### Salesforce Certified Slack Consultant Sample Questions (Q67-Q72):

#### NEW QUESTION # 67

A large enterprise is setting up a Slack workspace and wants to establish a process for managing user requests, like adding new integrations or creating channels. What is the best approach for handling these types of requests?

- A. Allow all users to make changes and additions as they see fit without needing approval

- B. Implement a centralized request channel where users can post their requests, which are then reviewed and approved by designated Workspace Admins
- C. Set up an automated bot to instantly approve all user requests to streamline the process
- D. Require users to send direct messages to the Org Owner for every request

**Answer: B**

Explanation:

A centralized request channel with Workspace Admins reviewing and approving requests offers a structured and efficient process for managing user requests, maintaining control while facilitating user needs.

#### NEW QUESTION # 68

How can a Slack user view Salesforce records in Slack?

- A. By sending a Slack message with the Salesforce record ID
- B. By creating a Salesforce report in Slack
- C. By using the Salesforce app in Slack to query Salesforce data
- D. By using a third-party tool

**Answer: C**

Explanation:

The Salesforce app in Slack enables users to query Salesforce records directly from within Slack, allowing teams to view and interact with Salesforce data without leaving the Slack environment.

#### NEW QUESTION # 69

In designing a Slack grid for an organization that frequently collaborates on cross-functional projects, what grid design element is crucial to consider?

- A. Assigning a designated moderator for each channel to control the flow of information
- B. Ensuring that each department uses a different Slack workspace to keep their communications separate
- C. Creating project-specific channels that include members from relevant departments for focused collaboration
- D. Recommending that all communications be conducted in shared channels with external organizations

**Answer: C**

Explanation:

For an organization that frequently engages in cross-functional projects, creating project-specific channels with members from the relevant departments is essential. This facilitates focused collaboration and effective communication among team members from different functional areas, enhancing the efficiency of project execution.

#### NEW QUESTION # 70

A large enterprise plans to integrate Slack with their existing identity provider (IdP) to streamline user authentication. Which identity management feature should they primarily use to ensure a secure and efficient single sign-on (SSO) experience?

- A. OAuth for third-party app integrations
- B. Two-factor authentication (2FA) at Slack level
- C. SAML-based single sign-on
- D. Slack's built-in password management

**Answer: C**

Explanation:

SAML-based single sign-on is the best option for integrating Slack with an existing IdP, providing a secure and streamlined authentication process that aligns with enterprise-level security requirements.

#### NEW QUESTION # 71

A software development team is looking to use Slack to streamline their daily stand-up meetings. Which workflow would be most effective for this purpose?

- A. A workflow that requires team members to post fun facts about themselves each day to encourage team bonding
- **B. An automated daily stand-up workflow where team members post their updates in a dedicated channel at a set time each day**
- C. A manual process where the team leader asks for updates from each member in a random order during a scheduled video call
- D. Creating a separate channel for each team member to post their daily updates

**Answer: B**

Explanation:

An automated stand-up workflow in a dedicated channel allows team members to efficiently post their daily updates, ensuring consistency and easy tracking of progress, which streamlines the stand-up process and saves time.
