

AI-900 Free Pdf & AI-900 Pass4sure Vce & AI-900 Practice Torrent

P.S. Free 2026 Microsoft AI-900 dumps are available on Google Drive shared by PDFVCE: <https://drive.google.com/open?id=1owGkbyDHgMbcQLILoJXbIlg-6LTbRoipF>

Microsoft AI-900 training materials have won great success in the market. Tens of thousands of the candidates are learning on our AI-900 practice engine. First of all, our Microsoft AI-900 study dumps cover all related tests about computers. It will be easy for you to find your prepared learning material. If you are suspicious of our AI-900 Exam Questions, you can download the free demo from our official websites.

If you start to prepare for the AI-900 exam from books, then you will find that the content is too broad for you to cope with the exam questions. So, we just pick out the most important knowledge to learn. Through large numbers of practices, you will soon master the core knowledge of the AI-900 Exam. It is important to review the questions you always choose mistakenly. You should concentrate on finishing all exercises once you are determined to pass the AI-900 exam. And you will pass for sure as long as you study with our AI-900 study guide carefully.

AI-900 Real Exam Answers | Latest AI-900 Test Dumps

Maybe you have desired the AI-900 certification for a long time but don't have time or good methods to study. Maybe you always thought study was too boring for you. Our AI-900 study materials will change your mind. With our products, you will soon feel the happiness of study. Thanks to our diligent experts, wonderful study tools are invented for you to pass the AI-900 Exam. You can try

the demos first and find that you just can't stop studying if you use our AI-900 training guide.

Microsoft Azure AI Fundamentals Sample Questions (Q161-Q166):

NEW QUESTION # 161

Select the answer that correctly completes the sentence.

Answer:

Explanation:

Explanation:

The correct completion of the sentence is:

"The Form Recognizer service can be used to extract information from a driver's license to populate a database." According to the Microsoft Azure AI Fundamentals (AI-900) official study guide and the Microsoft Learn module "Identify features of computer vision workloads," Azure Form Recognizer (part of Azure AI Document Intelligence) is a document processing service that uses machine learning and optical character recognition (OCR) to extract structured data, key-value pairs, and text from documents such as invoices, receipts, identity cards, and driver's licenses.

This service allows businesses to automate data entry and document processing workflows by converting physical or scanned documents into machine-readable formats. For example, with a driver's license, Form Recognizer can extract structured data fields such as Name, Date of Birth, License Number, and Expiration Date, and automatically populate those values into a database or CRM system.

The AI-900 study materials emphasize that Form Recognizer is designed to handle both structured and unstructured document layouts. It includes prebuilt models for common document types (like invoices, receipts, and identity documents) and supports custom models for domain-specific forms.

By comparison:

* Computer Vision extracts general text or image content but doesn't structure or label extracted fields.

* Custom Vision is used for training image classification or object detection models.

* Conversational Language Understanding is for processing text or speech to determine intent, not extracting document data.

Therefore, based on the Microsoft Learn AI-900 official study content, the Form Recognizer service is the correct choice, as it is explicitly designed to extract and structure data from documents like driver's licenses, forms, and receipts - making it ideal for automatically populating a database.

NEW QUESTION # 162

Select the answer that correctly completes the sentence.

Answer:

Explanation:

Explanation:

The question describes a process where an AI system generates text that describes an image - for example,

"A dog playing with a ball in the park." This process is an example of image classification, a core workload in computer vision that allows a system to recognize and categorize the content of an image.

According to the Microsoft Azure AI Fundamentals (AI-900) official study guide and Microsoft Learn module "Identify Azure services for computer vision," image classification involves analyzing the pixels of an image and assigning one or more predefined categories or labels to it. In more advanced implementations, image classification models are combined with caption generation algorithms to produce descriptive text. For example, Azure AI Vision can generate captions and tags that describe an image's content, such as "outdoor scene," "a person riding a bicycle," or "a group of people smiling." Let's review the other options to clarify why they are incorrect:

* Facial detection: Identifies the presence and location of human faces in an image, but does not generate descriptive text.

* Object detection: Identifies and locates multiple objects within an image by drawing bounding boxes, not by describing the overall scene.

* Optical character recognition (OCR): Extracts text from images or scanned documents (for example, reading a street sign), but it doesn't create descriptive language about what's depicted.

Therefore, the correct answer is Image classification, as it aligns with the AI-900 learning objective that describes this task as recognizing and categorizing the main content of an image, often leading to caption generation in modern vision models such as those in Azure AI Vision.

NEW QUESTION # 163

Select the answer that correctly completes the sentence.

Answer:

Explanation:

Explanation:

NEW QUESTION # 164

Match the types of machine learning to the appropriate scenarios.

To answer, drag the appropriate machine learning type from the column on the left to its scenario on the right. Each machine learning type may be used once, more than once, or not at all.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:
