## CWNP CWISA-103 Exam

### Certified Wireless IoT Solutions Administrator

<https://www.passquestion.com/cwisa-103.html>

Pass CWISA-103 Exam with PassQuestion CWISA-103 questions and answers in the first attempt.

<https://www.passquestion.com/>

P.S. Free 2026 CWNP CWISA-103 dumps are available on Google Drive shared by It-Tests: <https://drive.google.com/open?id=16SiTKtA5KIFNgNrMZHxRKd2CvuldXFAE>

We learned that a majority of the candidates for the CWISA-103 exam are office workers or students who are occupied with a lot of things, and do not have plenty of time to prepare for the CWISA-103 exam. Taking this into consideration, we have tried to improve the quality of our CWISA-103 training materials for all our worth. Now, I am proud to tell you that our CWISA-103 Training Materials are definitely the best choice for those who have been yearning for success but without enough time to put into it. There are only key points in our CWISA-103 training materials.

## CWNP CWISA-103 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> <li>• <b>Radio Frequency Communications:</b> This section of the exam measures the skills of RF Engineers and focuses on the fundamental principles of radio frequency communications. It involves explaining RF wave characteristics such as frequency, wavelength, and amplitude, and understanding behaviors like amplification, attenuation, and free space path loss. The domain covers describing modulation techniques including ASK, FSK, PSK, and QAM, and explaining the capabilities of RF components like radios, antennas, and cabling. It also includes describing the use and capabilities of different RF bands in terms of communication ranges and power levels.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• <b>Wireless Technologies:</b> This section of the exam measures the skills of Wireless Architects and covers foundational knowledge of wireless IoT technologies and their applications. It includes maintaining awareness of emerging technologies through research, understanding common applications and their associated frequencies and protocols, and familiarity with key standards organizations like IEEE, IETF, and Wi-Fi Alliance. The domain also encompasses defining various wireless network types including WLAN, WPAN, and IoT implementations across industries, along with understanding the hardware and software components of IoT devices and gateways, covering processors, memory, radios, sensors, and operating systems.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>Planning Wireless Solutions:</b> This section of the exam measures the skills of IoT Solutions Architects and encompasses the planning phase of wireless IoT solutions. It involves identifying system requirements, including use cases, capacity needs, security requirements, and integration needs, while considering constraints such as budgetary, technical, and regulatory limitations. The domain includes selecting appropriate wireless solutions based on requirements, planning for technical needs, including LAN</li> <li>• <b>WAN networking and frequency coordination,</b> and understanding the capabilities of common wireless IoT solutions like Bluetooth, Zigbee, and LoRaWAN, along with location services and methods.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Supporting Wireless Solutions:</b> This section of the exam measures the skills of Wireless Support Engineers and focuses on the ongoing administration and support of wireless solutions across various vertical markets. It involves administering solutions in healthcare, industrial, smart cities, retail, and other environments while troubleshooting common problems including interference, configuration issues, and hardware malfunctions. The domain includes determining the best use of scripting and programming solutions for IoT implementations, understanding data structures and APIs, and comprehending networking and security protocols. It also covers understanding application architectures and their impact on wireless solutions, including single-tier and multi-tier architectures, database systems, and application servers.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>Implementing Wireless Solutions:</b> This section of the exam measures the skills of Wireless Implementation Specialists and covers the practical implementation of wireless IoT solutions. It involves understanding key issues related to automation, integration, monitoring, and management, and using best practices in implementation, including pilot testing, configuration, installation, and documentation. The domain includes validating implementations through testing and troubleshooting, performing installation procedures including equipment mounting and connectivity configuration, and implementing security solutions covering authentication, authorization, and encryption. It also encompasses knowledge transfer practice, including staff training and solution documentation.</li> </ul>

## Free Demo Version and Free Updates of Real CWNP CWISA-103 Questions

If you want to be a more successful person and become the best, the first step you need to take is to have our CWISA-103 exam questions. Get an internationally certified CWISA-103 certificate to prove your strength. This is the best way. Your strength and efficiency will really bring you more job opportunities. And our CWISA-103 study braindumps will help you pass the exam easily and get the certification for sure.

