

Splunk SPLK-2002 Web-Based Practice Program

What's more, part of that Free4Torrent SPLK-2002 dumps now are free: https://drive.google.com/open?id=1eZA6KGSi_ECV5Y7KJXP4r2GQtyi926Q_

The desktop software Splunk SPLK-2002 practice exam format can be used easily used on your Windows system. Customers can use it without the internet. Free4Torrent have made all of the different formats so the students won't face any extra issues and crack SPLK-2002 Certification exams for the betterment of their futures.

Free4Torrent Splunk SPLK-2002 practice exam software went through real-world testing with feedback from more than 90,000 global professionals before reaching its latest form. The Splunk SPLK-2002 Exam Dumps are similar to real exam questions. Our Splunk SPLK-2002 practice test software is suitable for computer users with a Windows operating system.

Splunk New SPLK-2002 Dumps Book | Amazing Pass Rate For Your Splunk SPLK-2002: Splunk Enterprise Certified Architect

Solutions is one of the top platforms that has been helping SPLK-2002 exam candidates for many years. Over this long time period countless candidates have passed their dream Splunk Enterprise Certified Architect exam. The SPLK-2002 exam questions are designed by experience and qualified Splunk Enterprise Certified Architect expert. The Free4Torrent SPLK-2002 Exam Questions will not only assist you in SPLK-2002 exam preparation but also give you sight knowledge about the Splunk Enterprise Certified Architect (SPLK-2002) exam topics that will help you in your professional career.

Splunk Enterprise Certified Architect Sample Questions (Q34-Q39):

NEW QUESTION # 34

Which of the following is true for indexer cluster knowledge bundles?

- A. Only app-name/default is pushed.
- B. app-name/default and app-name/local are pushed without change.
- C. Only app-name/local is pushed.
- **D. app-name/default and app-name/local are merged before pushing.**

Answer: D

Explanation:

According to the Splunk documentation¹, indexer cluster knowledge bundles are the configuration files that the cluster master distributes to the peer nodes as part of the cluster configuration bundle. The knowledge bundles contain the knowledge objects, such as event types, tags, lookups, and so on, that are relevant for indexing and searching the data. The cluster master creates the knowledge bundles by merging the app-name

/default and app-name/local directories from the apps that reside on the master node. The cluster master then pushes the knowledge bundles to the peer nodes, where they reside under the \$SPLUNK_HOME/var/run directory². The other options are false because:

* Only app-name/local is pushed. This is false because the cluster master pushes both the app-name

/default and app-name/local directories, after merging them, to the peer nodes. The app-name/local directory contains the local customizations of the app configuration, while the app-name/default directory contains the default app configuration³.

* Only app-name/default is pushed. This is false because the cluster master pushes both the app-name

/default and app-name/local directories, after merging them, to the peer nodes. The app-name/default directory contains the default app configuration, while the app-name/local directory contains the local customizations of the app configuration³.

* app-name/default and app-name/local are pushed without change. This is false because the cluster master merges the app-name/default and app-name/local directories before pushing them to the peer nodes. This ensures that the peer nodes have the latest and consistent configuration of the apps³.

NEW QUESTION # 35

Before users can use a KV store, an admin must create a collection. Where is a collection is defined?

- A. kvcollections.conf
- **B. collections.conf**
- C. kvstore.conf
- D. collection.conf

Answer: B

NEW QUESTION # 36

To optimize the distribution of primary buckets; when does primary rebalancing automatically occur? (Select all that apply.)

- A. Captain joins or rejoins cluster.
- **B. Master node rejoins the cluster.**
- **C. A peer node joins or rejoins the cluster.**
- **D. Rolling restart completes.**

Answer: B,C,D

Explanation:

Explanation

Primary rebalancing automatically occurs when a rolling restart completes, a master node rejoins the cluster, or a peer node joins or rejoins the cluster. These events can cause the distribution of primary buckets to become unbalanced, so the master node will initiate a rebalancing process to ensure that each peer node has roughly the same number of primary buckets. Primary rebalancing does not occur when a captain joins or rejoins the cluster, because the captain is a search head cluster component, not an indexer cluster component. The captain is responsible for search head clustering, not indexer clustering

NEW QUESTION # 37

Which of the following server.conf stanzas indicates the Indexer Discovery feature has not been fully configured (restart pending) on the Master Node?

