Reliable New Managing-Cloud-Security Test Discount | Managing-Cloud-Security 100% Free Latest Exam Materials

What's more, part of that DumpsReview Managing-Cloud-Security dumps now are free: https://drive.google.com/open?id=1PxWiw3Pfl0bCmmjXdfs_mZpos4coIVOt

Our company is considerably cautious in the selection of talent and always hires employees with store of specialized knowledge and skills on our Managing-Cloud-Security exam questions. All the members of our experts and working staff maintain a high sense of responsibility, which is why there are so many people choose our Managing-Cloud-Security Exam Materials and to be our long-term partner. For we carry forward the spirit of "firm & indomitable, developing & innovative, achieving the first class", serving customers with all our heart and soul with our wonderful Managing-Cloud-Security practice braindumps.

That is the reason DumpsReview has compiled a triple-formatted Managing-Cloud-Security exam study material that fulfills almost all of your preparation needs. The WGU Managing-Cloud-Security Practice Test is compiled under the supervision of 90,000 WGU professionals that assure the passing of the WGU Managing Cloud Security (JY02) (Managing-Cloud-Security) exam on your first attempt.

Trusted New Managing-Cloud-Security Test Discount | Easy To Study and

Pass Exam at first attempt & Useful WGU WGU Managing Cloud Security (JY02)

As we all know, through the judicial examination, you need to become a lawyer, when the teacher is need through the teachers' qualification examinations. If you want to be an excellent elites in this line, you need to get the WGU Managing Cloud Security (JY02) certification, thus it can be seen through the importance of qualification examination. Only through qualification examination, has obtained the corresponding qualification certificate, we will be able to engage in related work, so the Managing-Cloud-Security Test Torrent is to help people in a relatively short period of time a great important tool to pass the qualification test.

WGU Managing Cloud Security (JY02) Sample Questions (Q77-Q82):

NEW QUESTION # 77
An engineer needs to create segmentation using the built-in tools provided by the company's cloud provider.
The InfoSec team has given the engineer directions to limit traffic using a security group between two cloud deployments in the organization. Which mechanisms should the engineer use to create this segmentation?

- A. Ports and protocols
- B. Unique identifiers and protocols
- C. Definitions and protocols
- D. MAC addresses and protocols

Answer: A

Explanation:
Cloud security groups typically filter traffic based on ports and protocols. By allowing or denying specific port/protocol combinations, engineers can control communication between deployments. For example, permitting HTTPS (TCP port 443) while blocking other ports enforces segmentation.
MAC addresses are not used in cloud-level segmentation because they apply to physical networks. Unique identifiers and definitions are not practical mechanisms for traffic filtering.
Using ports and protocols aligns with the principle of least privilege by ensuring that only necessary communication pathways exist.
In multi-deployment or hybrid cloud setups, this reduces the attack surface and prevents lateral movement by malicious actors.
Security groups thereby provide logical network segmentation without requiring physical infrastructure changes.

NEW QUESTION # 78
Which steps should an organization take to avoid risk when dealing with software licensing?

- A. It should ensure it only uses closed-source licenses.
- B. It should ensure it has the correct location to store licenses.
- C. It should ensure it has the correct type of license.
- D. It should ensure it only uses open-source licenses.

Answer: C

Explanation:
The primary safeguard against licensing risk is ensuring the organization has the correct type of license.
Software licenses define usage rights, limitations, and legal obligations. Using software outside of license terms can lead to legal penalties, financial fines, and reputational damage.
Location of licenses is a management issue, not a risk control. Restricting usage to closed-source or open-source alone is not practical, as both models require compliance with license agreements.
Correct licensing includes verifying user counts, subscription terms, geographic restrictions, and intended use.
It also involves monitoring for unauthorized installations and conducting regular audits. Proper license management ensures legal compliance, cost control, and operational continuity.

NEW QUESTION # 79
A governmental data storage organization plans to relocate its primary North American data center to a new property with larger acreage. Which defense should the organization deploy at this location to prevent vehicles from causing harm to the data center?

- A. Locks

- B. Bollards
- C. Fences
- D. Cameras

Answer: B

Explanation:
Bollardsare physical barriers designed to prevent vehicles from ramming into or breaching secure facilities.
They are often placed at entrances, around perimeters, or in front of critical infrastructure like data centers.
Locks, cameras, and fences provide important physical security, but they cannot stop a high-speed vehicle from causing damage.
Cameras record activity, fences create boundaries, and locks secure access points, but only bollards physically block or mitigate vehicle attacks.
Governmental and critical infrastructure sites commonly deploy bollards to protect against both accidental collisions and deliberate vehicle-borne attacks. Combined with layered security measures-such as surveillance and fencing-they enhance resilience against physical threats to sensitive data centers.