## CWNP Certified Wireless IoT Solutions Administrator(2025 Edition) Sample Questions (Q16-Q21):

### NEW QUESTION # 16

What is a common characteristic of Industrial IoT (IIoT) devices that is not a characteristic of all IoT devices?

- A. Use of proprietary protocols
- **B. Ruggedized devices constructed for operating in harsh environments**
- C. Transmission of small amounts of data throughout the day
- D. Use of standardized protocols

**Answer: B**

Explanation:

- \* IIoT Environments: Industrial IoT (IIoT) often involves deployment in harsh environments (factories, plants, outdoor sites) with:
  - \* Extreme temperatures
  - \* Dust & Vibrations
  - \* Exposure to chemicals or moisture
- \* Ruggedization: IIoT devices are designed to withstand these conditions, ensuring reliability and longevity.

References

- \* IIoT: [https://en.wikipedia.org/wiki/Industrial\\_Internet\\_of\\_things](https://en.wikipedia.org/wiki/Industrial_Internet_of_things)
- \* Rugged Devices: Articles on ruggedized electronics will emphasize their importance in industrial settings.

### NEW QUESTION # 17

You are planning to outsource the implementation of a new LoRaWAN w of the service provider performing the implementation in all cases?

- **A. Effective documentation**
- B. Ongoing free support
- C. Proof of concept
- D. Ongoing paid support

**Answer: A**

Explanation:

Outsourcing Knowledge Transfer: When outsourcing implementation, the service provider has firsthand knowledge of system setup and configuration. Clear documentation ensures this knowledge remains accessible to you after the project is complete.

Ongoing Support: While paid/free support options influence long-term maintenance, they won't substitute missing documentation about the specific setup.

Reducing Future Vendor Reliance: Detailed documentation helps mitigate over-reliance on the service provider for minor changes and troubleshooting, giving you more long-term autonomy.

Proof of Concept: A POC typically happens before outsourcing, and focuses on validating the solution's feasibility, not ensuring smooth knowledge transfer thereafter.

### NEW QUESTION # 18

What is a common characteristic of Industrial IoT (IIoT) devices that is not a characteristic of all IoT devices?

- A. Use of proprietary protocols
- **B. Ruggedized devices constructed for operating in harsh environments**
- C. Transmission of small amounts of data throughout the day
- D. Use of standardized protocols

**Answer: B**

Explanation:

IIoT Environments: Industrial IoT (IIoT) often involves deployment in harsh environments (factories, plants, outdoor sites) with:

Extreme temperatures

Dust & Vibrations

Exposure to chemicals or moisture

Ruggedization: IIoT devices are designed to withstand these conditions, ensuring reliability and longevity.

### NEW QUESTION # 19

A Wi-Fi enabled weight scale is an example of what kind of health IoT device?

- A. injectable
- B. wearable
- C. non-wearable
- D. implantable

**Answer: C**

Explanation:

Health IoT Device Categories:

Wearable: Devices worn on the body (smartwatches, fitness trackers).

Non-wearable: Devices used without being worn (smart scales, connected medical equipment).

Implantable: Surgically inserted devices (pacemakers, glucose monitors).

### NEW QUESTION # 20

Which one of the following location tracking technologies is most energy efficient in typical implementations?

- A. Wi-Fi
- B. Cellular
- C. BLE Beacons
- D. GPS

**Answer: C**

Explanation:

BLE Beacon Power Efficiency: Bluetooth Low Energy (BLE) beacons are designed for low power consumption. Their primary function is to periodically broadcast short data packets (advertising their presence).

### NEW QUESTION # 21

.....

Free update for CWISA-103 Study Guide materials are available, that is to say, in the following year, you can get the latest information about the CWISA-103 exam dumps without spending extra money. In addition, CWISA-103 study guide of us is compiled by experienced experts, and they are quite familiar with the dynamics of the exam center, so that if you choose us, we can help you to pass the exam just one time, in this way, you can save your time and won't waste your money. We also have online and offline chat service stuff, if any other questions, just contact us.
