DOWNLOAD the newest DumpsMaterials AZ-305 PDF dumps from Cloud Storage for free: [https://drive.google.com/open?id=1lzrc8\\_kLs98ZloSYiePw7uE2t9j71rT5](https://drive.google.com/open?id=1lzrc8_kLs98ZloSYiePw7uE2t9j71rT5)

In the 21 Century, the {Examcode} certification became more and more recognized in the society because it represented the certain ability of examinees. However, in order to obtain {Examcode} certification, you have to spend a lot of time preparing for the AZ-305 exam. Many people gave up because of all kinds of difficulties before the examination, and finally lost the opportunity to enhance their self-worth. As a thriving multinational company, we are always committed to solving this problem. For example, the AZ-305 Learning Engine we developed can make the AZ-305 exam easy and easy, and we can confidently say that we did this.

All operating systems also support this web-based AZ-305 practice test. The third format is desktop AZ-305 practice exam software that can be accessed easily after installing it on your Windows PC or Laptop. These formats are there so that the students can use them as per their unique needs and prepare successfully for AZ-305 the on first try.

## Pass Guaranteed Microsoft - AZ-305 - High Pass-Rate Designing Microsoft Azure Infrastructure Solutions Exam Score

As a professional multinational company, we fully take into account the needs of each user when developing products. For example, in order to make every customer can purchase at ease, our AZ-305 study materials will provide users with three different versions for free trial, corresponding to the three official versions. You can feel the characteristics of our AZ-305 Study Materials and whether they are suitable for you from the trial. After your payment, we'll send you a connection of our AZ-305 study materials in 5 to 10 minutes and you can download immediately without wasting your valuable time.

Microsoft AZ-305 Certification Exam is an excellent way for professionals to demonstrate their expertise in designing Azure infrastructure solutions. It covers a broad range of topics and requires a deep understanding of Azure architecture and best practices. Achieving the certification can lead to better job opportunities, higher salaries, and more challenging projects.

## Microsoft Designing Microsoft Azure Infrastructure Solutions Sample Questions (Q187-Q192):

### NEW QUESTION # 187

You have an Azure subscription that contains an Azure SQL database.  
You plan to use Azure reservations on the Azure SQL database.  
To which resource type will the reservation discount be applied?

- A. vCore compute
- B. DTU compute
- C. Storage
- D. License

**Answer: A**

Explanation:

Quantity: The amount of compute resources being purchased within the capacity reservation. The quantity is a number of vCores in the selected Azure region and Performance tier that are being reserved and will get the billing discount. For example, if you run or plan to run multiple databases with the total compute capacity of Gen5 16 vCores in the East US region, then you would specify the quantity as 16 to maximize the benefit for all the databases.

Reference:

<https://docs.microsoft.com/en-us/azure/azure-sql/database/reserved-capacity-overview>

### NEW QUESTION # 188

You have an Azure App Service web app that uses a system-assigned managed identity.  
You need to recommend a solution to store their settings of the web app as secrets in an Azure key vault. The solution must meet the following requirements:  
\* Minimize changes to the app code,  
\* Use the principle of least privilege.  
What should you include in the recommendation? To answer, select the appropriate options in the answer area.

**Answer:**

Explanation:

□ Explanation:

□

### NEW QUESTION # 189

You plan to migrate DB1 and DB2 to Azure.  
You need to ensure that the Azure database and the service tier meet the resiliency and business requirements.  
What should you configure? To answer, select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

□ Explanation:

□

### NEW QUESTION # 190

Case Study 3 - Contoso

Existing Environment: Technical Environment

The on-premises network contains a single Active Directory domain named contoso.com.

Contoso has a single Azure subscription.

Existing Environment: Business Partnerships

Contoso has a business partnership with Fabrikam, Inc. Fabrikam users access some Contoso applications over the internet by using Azure Active Directory (Azure AD) guest accounts.