NEW QUESTION # 80
An organization is evaluating which cloud computing service model it should implement. It is considering either platform as a service (PaaS) or software as a service (SaaS). Which risk associated with SaaS can the organization avoid by choosing PaaS?

- A. Vendor lock-out
- B. Vendor lock-in
- C. Natural disaster
- D. Personnel threat

Answer: B

Explanation:
WithSaaS, applications are delivered entirely by the provider, and customers have little to no control over the underlying platform or data portability. This creates a higher risk ofvendor lock-in, as migrating away from one SaaS provider to another may require reworking applications or losing features.
In contrast,PaaSgives customers more flexibility by allowing them to build, deploy, and manage their own applications while relying on standardized frameworks and platforms. Because applications are customer- managed, switching providers or migrating workloads can be easier compared to SaaS.
Vendor lock-out, personnel threats, and natural disasters are risks in any service model. The key differentiator here is portability and flexibility. Choosing PaaS reduces dependence on a single provider's application features, thereby lowering vendor lock-in risk while still offloading infrastructure management.

NEW QUESTION # 81
An organization consists of many divisions. Its leadership team has gathered the managers and key team members in each division to help create a disaster recovery plan. It studies the type of natural events that commonly occur and the risk involved for each location in which the organization has a data center. What is the leadership team doing in this scenario?

- A. Running a disaster declaration process
- B. Performing an asset inventory
- C. Identifying the actions
- D. Defining the disaster criteria

Answer: D

Explanation:
By analyzing natural events that could impact data centers and assessing the risks associated with each, the leadership team isdefining the disaster criteria. This step determines what conditions or events qualify as disasters requiring activation of the recovery plan.
An asset inventory identifies systems, but here the focus is on external events. A disaster declaration process occurs during an actual event, and identifying actions comes later when response strategies are created.
Defining disaster criteria is essential to avoid ambiguity during crises. It establishes thresholds such as
"category 4 hurricanes," "regional power outages exceeding 12 hours," or "seismic events over a set magnitude." Clear criteria ensure consistent decision-making and timely activation of recovery procedures.

NEW QUESTION # 82

......

I know that all your considerations are in order to finally pass the Managing-Cloud-Security exam. Our Managing-Cloud-Security study materials have helped many people pass the exam and is about to help you. The 99% pass rate of our Managing-Cloud-Security training prep is enough to make you feel at ease. Of course, we do everything we could do to ensure that you could think through it and that you also needed to pay a bit of your effort. And with our Managing-Cloud-Security Exam Questions, you will pass the exam for sure.

Latest Managing-Cloud-Security Exam Materials: https://www.dumpsreview.com/Managing-Cloud-Security-exam-dumps-review.html

Before you choose to end your practices of the Managing-Cloud-Security study materials, the screen will display the questions you have done, which help you check again to ensure all questions of Managing-Cloud-Security practice prep are well finished, If your Managing-Cloud-Security exam test is coming soon, I think Managing-Cloud-Security free training material will be your best choice, We guarantee that our Managing-Cloud-Security exam prep is cost-efficient and affordable for most candidates who want to get certification quickly in their first try.

Each letter should now appear on its own named layer, We shall later explain Managing-Cloud-Security how to build a schema with ClearQuest that will help Agile teams and stakeholders manage their projects smarter to help produce better products.

WGU Managing Cloud Security (JY02) exam training dumps & Managing-Cloud-Security valid test questions & WGU Managing Cloud Security (JY02) test vce torrent

Before you choose to end your practices of the Managing-Cloud-Security Study Materials, the screen will display the questions you have done, which help you check again to ensure all questions of Managing-Cloud-Security practice prep are well finished.

If your Managing-Cloud-Security exam test is coming soon, I think Managing-Cloud-Security free training material will be your best choice, We guarantee that our Managing-Cloud-Security exam prep is cost-efficient and affordable for most candidates who want to get certification quickly in their first try.

An Innovative Pathway to Ensure Success in Managing-Cloud-Security, As one person you can't be satisfied with your present situation and must keep the pace of the times.
