Ursa Major Solar (UMS) will be creating a partner portal to distributing leads to partners. Partners will also be able to create their own leads in the portal UMS has decided to use Partner Central template.

- **A. Create a Lead Process for Lead Distribution**
- B. Create a Lead Queue for Lead Distribution.
- C. Configure Lead creation Leadon low Distribution inside PRM Workspace.
- D. Enable Allow External Creation" in Digital Experience settings
- E. Which three should UMS take at a minimum In order to meet the requirement?

Answer: A

NEW QUESTION # 68

DreamHouse Realty (DR) has active participation of home owners and prospective buyers in its Experience Cloud site that uses Chatter. Recently, DR observed a significant number of comments being marked as spam.

OR's Salesforce and Security teams did further analysis and identified the posts made by the spammers.

OR's Management team has decided to remove all the spammers' posts and comments from the Experience Cloud site. What should the Experience Cloud consultant recommend to remove them?

- A. Experience Cloud site managers, moderators, and admins work together to remove all the spammers' posts and comments manually.
- B. Submit a high-priority case with Salesforce Support to remove all of the spammers' posts and comments. The site will be under maintenance state until resolution.
- C. Enable Experience Cloud Einstein features to remove all the spammers' posts and comments as a background action.
- **D. Utilize the Insights reports by creating and using a custom action to remove all the spammers' posts and comments.**

Answer: D

Explanation:

To remove all the spammers' posts and comments from the Experience Cloud site, DR should utilize the Insights reports by creating and using a custom action to remove them. Insights reports are reports that show the activity and engagement metrics on DR's site, such as page views, likes, comments, flags, and moderation actions. DR can use Insights reports to identify the spammers' posts and comments based on the flagging reasons or other criteria. DR can also create a custom action that allows DR to remove multiple posts or comments at once from the Insights reports.

NEW QUESTION # 69

The administrator of the Universal Containers customer site has been making changes in a sandbox and needs to push the changes to production. The administrator is comfortable with point and click changes but is not comfortable with managing code or more technical items.

How should the administrator ensure the changes make it accurately to production?

- A. Rebuild the site from scratch in production.
- **B. Create a change set, upload it to production, and deploy the change set.**
- C. Use the ExperienceDeploy API to push the site to production.
- D. Use Dataloader to migrate the site from sandbox to production.

Answer: B

Explanation:

To ensure the changes make it accurately to production, the administrator should create a change set, upload it to production, and deploy the change set. A change set is a collection of metadata components that can be moved from one org to another. The administrator can use change sets to migrate point-and-click changes, such as custom objects, fields, layouts, and settings, from the sandbox to the production org. The administrator can create a change set in the sandbox, add the components that have been changed, upload it to the production org, and deploy it in the production org.