- **A.**

```
[indexer_discovery]
pass4SymmKey = $7$XcXl1lu4630Jbui140Ve295+mvx6gCKKv6kf2zEaVB6Ie4DcZ318nLV1fW
```

- B.

```
[clustering]
mode = master
pass4SymmKey = $7$tYTXzke+1r+3DULTHHDUTmYOXdTzJPxg21YwABrJE20jsmicp9C3ni0
```

- C.

```
[clustering]
mode = forwarder
pass4SymmKey = $7$PU9SBXww63Vz3UJdDYGIN0UrdscRh83ssC2pEpwE6P3gn50iNFO94g==
```

```
[indexer_discovery]
pass4SymmKey = idxdiscovery
```

- D.

Answer: A

Explanation:

The Indexer Discovery feature enables forwarders to dynamically connect to the available peer nodes in an indexer cluster. To use this feature, the manager node must be configured with the [indexer_discovery] stanza and a pass4SymmKey value. The forwarders must also be configured with the same pass4SymmKey value and the master_uri of the manager node. The pass4SymmKey value must be encrypted using the splunk _encrypt command.

Therefore, option A indicates that the Indexer Discovery feature has not been fully configured on the manager node, because the pass4SymmKey value is not encrypted. The other options are not related to the Indexer Discovery feature. Option B shows the configuration of a forwarder that is part of an indexer cluster. Option C shows the configuration of a manager node that is part of an indexer cluster. Option D shows an invalid configuration of the [indexer_discovery] stanza, because the pass4SymmKey value is not encrypted and does not match the forwarders' pass4SymmKey value.

NEW QUESTION # 38

Which of the following statements describe search head clustering? (Select all that apply.)

- A. A deployer is required.
- B. At least three search heads are needed.
- C. The deployer must have sufficient CPU and network resources to process service requests and push configurations.
- D. Search heads must meet the high-performance reference server requirements.

Answer: A,B,C

Explanation:

Explanation

Search head clustering is a Splunk feature that allows a group of search heads to share configurations, apps, and knowledge objects, and to provide high availability and scalability for searching. Search head clustering has the following characteristics:

- * A deployer is required. A deployer is a Splunk instance that distributes the configurations and apps to the members of the search head cluster. The deployer is not a member of the cluster, but a separate instance that communicates with the cluster master.
- * At least three search heads are needed. A search head cluster must have at least three search heads to form a quorum and to ensure high availability. If the cluster has less than three search heads, it cannot function properly and will enter a degraded mode.
- * The deployer must have sufficient CPU and network resources to process service requests and push configurations. The deployer is responsible for handling the requests from the cluster master and the cluster members, and for pushing the configurations and apps to the cluster members. Therefore, the deployer must have enough CPU and network resources to perform these tasks efficiently and reliably.

Search heads do not need to meet the high-performance reference server requirements, as this is not a mandatory condition for search head clustering. The high-performance reference server requirements are only recommended for optimal performance and scalability of Splunk deployments, but they are not enforced by Splunk.

NEW QUESTION # 39

.....

To find the perfect Splunk Enterprise Certified Architect SPLK-2002 practice materials for the exam, you search and re-search without reaching the final decision and compare advantages and disadvantages with materials in the market. With systemic and methodological content within our SPLK-2002 practice materials, they have helped more than 98 percent of exam candidates who chose our SPLK-2002 guide exam before getting the final certificates successfully.

Actual SPLK-2002 Test Answers: <https://www.free4torrent.com/SPLK-2002-braindumps-torrent.html>

Splunk New SPLK-2002 Dumps Book One right choice will help you avoid much useless effort, Our SPLK-2002 study materials have confidence to help you pass SPLK-2002 exam successfully and get related certification that you long for, Splunk New SPLK-2002 Dumps Book The clean interface and big button makes it easy to handle and even a beginner can figure it out, The time and energy cost are a very huge investment, while some people think it is worthy, we want to say our SPLK-2002 valid exam can give you a best and fast way to achieve success.

Essentially how could we assume there would be service lock in when SPLK-2002 Force had one platform and Google App Engine had her, What Is Strategy, One right choice will help you avoid much useless effort.

Buy Free4Torrent Splunk SPLK-2002 Questions Now And Get Free Updates

Our SPLK-2002 Study Materials have confidence to help you pass SPLK-2002 exam successfully and get related certification that you long for, The clean interface and big button makes it easy to handle and even a beginner can figure it out.

The time and energy cost are a very huge investment, while some people think it is worthy, we want to say our SPLK-2002 valid exam can give you a best and fast way to achieve success.

You can receive the download link and password within ten minutes for SPLK-2002 training materials, and if you don't receive, you can contact with us, and we will solve the problem for you.
