

# Get Unparalleled Study Professional-Cloud-Architect Tool and Pass Exam in First Attempt

2026 Latest PrepPDF Professional-Cloud-Architect PDF Dumps and Professional-Cloud-Architect Exam Engine Free Share:  
<https://drive.google.com/open?id=1FJrQw0n6jt6qjL6k16Yh3xCLz0iujHYN>

Though our Professional-Cloud-Architect training guide is proved to have high pass rate, but If you try our Professional-Cloud-Architect exam questions but fail in the final exam, we can refund the fees in full only if you provide us with a transcript or other proof that you failed the exam. We believe that our business will last only if we treat our customers with sincerity and considerate service. So, please give the Professional-Cloud-Architect Study Materials a chance to help you.

The Professional-Cloud-Architect Certification Exam is ideal for IT professionals who have experience in cloud computing and are seeking to enhance their skills and knowledge in cloud architecture. Google Certified Professional - Cloud Architect (GCP) certification is also suitable for individuals who want to demonstrate their expertise to potential employers and clients, as well as IT organizations that want to ensure that their employees have the necessary skills to design and manage cloud solutions using GCP.

## Preparation Process

The official website offers the candidates a wide range of training tools that they can use to build the required knowledge base for the qualifying test. The first step in your preparation must be a thorough review of the exam guide. This document contains a complete list of topics as well as case studies that may be included in the test. The familiarity with the exam topics will also help you assess the scope of work and structure the preparation process. Then, you can proceed with the Professional Cloud Architect learning path. This preparation option offers you online training, in-person classes, and hands-on labs to fully equip you for the upcoming certification exam. Besides that, the applicants can get an insight into the question formats and example content that may be covered in the test using the official sample questions. Additionally, the learners can enhance their knowledge of the exam topics by attending the dedicated webinar or exploring Google Cloud documentation.

## Exam Professional-Cloud-Architect Demo - Test Professional-Cloud-Architect Pdf

Our to-the-point and trustworthy Google Certified Professional - Cloud Architect (GCP) Exam Questions in three formats for the Google Professional-Cloud-Architect certification exam will surely assist you to qualify for Google Professional-Cloud-Architect Certification. Do not underestimate the value of our Google Professional-Cloud-Architect exam dumps because it is the make-or-break point of your career.

**Then, candidates can use different books, like the following:**

- Google Cloud Certified Professional Cloud Architect (3rd Edition) by Soumen Chatterjee

- The Ultimate Guide for Beginners [Google Cloud Platform] by Adney Ainsley
- Professional Cloud Architect – Google Cloud Certification Guide written by Konrad Clapa & Brian Gerrard

All of them are available on Amazon and throw light on major Google Cloud concepts. They allow one to not just learn all the topics but also understand how to solve real-world tasks related to the implementation of GCP. Various scenarios explained and questions for self-assessment are included too.

To familiarize the applicants with daily issues the professionals face in the workplace, the vendor has provided some detailed case studies to refer to. These relate to Mountkirk Games, Dress4Win, and TerramEarth. Finally, one can join an on-demand webinar “Architecting Hybrid Cloud Infrastructure with Anthos” that provides valuable exam tips.

## Google Certified Professional - Cloud Architect (GCP) Sample Questions (Q289-Q294):

### NEW QUESTION # 289

You deploy your custom java application to google app engine.

It fails to deploy and gives you the following stack trace:

□

- A. Upload missing JAR files and redeploy your application
- **B. Digitally sign all of your JAR files and redeploy your application.**
- C. Recompile the CLoakedServlet class using and MD5 hash instead of SHA1

**Answer: B**

### NEW QUESTION # 290

Your company is running a stateless application on a Compute Engine instance. The application is used heavily during regular business hours and lightly outside of business hours. Users are reporting that the application is slow during peak hours. You need to optimize the application's performance. What should you do?

- A. Create a custom image from the existing disk. Create an instance template from the custom image. Create an autoscaled managed instance group from the instance template.
- **B. Create a snapshot of the existing disk. Create a custom image from the snapshot. Create an autoscaled managed instance group from the custom image.**
- C. Create an instance template from the existing disk. Create a custom image from the instance template. Create an autoscaled managed instance group from the custom image.
- D. Create a snapshot of the existing disk. Create an instance template from the snapshot. Create an autoscaled managed instance group from the instance template.

**Answer: B**

Explanation:

<https://cloud.google.com/compute/docs/instance-templates/create-instance-templates>

### NEW QUESTION # 291

Case Study: 3 - JencoMart Case Study

Company Overview

JencoMart is a global retailer with over 10,000 stores in 16 countries. The stores carry a range of goods, such as groceries, tires, and jewelry. One of the company's core values is excellent customer service. In addition, they recently introduced an environmental policy to reduce their carbon output by 50% over the next 5 years.

Company Background

JencoMart started as a general store in 1931, and has grown into one of the world's leading brands known for great value and customer service. Over time, the company transitioned from only physical stores to a stores and online hybrid model, with 25% of sales online. Currently, JencoMart has little presence in Asia, but considers that market key for future growth.

