## Materials Free Download for Apple DEP-2025 Exam

Our considerate service is not only reflected in the purchase process, but also reflected in the considerate after-sales assistance on our DEP-2025 exam questions. We will provide considerate after-sales service to every user who purchased our DEP-2025 practice materials. If you have any questions after you buy our DEP-2025 study guide, you can always get thoughtful support and help by email or online inquiry. If you need any support, and we are always here to help you.

## Apple Deployment and Management Exam Sample Questions (Q263-Q268):

### NEW QUESTION # 263

What's required to use Lost Mode on a device?

- A. An MDM solution
- B. iCloud enabled
- C. Find My enabled
- D. A passcode

**Answer: A**

Explanation:

Lost Mode is an MDM feature that allows administrators to lock a supervised device remotely, display a custom message, and track its location (if enabled). It requires an MDM solution to issue the command via APNs, and the device must be supervised. Find My (option B) enables user-initiated Lost Mode but isn't required for MDM's version. iCloud (option C) isn't a prerequisite, though it's often enabled. A passcode (option D) enhances security but isn't required to activate Lost Mode. The MDM Protocol Reference confirms MDM's role in Lost Mode for supervised devices.

Reference: MDM Protocol Reference (Section: Lost Mode).

### NEW QUESTION # 264

What must an enrollment profile contain?

- A. A provisioning profile
- B. A configuration profile
- C. A supervision token
- D. An MDM payload

**Answer: D**

Explanation:

An enrollment profile is what links an Apple device to an MDM server. Apple Learning resources are clear that the enrollment profile must always contain an MDM payload. This payload defines the server address, authentication method, and settings required for the device to establish secure management. Without the MDM payload, the device cannot receive configuration profiles, apps, or commands from the MDM solution.

Other items such as configuration profiles or provisioning profiles may be distributed after enrollment, but they are not part of the required enrollment profile. The MDM payload is therefore the critical element that makes enrollment functional.

Reference: Apple Platform Deployment - "Enrollment profiles in MDM."

### NEW QUESTION # 265

Which feature allows IT administrators to manage security settings on a device?

- A. Find My
- B. iCloud
- C. Configuration profiles
- D. MDM

**Answer: C**

Explanation:

Configuration profiles allow IT administrators to manage security settings on a device, such as enforcing encryption, restricting untrusted certificates, or enabling firewalls (on macOS). These profiles are deployed via MDM or manually, ensuring compliance.

with security policies. Find My (option B) and iCloud (option C) are user-focused features unrelated to security management. MDM (option D) delivers profiles, but the profiles define the settings. The Apple Platform Deployment Guide details security configuration via profiles.

#### NEW QUESTION # 266

You send an MDM command with a "requires tethering" option to devices to update the operating systems and apps. Where is content cached?

- A. At the MDM solution distribution point
- B. On the tethered iPhone or iPad
- **C. On the host Mac**
- D. Content isn't cached with the "requires tethering" option

**Answer: C**

Explanation:

When devices are updated using Apple Configurator with the "requires tethering" option, the host Mac acts as the source for software updates. In this model, the Mac downloads and caches update packages, which are then installed onto the connected iOS or iPadOS device. This bypasses typical over-the-air (OTA) caching mechanisms and content delivery networks. Apple specifies this workflow as beneficial when updating large numbers of devices in lab or classroom environments, where bandwidth efficiency and predictable installation are important. Thus, the cached update content resides on the host Mac, ensuring devices receive updates directly from a local source.

References: Apple Configurator Guide - "Update or restore software on iPhone and iPad."

#### NEW QUESTION # 267

A Mac user deferred a managed software update after the deadline for the update passed. What happens next?

- **A. The update automatically installs without the user's intervention if the deadline is missed**
- B. The user receives a reminder that they can still defer the update for up to 30 days
- C. The user receives notifications that the update is overdue and needs immediate attention
- D. All update notifications are disabled to reduce user distraction

**Answer: A**

Explanation:

Post-deadline, updates install automatically. The Mobile Device Management Protocol Reference states, "If a user defers a managed software update past the MDM-enforced deadline, macOS will automatically install it to ensure compliance." References: Mobile Device Management Protocol Reference, "Software Updates" section. macOS Deployment Reference, "Update Enforcement" section.

#### NEW QUESTION # 268

.....

We can provide you with efficient online services during the whole day, no matter what kind of problems or consultants about our DEP-2025 quiz torrent; we will spare no effort to help you overcome them sooner or later. First of all, we have professional staff with dedication to check and update our DEP-2025 exam torrent materials on a daily basis, so that you can get the latest information from our DEP-2025 Exam Torrent at any time. Besides our after-sales service engineers will be always online to give remote guidance and assistance for you if necessary. If you make a payment for our DEP-2025 test prep, you will get our study materials in 5-10 minutes and enjoy the pleasure of your materials.