Requirements: Planned Changes

Contoso plans to deploy two applications named App1 and App2 to Azure.

Requirements: App1

App1 will be a Python web app hosted in Azure App Service that requires a Linux runtime. Users from Contoso and Fabrikam will

access App1.

App1 will access several services that require third-party credentials and access strings. The credentials and access strings are stored in Azure Key Vault.

App1 will have six instances: three in the East US Azure region and three in the West Europe Azure region.

App1 has the following data requirements:

- \* Each instance will write data to a data store in the same availability zone as the instance.
- \* Data written by any App1 instance must be visible to all App1 instances.

App1 will only be accessible from the internet. App1 has the following connection requirements:

- \* Connections to App1 must pass through a web application firewall (WAF).
- \* Connections to App1 must be active-active load balanced between instances.
- \* All connections to App1 from North America must be directed to the East US region. All other connections must be directed to the West Europe region.

Every hour, you will run a maintenance task by invoking a PowerShell script that copies files from all the App1 instances. The PowerShell script will run from a central location.

Requirements: App2

App2 will be a NET app hosted in App Service that requires a Windows runtime. App2 has the following file storage requirements:

- \* Save files to an Azure Storage account.
- \* Replicate files to an on-premises location.
- \* Ensure that on-premises clients can read the files over the LAN by using the SMB protocol.

You need to monitor App2 to analyze how long it takes to perform different transactions within the application. The solution must not require changes to the application code.

Application Development Requirements

Application developers will constantly develop new versions of App1 and App2. The development process must meet the following requirements:

- \* A staging instance of a new application version must be deployed to the application host before the new version is used in production.
- \* After testing the new version, the staging version of the application will replace the production version.
- \* The switch to the new application version from staging to production must occur without any downtime of the application.

Identity Requirements

Contoso identifies the following requirements for managing Fabrikam access to resources:

- \* Every month, an account manager at Fabrikam must review which Fabrikam users have access permissions to App1. Accounts that no longer need permissions must be removed as guests.
- \* The solution must minimize development effort.

Security Requirement

All secrets used by Azure services must be stored in Azure Key Vault.

Services that require credentials must have the credentials tied to the service instance. The credentials must NOT be shared between services.

You need to recommend a solution for the App1 maintenance task. The solution must minimize costs.

What should you include in the recommendation?

- A. an Azure logic app
- **B. an Azure function**
- C. an App Service WebJob
- D. an Azure virtual machine

**Answer: B**

Explanation:

<https://learn.microsoft.com/en-us/azure/azure-functions/functions-reference-powershell?tabs=portal>

<https://learn.microsoft.com/en-us/azure/azure-functions/functions-create-scheduled-function#create-a-timer-triggered-function>

### NEW QUESTION # 191

You are designing a large Azure environment that will contain many subscriptions.

You plan to use Azure Policy as part of a governance solution.

To which three scopes can you assign Azure Policy definitions? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- **A. resource groups**
- **B. management groups**
- C. Azure Active Directory (Azure AD) tenants

- D. compute resources
- E. Azure Active Directory (Azure AD) administrative units
- F. subscriptions

**Answer: A,B,F**

Explanation:

Azure Policy evaluates resources in Azure by comparing the properties of those resources to business rules.

Once your business rules have been formed, the policy definition or initiative is assigned to any scope of resources that Azure supports, such as management groups, subscriptions, resource groups, or individual resources.

<https://docs.microsoft.com/en-us/azure/governance/policy/overview>

## NEW QUESTION # 192

.....

DumpsMaterials can provide a shortcut for you and save you a lot of time and effort. DumpsMaterials will provide good training tools for your Microsoft Certification AZ-305 Exam and help you pass Microsoft certification AZ-305 exam. If you see other websites provide relevant information to the website, you can continue to look down and you will find that in fact the information is mainly derived from our DumpsMaterials. Our DumpsMaterials provide the most comprehensive information and update fastest.