Solution Concept

JencoMart wants to migrate several critical applications to the cloud but has not completed a technical review to determine their suitability for the cloud and the engineering required for migration. They currently host all of these applications on infrastructure that is at its end of life and is no longer supported.

Existing Technical Environment

JencoMart hosts all of its applications in 4 data centers: 3 in North American and 1 in Europe, most applications are dual-homed. JencoMart understands the dependencies and resource usage metrics of their on-premises architecture.

Application Customer loyalty portal

LAMP (Linux, Apache, MySQL and PHP) application served from the two JencoMart-owned U.S. data centers.

Database

- \* Oracle Database stores user profiles

- \* PostgreSQL database stores user credentials

-homed in US West

Authenticates all users

Compute

- \* 30 machines in US West Coast, each machine has:

- \* 20 machines in US East Coast, each machine has:

-core CPU

RAID 1)

Storage

- \* Access to shared 100 TB SAN in each location

- \* Tape backup every week

Business Requirements

- \* Optimize for capacity during peak periods and value during off-peak periods

- \* Guarantee service availability and support

- \* Reduce on-premises footprint and associated financial and environmental impact.

- \* Move to outsourcing model to avoid large upfront costs associated with infrastructure purchase

- \* Expand services into Asia.

Technical Requirements

- \* Assess key application for cloud suitability.

- \* Modify application for the cloud.

- \* Move applications to a new infrastructure.

- \* Leverage managed services wherever feasible

- \* Sunset 20% of capacity in existing data centers

- \* Decrease latency in Asia

CEO Statement

JencoMart will continue to develop personal relationships with our customers as more people access the web. The future of our retail business is in the global market and the connection between online and in-store experiences. As a large global company, we also have a responsibility to the environment through 'green' initiatives and policies.

CTO Statement

The challenges of operating data centers prevents focus on key technologies critical to our long- term success. Migrating our data services to a public cloud infrastructure will allow us to focus on big data and machine learning to improve our service customers.

CFO Statement

Since its founding JencoMart has invested heavily in our data services infrastructure. However, because of changing market trends, we need to outsource our infrastructure to ensure our long- term success. This model will allow us to respond to increasing customer demand during peak and reduce costs.

For this question, refer to the JencoMart case study.

JencoMart has decided to migrate user profile storage to Google Cloud Datastore and the application servers to Google Compute Engine (GCE). During the migration, the existing infrastructure will need access to Datastore to upload the dat

- **A. Authenticate the on-premises infrastructure with a user account and provision service account keys for the VMs.**
- B. Provision service account keys for the on-premises infrastructure and for the GCE virtual machines (VMs).
- C. What service account key-management strategy should you recommend?
- D. Provision service account keys for the on-premises infrastructure and use Google Cloud Platform (GCP) managed keys for the VMs
- E. Deploy a custom authentication service on GCE/Google Container Engine (GKE) for the on- premises infrastructure and use GCP managed keys for the VMs.

**Answer: A**

Explanation:

Migrating data to Google Cloud Platform

Let's say that you have some data processing that happens on another cloud provider and you want to transfer the processed data to Google Cloud Platform. You can use a service account from the virtual machines on the external cloud to push the data to Google Cloud Platform. To do this, you must create and download a service account key when you create the service account and then use that key from the external process to call the Cloud Platform APIs.

### NEW QUESTION # 292

TerramEarth's CTO wants to use the raw data from connected vehicles to help identify approximately when a vehicle in the field will have a catastrophic failure. You want to allow analysts to centrally query the vehicle data.

Which architecture should you recommend?

- A.
- B.
- C.
- D.

**Answer: A**

Explanation:

The push endpoint can be a load balancer.

A container cluster can be used.

Cloud Pub/Sub for Stream Analytics

### NEW QUESTION # 293

You want to allow your operations team to store logs from all the production projects in your Organization, without duplicating logs from other projects. All of the production projects are contained in a folder. You want to ensure that all logs for existing and new production projects are captured automatically. What should you do?

- A. Create an aggregated export on the Organization resource. Set the log sink to be a Cloud Storage bucket in an operations project.
- B. Create an aggregated export on the Production folder. Set the log sink to be a Cloud Storage bucket in an operations project.
- C. Create log exports in the production projects. Set the log sinks to be BigQuery datasets in the production projects and grant IAM access to the operations team to run queries on the datasets.
- D. Create log exports in the production projects. Set the log sinks to be a Cloud Storage bucket in an operations project.

**Answer: B**

Explanation:

An aggregated export is a type of sink that combines and routes log entries from the Google Cloud resources contained by an organization or folder. By creating an aggregated export on the Production folder, you can capture all the logs from the existing and new production projects in that folder automatically.

A log sink is a destination for log entries that match a filter. By setting the log sink to be a Cloud Storage bucket in an operations project, you can store the log entries in Cloud Storage and allow your operations team to access them.
