New NCP-CI-AWS Test Cram | Exam NCP-CI-AWS Forum

We can conclude this post with the fact that to clear the Nutanix Certified Professional - Cloud Integration - AWS (NCP-CI-AWS) certification exam, you need to be prepared before, study well, and practice. You cannot rely on your luck to score well in the NCP-CI-AWS exam. You have to prepare with ValidDumps real Nutanix NCP-CI-AWS Exam Questions to clear the NCP-CI-AWS test in one go. You will also receive up to 365 days of free updates and NCP-CI-AWS dumps pdf demos. Purchase the Nutanix Certified Professional - Cloud Integration - AWS (NCP-CI-AWS) practice tests today and get these amazing offers.

Nutanix NCP-CI-AWS Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> Deploying an NC2 on AWS Environment: This portion assesses your knowledge of cloud cluster deployment, cloud provider network configuration, and your skills in addressing cluster deployment challenges.
Topic 2	<ul style="list-style-type: none"> Prepare the AWS cloud environment: This exam segment evaluates your ability to set up the AWS cloud environment, initiate NC2 service subscription, establish implementation criteria, and recognize networking prerequisites.
Topic 3	<ul style="list-style-type: none"> Configuring an NC2 on AWS Environment: This section examines your proficiency in setting up cloud networking and security measures, as well as addressing connectivity issues.
Topic 4	<ul style="list-style-type: none"> Managing an NC2 on AWS Environment: This exam component tests your understanding of node and cluster management tasks, along with your ability to oversee cluster and cloud resource health.

Nutanix Certified Professional - Cloud Integration - AWS Sample Questions (Q59-Q64):

NEW QUESTION # 59

Which NC2 user role will allow full access to clusters created within an organization?

- A. Organization Security Administrator
- B. Cluster Super Admin
- C. Organization Administrator
- D. Cluster Administrator

Answer: C

Explanation:

In Nutanix Cloud Integration with AWS, specifically version 6.7, the role that allows full access to clusters created within an organization is the Organization Administrator.

The Organization Administrator role has the highest level of privileges within an organization, enabling the user to manage all aspects of the clusters, including creation, modification, and deletion.

This role is designed to oversee and control the entire organization's resources, ensuring comprehensive management capabilities over all clusters and associated resources.

Reference:

Refer to the Nutanix documentation on roles and permissions for NC2 on AWS for further details.

NEW QUESTION # 60

An administrator has been tasked with deploying a new production NC2 cluster on AWS and is studying the deployment.. AWS supports EC2 bare-metal instances in regions with at least how many partitions?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

Explanation:

AWS supports EC2 bare-metal instances in regions with at least 3 partitions. Partitions in AWS provide high availability and fault tolerance by distributing instances across different hardware to minimize the impact of hardware failures.

AWS EC2 Bare Metal Instances Documentation

AWS Regions and Availability Zones

NEW QUESTION # 61

An administrator has noticed the company's NC2 free trial expired 60 days ago.

What should the administrator do to continue using all of the NC2 features on existing clusters?

- **A. Switch to a paid subscription plan.**
- B. Nothing. The clusters will have full feature support.
- C. Contact Nutanix support to redeploy the cluster.
- D. Contact the AWS cloud vendor.

Answer: A

Explanation:

* After the NC2 free trial expires, to continue using all features of NC2 on existing clusters, the administrator needs to switch to a paid subscription plan.

* A paid subscription ensures uninterrupted access to the full range of features and support for NC2 clusters.

* Without switching to a paid plan, the features might be limited, and support may not be available, impacting the cluster's operations and management.

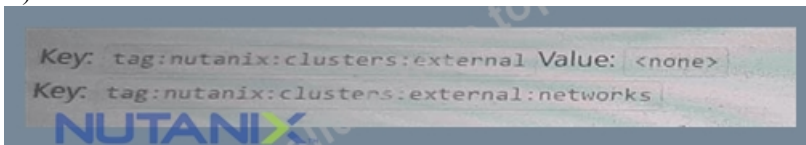

Refer to the Nutanix billing and subscription documentation for details on switching from a trial to a paid plan and the benefits associated with paid subscriptions.

NEW QUESTION # 62

An administrator needs to allow wide open access to one particular NC2 AWS cluster from an on-premises subnet of 10.19.160.0/24.

What is the proper Custom Security Group formatting to satisfy this task?

A)

B)

C)

D)

- A. Option A
- B. Option C
- **C. Option B**
- D. Option D

Answer: C

Explanation:

To allow wide open access to a particular NC2 AWS cluster from an on-premises subnet (10.19.160.0/24), the proper Custom Security Group formatting needs to include the necessary tags that specify the external cluster UUID and the networks allowed.

* Custom Security Group Configuration:

* The configuration should include tags to identify the cluster and the networks that should be granted access.

* Key: nutanix:clusters

* Key: nutanix:clusters:external

* Value: < cluster-uuid >

* Explanation of Choice:

* Option B includes the necessary tags and values, ensuring that the specific cluster UUID is recognized and the on-premises subnet (10.19.160.0/24) can communicate with the NC2 cluster.

* Security Group Tags:

* nutanix:clusters:external- Identifies the cluster as external.

* nutanix:clusters:external:cluster-uuid- Specifies the unique identifier for the cluster, enabling proper traffic routing and access.

NEW QUESTION # 63

An administrator is deploying a new cluster on AWS and would like to ensure the data is encrypted. Due to cost constraints, the deployment will leverage the native local key manager (LKM).

What is the minimal number of nodes needed to support the Nutanix native LKM?

- A. 0
- B. 1
- C. 2
- **D. 3**

Answer: D

Explanation:

To support Nutanix 's native Local Key Manager (LKM) for data encryption in a cost-effective manner, a minimum of three nodes is required. This ensures that there is enough redundancy and reliability for the encryption services to function properly, complying with best practices for distributed key management.
