

Valid 300-620 Exam Discount & New 300-620 Dumps Book

What's more, part of that BraindumpsVCE 300-620 dumps now are free: https://drive.google.com/open?id=1qNFpqMeN14Zut_hPxjUICDYbr9UUsra

We abandon all obsolete questions in this latest 300-620 exam torrent and compile only what matters toward actual real exam. The downloading process is operational. It means you can obtain 300-620 quiz torrent within 10 minutes if you make up your mind. Do not be edgy about the exam anymore, because those are latest 300-620 Exam Torrent with efficiency and accuracy. You will not need to struggle with the exam. Besides, there is no difficult sophistication about the procedures, our latest 300-620 exam torrent materials have been in preference to other practice materials and can be obtained immediately.

Cisco 300-620 Certification Exam is a challenging but rewarding opportunity for IT professionals who want to demonstrate their expertise in designing and implementing modern data center networks. By earning this certification, candidates can open up new career opportunities and enhance their credibility as network engineering experts.

New 300-620 Dumps Book & 300-620 Test Dumps Pdf

One of the most effective strategies to prepare for the Implementing Cisco Application Centric Infrastructure (300-620) exam successfully is to prepare with actual Cisco 300-620 exam questions. It would be difficult for the candidates to pass the 300-620 exam on the first try if the 300-620 study materials they use are not updated. Studying with invalid 300-620 practice material results in a waste of time and money. Therefore, updated 300-620 practice questions are essential for the preparation of the Implementing Cisco Application Centric Infrastructure (300-620) exam.

What is the cost of Implementing Cisco Application Centric Infrastructure (300-620 DCACI)

- Number of Questions: 90-105
- Format: Multiple choices, multiple answers
- Length of Examination: 120 minutes
- Passing Score: 70%

Cisco Implementing Cisco Application Centric Infrastructure Sample Questions (Q312-Q317):

NEW QUESTION # 312

Which Cisco APIC configuration prevents a remote network that is not configured on the bridge domain from being learned by the fabric?

- A. enable IP Data-plane Learning

- B. enable Limit IP Learning to Subnet
- C. enable Unicast Routing
- D. enable ARP Flooding to BD

Answer: B

Explanation:

Reference:

NEW QUESTION # 313

Refer to the exhibit.

Refer to the exhibit. An engineer must divert the traffic between VM-1 and VM-2 by using a Multi-Node service graph. The solution should prevent an insufficient number of available Layer 4 to Layer 7 devices in the first cluster. Which configuration set accomplishes this goal?

- A. PBR node tracking
tracking threshold with action deny
symmetric PBR
unidirectional PBR
- B. PBR node tracking
tracking threshold with action bypass
symmetric PBR
resilient hashing
- C. PBR node tracking
tracking threshold with action permit
symmetric PBR
resilient hashing
- D. PBR node tracking
tracking threshold with action permit
unidirectional PBR
resilient hashing

Answer: B

Explanation:

To divert traffic between VM-1 and VM-2 using a Multi-Node service graph while preventing an insufficient number of available Layer 4 to Layer 7 devices in the first cluster, the following configuration set should be used:

PBR node tracking: This feature monitors the health of the nodes (Layer 4 to Layer 7 devices) in the service graph. If a node becomes unavailable, the system can take action based on the tracking threshold¹.

Tracking threshold with action bypass: When the number of healthy nodes falls below the tracking threshold, the action 'bypass' ensures that traffic is not sent to the unhealthy nodes, thus preventing service disruption¹.

Symmetric PBR: This ensures that return traffic follows the same path as the original traffic, maintaining session consistency and avoiding asymmetric routing issues¹.

Resilient hashing: This hashing mechanism provides a consistent and optimal distribution of traffic across the available Layer 4 to Layer 7 devices, even when the number of nodes changes due to a failure or maintenance¹.

Cisco APIC Layer 4 to Layer 7 Services Deployment Guide, Release 5.2(x)

NEW QUESTION # 314

Drag and drop the Cisco ACI Layer 4 to Layer 7 service insertion terms on the left to the correct descriptions on the right.

Answer:

Explanation:

NEW QUESTION # 315

What is the effect of enabling the disable Remote EP learn feature?

- A. It disables remote IP endpoint learning on leaf switches that do not have L3Outs.
- **B. It limits learning of remote leaf endpoints on border leaves.**
- C. It disables remote IP endpoint learning on all leaf nodes in the fabric.
- D. It prevents border leaf switches from receiving routes through peering with external routers.

Answer: B

Explanation:

<https://community.cisco.com/t5/application-centric/aci-disable-remote-ep-learn/td-p/4062054> When you enable this feature, it clears all the remote endpoints from the border leaf only.

<https://www.cisco.com/c/en/us/solutions/collateral/data-center-virtualization/application-centric-infrastructure/white-paper-c11-739989.html#DisableRemoteEPLearnonborderleaf> When this feature is enabled, remote IP endpoint learning at the VRF instance is disabled on border leaf switches.

However, border leaf may still learn remote IP endpoints from IP multicast routing packets

NEW QUESTION # 316

Refer to the exhibit. An engineer is implementing Cisco ACI - VMware vCenter integration for a blade server that lacks support of bonding. Which port channel mode results in "route based on originating virtual port" on the VMware VDS?

- **A. MAC Pinning+**
- B. MAC Pinning-Physical-NIC-load
- C. Static Channel - Mode On
- D. LACP Passive
- E. LACP Active

Answer: A

Explanation:

Section: Integrations
